## 567 Contract Completion Status Functional Group=D3

**Purpose:** This Draft Standard for Trial Use contains the format and establishes the data contents of the Contract Completion Status Transaction Set (567) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to report administrative closure status on completed contracts. The originator can use this transaction set to close contract files, to indicate why contract files will not be closed within established milestones, or to extend contract closeout milestone dates. This transaction set may be used to convey contract summary data, financial information, dates pertinent to the administrative closing of a contract file, and logistics information necessary to evaluate contract closeout status.

## **DLMS Note:**

1. Contract Administration Offices (CAOs) use this transaction set to report to Purchasing Offices (POs), EDA, and financial systems, both closed and unclosed contract file status. POs use this transaction set to request CAOs delay contract file closing. POs use this transaction to report closed status to EDA and financial systems where the POs retain contract administration. Contract file closings are dependent upon contract face values and the attendant administrative costs associated with such contract file closings.

2. Use a single occurrence of this transaction set to transmit a final contract completion statement for small purchases (usually without payment data), an interim contract completion statement for large purchases (with or without payment data), a final contract completion statement for large purchases (must include payment data) to the PO, EDA, and financial systems, a CAO extension of contract closing to the PO, or a PO request to the CAO for contract closing extension for specified periods of time, or an automated contract closeout systemically generated, such as by Wide Area Workflow. Each 567C transaction set may contain only one (1) of the five reports stated above, to include cancellations thereof. Multiple contract reports are not permitted.

3. Use only the ST, BC, 1/N1/030, G61, CS, LM, LQ, and SE segments when cancelling a previously transmitted contract completion status report.

4. DoD logistics users should refer to the Defense Logistics Management Standards (DLMS) Implementation Convention (IC) available at URL: www.dla.mil/does/DLMS. The DLMS IC provides specific business rules, conditions, and authorized codes necessary for appropriate use of this IC within the DLMS.

5. Users operating under the Defense Logistics Management Standards (DLMS) must reference the Unit of Issue and Purchase Unit Conversion Table and the Transportation Mode of Shipment Conversion Table which can be found on the Defense Enterprise Data Standards Office (DEDSO) Web site at www.dla.mil/does/DLMS.

6. This DLMS Implementation Convention contains:

a. Data associated with a DLMS enhancement which may not be received or understood by the recipient's automated processing system. DLMS procedures may not have been developed. Components must coordinate requirements and business rules with DEDSO prior to use.

b. Data associated with an Approved Change which may not have an established implementation date. This data may not be received or understood by the recipient's automated processing system. Components must coordinate implementation with DEDSO prior to use.

c. Defense Logistics Standard System (DLSS) data which must be retained in the DLMS for a transition period to support transaction conversion in a mixed DLSS/DLMS environment. This data will be streamlined out once full DLMS implementation is reached. Components may coordinate with DEDSO for early termination (or retention) of specific data requirements for users operating in a full DLMS environment.

d. Data elements which have an expanded files size above existing DLSS capability which may not be supported by the recipient's automated processing system. Components must coordinate implementation with DEDSO prior to use.

e. Data required to accommodate Component-unique transaction requirements (ex. C-series transactions). Data does not apply to DLSS transactions.

7. This revision to the DLMS IC incorporates Proposed DLMS Changes (PDC) and Approved DLMS Changes (ADC) listed. PDCs/ADCs are available from the DEDSO Web site: http://www.dla.mil/HQ/InformationOperations/DLMS/eLibrary/Changes/processchanges/

- ADC 168, New DLMS Supplement 4010 567C, Contract Completion Status (DLMS Contract Completion Statement/Unclosed Contract Status/Contract Close-out Extension) (Contract Administration)

#### Notes:

1/020 The BC segment can carry a transaction reference number and a reference to a previous transaction number.

1/050L The CS loop carries the details of the contract(s) being reported and the logistics management information relative to the administrative closeout of the contract(s).

1/050 The CS loop carries the details of the contract(s) being reported and the logistics management information relative to the administrative closeout of the contract(s).

1/060 The AMT segment carries the amount of obligated dollars which remain unliquidated, if any existed, at the time the contract was administratively closed.

1/070 The N9 segment contains the number of the last payment voucher applicable to the reported contract.

1/100L The LM loop identifies logistic data unique to each use of the CS loop.

