846 Inventory Inquiry/Advice

Purpose: This Draft Standard for Trial Use contains the format and establishes the data contents of the Inventory Inquiry/Advice Transaction Set (846) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used in the following ways: (1) for a seller of goods and services to provide inventory information to a prospective purchaser, with no obligation to the purchaser to acquire these goods or services; (2) for a representative of a seller of goods and services to supply inventory information to that seller; (3) for one location to supply another location with inventory information; and (4) for an inquiry as to the availability of inventory with no obligation on the seller of goods and services to reserve that inventory.

Federal Note:

1. Distribution centers and storage activities use this transaction set to transmit location reconciliation transactions to owners and managers.

2. Use one occurrence of this transaction set to transmit a single or multiple transactions.

3. DoD logistics users should refer to the Defense Logistics Management Standards (DLMS) Implementation Convention (IC) available at URL: www.dla.mil/does/DLMS. The DLMS IC provides specific business rules, conditions, and authorized codes necessary for appropriate use of this IC within the DLMS.

DLMS Note:

1. Distribution centers and storage activities use a single occurrence of this transaction set to transmit either location reconciliation request, location reconciliation notification, or location reconciliation history notification transactions to one owner/manager. This transaction encompasses the functionality of MILSTRAP Document Identifier Codes (DIC) DZH, DZN, DZP and NAVSUP P-724 BG1/BG2 serial/lot number reporting transactions.

2. Legacy MILSTRAP functionality allows for Service and Agency data in various RP(s). Data Conveyed therein will require Service or Agency identification to Enterprise Business Standards Office (EBSO) and incorporation into the DLMS.

3. Users operating under the Defense Logistics Management Standards (DLMS) must reference the Unit of Issue and Purchase Unit Conversion Table which can be found on the EBSO Web site at wwww.dla.mil/does/DLMS.

4. This DLMS Implementation Convention (IC) contains:

a. Data associated with a DLMS enhancement which may not be received or understood by the recipient's automated processing system. DLMS procedures may not have been developed. Components must coordinate requirements and business rules with EBSO prior to use.

b. Data associated with an Approved Change which may not have an established implementation date. This data may not be received or understood by the recipient's automated processing system. Components must coordinate implementation with EBSO prior to use.

c. Defense Logistics Standard System (DLSS) data which must be retained in the DLMS for a transition period to support transaction conversion in a mixed DLSS/DLMS environment. This data will be streamlined out once full DLMS implementation is reached. Components may coordinate with EBSO for early termination (or retention) of specific data requirements for users operating in a full DLMS environment.

d. Data elements which have an expanded files size above existing DLSS capability which may not be supported by the recipient's automated processing system. Components must coordinate implementation with EBSO prior to use.

e. Data required to accommodate Component- unique transaction requirements (e.g., B-series transactions). Data does not apply to legacy MILSTRAP transactions.

f. Data associated with a DLMS enhancement authorized for implementation by modernized systems under DLMS migration. This data (including expanded field sizes) should be adopted during, or subsequent to, modernization when applicable to the Component's business process. Prior coordination is not required. Components should ensure that inclusion of this data in a DLMS transaction does not cause inappropriate rejection of the transaction.

5. This transaction may be used on a limited scope to provide item unique identification (IUID) information in accordance with DLMS procedures and OSD Supply Policy. Loop ID REF (2/REF/390) documents the authorized uses of unique item identifier (UII) and serial number. For all other purposes, IUID information is a placeholder for DLMS enhancements pending development of DLMS procedures and overarching OSD Supply Policy. Refer to the IUID web at URL: http://www.acq.osd.mil/dpap/pdi/uid/ for DoD policy.

