Functional Group=RC

Purpose: This Draft Standard for Trial Use contains the format and establishes the data contents of the Receiving Advice/Acceptance Certificate Transaction Set (861) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for customary and established business and industry practice relative to the notification of receipt or formal acceptance of goods and services.

DLMS Note:

1. Receiving activities use this transaction set to report the acceptance of materiel at destination.

a. DoD, Federal and Civil Agency users operating under the Defense Logistics Management Standards (DLMS) must reference the Unit of Issue and Purchase Unit Conversion Table available at URL: www.dla.mil/does/DLM

b. This transaction may be used to record source inspection information separately or in combination with acceptance report information and external acceptance at the "box" level or at the consolidated shipment level.

c. This transaction may be used to provide item unique identification (IUID) information in accordance with DLMS procedures and OSD Supply Policy. Refer to the item unique identification (IUID) web at URL: <http://www.acq.osd.mil/dpap/pdi/iuid/> for DoD policy

2. This Implementation (IC) incorporates the Proposed DLMS Change (PDC) and Approved DLMS Change (ADC) listed. PDCs/ADCs are available from the Defense Enterprise Data Standards Office (DEDSO) Web site: https://www.dla.mil/HQ/InformationOperations/DLMS/elibrary/Transformats/140_997/

MAN Marks and Numbers

Pos: 180

Max: >1

Detail - Optional

Loop: RCD

Elements: 6

User Option (Usage): Used

Purpose: To indicate identifying marks and numbers for shipping containers

- Syntax Rules:
- C0605 - If MAN06 is present, then MAN05 is required.
 - P0405 - If either MAN04 or MAN05 is present, then the other is required.

- Semantics:
- MAN01/MAN02 and MAN04/MAN05 may be used to identify two different marks and numbers assigned to the same physical container.
 - When both MAN02 and MAN03 are used, MAN02 is the starting number of a sequential range and MAN03 is the ending number of that range.
 - When both MAN05 and MAN06 are used, MAN05 is the starting number of a sequential range, and MAN06 is the ending number of that range.

- Comments:
- When MAN01 contains code "UC" (U.P.C. Shipping Container Code) and MAN05/MAN06 contain a range of ID numbers, MAN03 is not used. The reason for this is that the U.P.C. Shipping Container code is the same on every carton that is represented in the range in MAN05/MAN06.
 - MAN03 and/or MAN06 are only used when sending a range(s) of ID numbers.
 - When both MAN02/MAN03 and MAN05/MAN06 are used to send ranges of ID numbers, the integrity of the two ID numbers must be maintained.

DLMS Note:

For initial implementation, IUID information will be provided only when partial acceptance occurs. The UII will be provided for those items which were accepted.

Element Summary:

Ref	Id	Element Name	Req	Type	Min/Max	Usage
MAN01	88	Marks and Numbers Qualifier	M	ID	1/2	Must use
<p>Description: Code specifying the application or source of Marks and Numbers (87)</p> <p>Code Name</p> <p>ZZ Mutually Defined</p> <p>DLMS Note:</p> <p>1. Use to identify the Unique Item Identifier (UII) for each item. If the UII exceeds 48 characters, carry over the additional characters to MAN03. When MAN01 is ZZ, MAN03 may only be used as a continuation of the UII entered in MAN02.</p> <p>2. The UII may not exceed 50 characters in accordance with IUID Policy.</p>

DLMS Note:
1. Use to identify the serial number associated with the identified Ull in MAN05. When a batch, lot, or other type of production run number is included in the Ull for uniqueness, this number will be cited in MAN06.
2. Future enhancement; not used for initial implementation.