1/100 The LM loop identifies logistic data unique to each use of the CS loop.

# **ST** Transaction Set Header

Pos: 010 Max: 1 Heading - Mandatory Loop: N/A Elements: 2

User Option (Usage): Must use

Purpose: To indicate the start of a transaction set and to assign a control number

## Semantics:

1. The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the Invoice Transaction Set).

Ref	<u>ld</u>	Element Name	Req	Туре	<u>Min/Max</u>	<u>Usage</u>	<u>Rep</u>

ST02	329	Transaction Set Control Number	М	AN	4/9	Must use	1
		<b>Description:</b> Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set					

DLMS Implementation Convention (IC) 567C DLMS Contract Completion Statement/ Unclosed Contract Status/Contract Close-out

# **BC** Beginning Segment for Contract Completion Status

Pos: 020 Max: 1 Heading - Mandatory Loop: N/A Elements: 5

User Option (Usage): Must use

Purpose: To indicate the beginning of a Contract Completion Status Transaction Set

## Semantics:

- 1. BC02 is the date of transaction set preparation.
- 2. BC03 is the time of transaction set preparation.
- 3. BC04 is the transaction reference number.
- 4. BC05 is the reference number of a previous transaction.

<u>Ref</u> BC01	<u>Id</u> 353	<u>Element Name</u> Transaction Set Purpose Code	<u>Req</u> M	<u>Type</u> ID	<u>Min/Max</u> 2/2	<u>Usage</u> Must use	<u>Rep</u> 1

		<u>Code</u> <u>Name</u> 00 Original					
		DLMS Note:					
		Use code 00 regardless of the type of	of contrac	t completio	n status report.		
BC02	373	Date	0	DT	8/8	Must use	1
		<b>Description:</b> Date expressed as CCYYMMDD					
		<b>DLMS Note:</b> This date corresponds to the Universal Time Coordinate (UTC).					
BC03	337	Time	0	ТМ	4/8	Must use	1
		<b>Description:</b> Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99)					
		<b>DLMS Note:</b> 1. Express the originating activity's time in UTC.					
		2. Express time in a four-position (HHMM) format.					
BC06	640	Transaction Type Code	0	ID	2/2	Used	1
		<ul> <li>Description: Code specifying the type of transaction</li> <li>DLMS Note: Use to identify all types of contract completion status reports including cancellations thereof. Also must use the 1/LQ/110 segment.</li> </ul>					
		CodeNameV1Contract Completion Report					
BC07	306	Action Code	0	ID	1/2	Used	1
		Description: Code indicating type of action					

#### Code Name

2

#### Change (Update)

#### DLMS Note:

1. Use to identify an update to the initial automated contract closeout action. Use with 1/LQ02/110 Code K for Cancellation.

2. Authorized for use by both system initiated automated closeouts (e.g., *iRAPT*) and non-automated contract closeout action.

#### CL Closed

#### **DLMS Note:**

1. Use to identify a contract closeout action for a contract that qualifies for a system initiated automated contract closeout.

2. For an automated contract closeout, use of CL Closed, acknowledges compliance with the automated contract closeout transactions statement of authority and eligibility for initiation of the automated contract closeout cited in DLM 4000.25, Volume 7, Chapter 4, paragraphs C4.11.2 and C4.11.4

# N1 Name

Pos: 030 Max: 2 Heading - Optional Loop: N/A Elements: 5

#### User Option (Usage): Used

Purpose: To identify a party by type of organization, name, and code

## Syntax Rules:

- 1. R0203 At least one of N102 or N103 is required.
- 2. P0304 If either N103 or N104 is present, then the other is required.

#### Comments:

- 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
- 2. N105 and N106 further define the type of entity in N101.

## **DLMS Note:**

- 1. Must use this N1 loop to identify the organization originating the transaction set
- 2. Use additional iterations to identify other organizations associated with the transaction.
- 3. Use in every transaction set to identify the organization to receive the transaction set.
- 4. Two occurrences are required in every contract completion status transaction set.

5. DAAS/GEX will forward an image (copy) of all 567C contract closeout transactions to EDA regardless of the originating system or method of closeout.