6. This DLMS IC incorporates the Proposed DLMS Change and Approved DLMS Change (ADC) listed. PDC/ADCs are available from the EBSO Web site: http://www.dla.mil/HQ/InformationOperations/DLMS/eLibrary/Changes/processchanges/

- ADC 45, Use of Both Ownership Code and Purpose Code in DLMS for Ammunition
- ADC 77, Air Force Unique Management Coding for Materiel Management Aggregation Code (MMAC)

- ADC 136, Revision to DLMS Supplement (DS) 846R Location Reconciliation Request to Support Commodity-Unique (Mapping Product) Data and to Support MILSTRAP DZN/DZP functionality

- ADC 204, Revision to DS 846P and 846R to Support Requirements for Army Medical Material Agreement Inventory Records Management

DLMS Implementation Convention (IC) 846R, Location Reconciliation Request

Process (Supply)

- ADC 212, Revise DS 846R Location Reconciliation Request to Accommodate MILSTRAP DZH Consecutive Transaction Number

- ADC 230, Administrative Updates to DLMS Supplement (DS) 846R, Location Reconciliation Request (Supply)

- ADC 283, Migrate Navy Serial Number and Lot Number Transactions (NAVSUP P-724 BG1/BG2) to DLMS 846R Location Reconciliation Request.

- ADC 295, Use of DLMS Qualifier for Local Stock Number/Management Control Numbers

- ADC 307, Administrative Update to DLMS, Volume 2, Chapter 6, Physical Inventory Control and DLMS Supplements (DS) 846P, 846R, and 888I (Supply/MILSTRAP)

- Withdrawal of Approved MILSTRAP/MILSTRIP Change Letter (AMCL) 5 and 13, Date Packed/Expiration for Subsistence Items (Staffed by PMCLs 3) (Supply/MILSTRIP/MILSTRAP)

- ADC 381, Procedures and Additional Data Content supporting Requisitions, Requisition Alerts, and Unit of Use Requirements under Navy BRAC SS&D/IMSP

- Approved Addendum ADC 381A, Procedures and Additional Data Content supporting Unit of Use Requirements under Marine Corps BRAC Storage and Distribution

- ADC 436, Administrative Revisions to DLMS Supplements to Remove Obsolete Routing Identifier Code (RIC) "Streamline" Notes and Update MILSTRIP/DLMS Documentation Associated with Routing Identifiers

- ADC 441, Exception Rules to Accommodate Communication of Ammunition/Ammunition Related Quantities in Excess of Five Digits (Supply/MILSTRIP/ MILSTRAP) (Supply)

- ADC 445, Adopt Navy Serial Number and Lot Number Transactions (NAVSUP P-724 BG1/BG2) to Air Force and Marine Corps Ammunition System Use for DLMS 527R Receipt, 846R Location Reconciliation Request, 867I Issue, and 947I Inventory Adjustment (Supply)

- ADC 470, Revise DLMS Supplement (DS) 846R, Location Reconciliation Request in Support of Reutilization Business Integration (RBI) (Supply)

- ADC 1013, Intra-DLA Change: Disposal Turn In Document (DTID) Number Suffixing for DLMS 846C and 846R for use by DLA Disposition Services Under Reutilization Business Integration (RBI) (Supply)

- ADC 1019, Small Arms/Light Weapons (SA/LW) Local Stock Number (LSN) Assignment for use by DLA Disposition Services in DLMS 527R, 846C, 846R, and 947I, under RBI (Supply)

- Organizational Name and Other Non-Substantive (Administrative) Updates Completed on October 03, 2014.

- ADC 1043C, Administrative Corrections for SLOA Data in the 810L Logistics Bill and other DLMS ICs

- ADC 1136, Revise Unique Item Tracking (UIT) Procedures to support DODM 4140.01 UIT Policy and Clarify Requirements (Supply)

- ADC 1198, Establishing Visibility of Capital Equipment for Service Owned Assets Stored at DLA Distribution Centers

- Administrative Update to Reflect Realignment to Recognize DLMS Program Office Completed on November 28, 2016

- ADC 1224, Requirements for Air Force Government Furnished Property (GFP) Accountability including Identification of the Contractor Inventory Control Point (CICP), the Physical Location of Property, the Authorizing Procurement Instrument Identifier (PIID), Disposal Information in the Issue Transaction, and Enhanced Data Content in Inventory-Related Transactions

- ADC 1224A, Requirements for Air Force Government Furnished Property (GFP) Accountability including Identification of the Contractor Inventory Control Point (CICP), the Physical Location of Property, the Authorizing Procurement Instrument Identifier (PIID), Disposal Information in the Issue Transaction, and Enhanced Data Content in Inventory-Related Transactions

- ADC 1228, Revise DLMS 846P Physical Inventory Request and 846R Location Reconciliation Request to Enhance End of Day/Reconciliation Process