Purpose: To provide information about a contract

## Syntax Rules:

1. P0405 - If either CS04 or CS05 is present, then the other is required.

## Semantics:

- 1. CS09 is the permissible overage as a percentage of the total contract line item number (CLIN) quantity.
- 2. CS10 is the permissible shortage as a percentage of the total contract line item number (CLIN) quantity.
- 3. CS11 is the permissible overage dollar value specified by the contract above which discrepancy action is taken.
- 4. CS14 is the Unit of Measure stipulated in the contract.
- 5. CS15 is the contract line item number (CLIN) unit price specified in the contract.
- CS17 conveys the Critical Application Indicator. A "Y" indicates that a Critical Application Indicator is specified in the contract; an "N" indicates that no Critical Application Indicator is specified in the contract.
- 7. CS18 conveys the Special Requirements Indicator. A "Y" indicates that a Special Requirements Indicator (requiring special testing and or evaluation) is specified in the contract; an "N" indicates that no Special Requirements Indicator is specified in the contract.

#### Comments:

- 1. CS04 may be used to identify the Contract Line Item Number (CLIN) or Extended (or Exhibit) Line Item Number (ELIN).
- 2. CS07 and CS13 can be used to indicate two different types of special services required.

## **DLMS Note:**

1. Use this segment to identify the procurement instrument identifier (PIID) and, if applicable, the modification number; the call/order number.

2. There can only be one occurrence of this loop.

Ref	<u>ld</u>	Element Name	Req	<u>Type</u>	<u>Min/Max</u>	Usage	Rep
CS01	367	Contract Number	0	AN	1/30	Used	1
		Description: Contract number					
		<b>DLMS Note:</b> Use to identify the PIID of the procurement instrument being reported. Use the legacy procurement instrument identification number (PIIN) pending transition to the PIID. When procurement is authorized under a PIID call/order number (F in 9th position), provide the value in the PIID field. For Other Transaction (OT) agreements, the type of instrument (9th position of PIID) will be a 3 for Research OTs or 9 for Prototype and Production OTs. Refer to ADC 1161A or ADC 1420.					
CS02	327	Change Order Sequence Number	0	AN	1/8	Used	1
		<b>Description:</b> Number assigned by the orderer identifying a specific change or revision to a previously transmitted transaction set					
		<b>DLMS Note:</b> Use to identify a modification number to the cited procurement instrument. This is the Supplementary Procurement Instrument Identifier (Supplementary PIID). Refer to ADC 1161A or ADC 1420.					

DLMS Implementation Convention (IC) 567C DLMS Contract Completion Statement/ Unclosed Contract Status/Contract Close-out

# **NTE** Note/Special Instruction

Pos: 090 Max: 5 Heading - Optional Loop: CS Elements: 1

#### User Option (Usage): Used

Purpose: To transmit information in a free-form format, if necessary, for comment or special instruction

## **Comments:**

1. The NTE segment permits free-form information/data which, under ANSI X12 standard implementations, is not machine processable. The use of the NTE segment should therefore be avoided, if at all possible, in an automated environment.

#### **DLMS Note:**

Use this segment one or more times to provide text information applicable to a Final Acceptance Date or a Reason for Delay.

#### **Element Summary:**

<u>Ref</u>	ld	Element Name	<u>Req</u>	Туре	<u>Min/Max</u>	Usage	<u>Rep</u>

# N1 Name

Pos: 120 Max: 1 Heading - Optional Loop: N1 Elements: 3

#### User Option (Usage): Used

**Purpose:** To identify a party by type of organization, name, and code

### Syntax Rules:

- 1. R0203 At least one of N102 or N103 is required.
- 2. P0304 If either N103 or N104 is present, then the other is required.

#### Comments:

- 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
- 2. N105 and N106 further define the type of entity in N101.

### **DLMS Note:**

1. Use this loop in 1/CS/050 loops to identify the disbursing officer in contract completion statement transactions, when final payment has been made and when 1/LQ/110 cites either code F or J. Must use 1/N9/070 to identify the final payment voucher number.

2. Use one iteration of the 1/N1/120 loop to identify the contractor in CAO contract closeout extension status transactions, when 1/LQ/110 includes a reason for delayed closing of contract file code.

3. Must use the 1/N1/120 loop when CS05 cites code C and the 1/LQ/110 segment cites TSI code F.

4. Do not use the 1/N1/120 loop in cancellations.