- ADC 1230, Revise Balance Affecting Transactions to Authorize Air Force Contractor Inventory Control Points (CICP) use of Batch Number, Serial Number, and Unique Item Identifier (UII) for Air Force Government Furnished Property (GFP) Accountability (GFP-A) (Supply/Finance)

- ADC 1244, Establishing Visibility of Unique Item Tracking (UIT) Program Items for Service-Owned Assets Stored at DLA Distribution Centers and Corresponding Revisions to Inventory Procedures Related to Capital Equipment

- ADC 1287, DLMS Implementation Convention (IC) Revisions for Data Element Mapping (Form Stock Number and Manufacturer's Part Number), Removal of Plant Equipment Number, and Administrative Updates

- ADC 1318, Revise DLMS IC 846R Location Reconciliation Request Transaction to Add Project Code in Army Total Package Fielding (TPF) Assets by Unit Materiel Fielding Points (UMFP)

- Administrative Update to Reflect Realignment of DLMS Program Office to Enterprise Business Standards Office (EBSO) - Completed on November 13, 2018

Notes:

2/390L The REF loop conveys serial number, lot number, and inventory data.

2/390 The REF loop conveys serial number, lot number, and inventory data.

3/010 Number of line items (CTT01) is the accumulation of number of LIN segments. If used, hash total (CTT02) is the sum of the values of the quantities (QTY02) of each QTY segment.

ST Transaction Set Header

Pos: 010	Max: 1
Heading - M	landatory
Loop: N/A	Elements: 2

User Option (Usage): Must use

Purpose: To indicate the start of a transaction set and to assign a control number

Semantics:

- 1. The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the Invoice Transaction Set).
- 2. The transaction set identifier (ST01) used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the Invoice Transaction Set).

<u>F</u>	Ref	<u>ld</u>	Element Name	Req	Type	<u>Min/Max</u>	<u>Usage</u>	<u>Rep</u>

		Federal Note: Use any code.					
		DLMS Note: 1. Use to identify the type of location reconciliation.					
		2. For DLMS, only the following codes are authorized.					
		Code Name Z Mutually Defined					
		DLMS Note: 1. Use to identify that the transaction	on identified	in BIA02 is	s associated with	h end-of-day process	sing.
		2. An ANSI data maintenance was Day Processing".	approved in	version 50	30. The approv	/ed code/name is "E	O-End of
		24 On-Hold					
		DLMS Note:					

1. Use to identify that the transaction identified in BIA02 is associated with annual location

Code Name

reconciliation.

2. An ANSI data maintenance was approved in version 5030. The approved code/name is "AN-Annual Location Reconciliation".

N1 Name

Pos: 080	Max: 1
Heading	- Optional
Loop: N1	Elements: 4

User Option (Usage): Used

Purpose: To identify a party by type of organization, name, and code

Syntax Rules:

- 1. P0304 If either N103 or N104 is present, then the other is required.
- 2. R0203 At least one of N102 or N103 is required.

Comments:

- 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
- 2. N105 and N106 further define the type of entity in N101.
- 3. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
- 4. N105 and N106 further define the type of entity in N101.

DLMS Note:

1. Must use this 1/N1/080 loop to identify the organization originating and receiving the transaction set.

2. Must use at least one iteration of this N1 segment to identify the organization to receive the transaction (N106 code TO with appropriate N101 code). May use additional iterations to identify other organizations associated with the transaction.

LIN Item Identification

Pos: 010	Max: 1
Detail - N	landatory
Loop: LIN	Elements: 5

User Option (Usage): Must use

Purpose: To specify basic item identification data

Syntax Rules:

- 1. P0405 If either LIN04 or LIN05 is present, then the other is required.
- 2. P0607 If either LIN06 or LIN07 is present, then the other is required.
- 3. P0809 If either LIN08 or LIN09 is present, then the other is required.
- 4. P1011 If either LIN10 or LIN11 is present, then the other is required.
- 5. P1213 If either LIN12 or LIN13 is present, then the other is required.
- 6. P1415 If either LIN14 or LIN15 is present, then the other is required.
- 7. P1617 If either LIN16 or LIN17 is present, then the other is required.
- 8. P1819 If either LIN18 or LIN19 is present, then the other is required.
- 9. P2021 If either LIN20 or LIN21 is present, then the other is required.
- 10. P2223 If either LIN22 or LIN23 is present, then the other is required.
- 11. P2425 If either LIN24 or LIN25 is present, then the other is required.
- 12. P2627 If either LIN26 or LIN27 is present, then the other is required.
- 13. P2829 If either LIN28 or LIN29 is present, then the other is required.
- 14. P3031 If either LIN30 or LIN31 is present, then the other is required.

Semantics:

- 1. LIN01 is the line item identification
- 2. LIN01 is the line item identification

Comments:

- 1. See the Data Dictionary for a complete list of IDs.
- 2. LIN02 through LIN31 provide for fifteen different product/service IDs for each item. For example: Case, Color, Drawing No., U.P.C. No., ISBN No., Model No., or SKU.
- 3. See the Data Dictionary for a complete list of IDs.
- 4. LIN02 through LIN31 provide for fifteen different product/service IDs for each item. For example: Case, Color, Drawing No., U.P.C. No., ISBN No., Model No., or SKU.

Federal Note:

Must use the 2/LIN/010 loop to identify the materiel, transaction number, and inventory information associated with the transaction.

<u>Ref</u>	ld	Element Name	Req	Туре	<u>Min/Max</u>	<u>Usage</u>	<u>Rep</u>
LIN01	350	Assigned Identification	0	AN	1/20	Used	1
		Description: Alphanumeric characters assigned for differentiation within a transaction set					
		Federal Note: Use to identify the count of location reconciliation transactions. In the first 2/LIN/010 loop iteration, cite the numeric 1. In each subsequent loop iteration, increase incrementally by one.					
LIN02	235	Product/Service ID Qualifier	М	ID	2/2	Must use	1
		Description: Code identifying the type/source of the descriptive number used in Product/Service ID (234)					
		Federal Note: Use any code.					
	DLMS Note: 1. For 1/BIA02/020 code LC,						

DLMS Implementation Convention (IC) 846R, Location Reconciliation Request

<u>Ref</u> lc	<u>ld</u>	use of MG, S of inve Numb approp are ide Identif mainte identif Matern Numb 2. For	ent Name hly one of codes A2, A3, A4, FB, FS, SW, YP, ZR or ZZ to identify the item entory. Must use National Stock er (NSN) when known except when briate brand name subsistence items entified by the subsistence fication Number or when enance/industrial activity materiel is ied by Local Stock Number or ial Control Tracking (MCT) Tag er. 1/BIA02/020 codes X4 and ZZ, only N02 code ZZ.	<u>Req</u>	<u>Type</u>	<u>Min/Max</u>	<u>Usage</u>	<u>Rep</u>	
		3. For	DLMS use only the following codes uthorized.						
		Code	Name						
		<u>Coue</u> A2	Department of Defense Identification Co	ode (DoD					
		72	DLMS Note:		10)				
			1. Use to identify ammunition items.						
			2. DLMS enhancement. See introduct	tory DLM	S note 4a.				
		A3	Locally Assigned Control Number						
			DLMS Note:						
			1. Defense Medical Logistics Standard (TEWLS) use to cite their Local Catalo numbers for a specific site.						
			2. DLMS enhancement. See introductory DLMS note 4a.						
		A4	Subsistence Identification Number						
			DLMS Note:						
			Use to identify subsistence items.						
		F4	Series Identifier						
			DLMS Note:						
			1. Use to identify the manufacturer's s	eries nun	nber of the e	end item.			
			2. DLMS enhancement. See introduct	tory DLM	S note 4a.				
		FB	Form Number						
			DLMS Note:						
			1. Use to identify the form stock numb	er.					
			2. DLMS enhancement. See introduct	torv DLM	S note 4a.				
		FS	National Stock Number						
		MG	Manufacturer's Part Number						
			DLMS Note:						
			Use to identify nonstandard materiel.						
		MN	Model Number						
			DLMS Note:						
			1. Use to identify the manufacturer's n	nodel nun	nber of the e	end item.			
			2. DLMS enhancement. See introduct	tory DLM	S note 4a.				
		SN	Serial Number						
			DLMS Note:						
			1. Use to identify the manufacturer's s	erial num	ber of the e	nd item.			
			2. DLMS enhancement. See introduct	tory DLM	S note 4a.				
		SW	Stock Number						

DLMS Note:

Code Name

1. Use to identify the local stock number (LSN).

2. When used for a unit of use LSN applicable to NSN materiel, the applicable NSN will be included for cross-reference.

3. When used for a unit of use LSN applicable to part numbered items, the original part-numbered item LSN will also be included for cross-reference.

4. Authorized DLMS enhancement under DLA industrial activity support agreement. Refer to ADC 381/Approved Addendum 381A.

YP Publication Number

DLMS Note:

- 1. Use to identify the publication stock number.
- 2. DLMS enhancement, see DLMS introductory note 4a.
- ZR Service Control Identification

DLMS Note:

Use to identify Materiel Control Tracking (MCT) tag number. The MCT tag number is an authorized DLMS enhancement under DLA industrial activity support agreement. Refer to ADC 381.

ZZ Mutually Defined

DLMS Note:

1. For 1/BIA02/20 code LC (Location Reconciliation Request), use to identify nonstandard materiel when all other authorized codes do not apply or cannot be determined (includes management control numbers and locally assigned control numbers). May be used for DLSS-to-DLMS conversion when the translator cannot determine a more appropriate code.

2. For Location Reconciliation Request transactions, use when a management control number (MCN) is provided. This includes the MCN assigned by the DoD small arms/light weapons (SA/LW) Registry for the DoD SA/LW Serialization Program, IAW DLM 4000.25, DLMS, Volume 2.

3. For 1/BIA02/20 codes X4 (Location Reconciliation Notification) and ZZ (Location Reconciliation History Notification), must use to comply with ANSI syntax requirements. Indicate ZZ in LIN03.

LIN03	234	Product/Service ID	М	AN	1/48	Must use	1
		Description: Identifying number for a product or service					
LIN04	235	Product/Service ID Qualifier	Х	ID	2/2	Used	1

Description: Code identifying the type/source of the descriptive number used in Product/Service ID (234)

Code Name

FS

National Stock Number

DLMS Note:

1. Use to identify the NSN.

2. The NSN is provided as a cross-reference when unit of use indicator is included and the Local Stock Number (LSN) is identified as the primary materiel identification. Authorized DLMS enhancement under DLA industrial activity support agreement.

SW Stock Number

DLMS Note:

1. Use to identify the local stock number (LSN).

2. The LSN is provided as a cross-reference when unit of use indicator is included and the unit of use LSN is identified as the primary materiel identification. Authorized DLMS enhancement under DLA industrial activity support agreement.

3. DLA Disposition Services uses with Location Reconciliation Request transactions, for confiscated or captured foreign weapons, to identify the disposition LSN in addition to the SA/LW MCN cited in LIN02/LIN03 by qualifier ZZ. Authorized DLMS enhancement for DLA Disposition Services. DLA Disposition Services requires the disposition LSN for internal DLA processing only. Refer to ADC 1019.

			DLMS Note:						

Code Name

Use to identify the Materiel Management Aggregation Code (MMAC) for NSNs to be managed by a specific manager (i.e., system, program, aggregation, selected FSC, technology group). This is an Air Force-unique data element, meaningful to the Air Force only. Non-Air Force Components perpetuate without action.

A data maintenance action was approved in version 5010. The approved code/name is "MAC – Material Management Aggregation Code". The code source is identified as the Air Force Manual (AFMAN) 23-110, Volumes 1 and 2.

COG Cognizance Symbol

DLMS Note:

Use to identify the material cognizance symbol (COG) of the end item. Indicate NSL for non-stock numbered listed items. This is a Navy-unique data element meaningful to Navy only; Non-Navy Components are to perpetuate without action.

IMC Item Management Code

DLMS Note:

Use to identify the Item Management Code (IMC) for integrated material management. This is a Navy-unique data element meaningful to Navy only; Non-Navy Components are to perpetuate without action.

MCC Material Control Code

DLMS Note:

Use to identify the Material Control Code (MCC) for special inventory reporting. This is a Navy-unique data element meaningful to Navy only; Non-Navy Components are to perpetuate without action.

SMI Special Material Identification Code

DLMS Note:

Use to identify the Special Material Identification Code (SMIC) for an end item. This is a Navy-unique data element meaningful to Navy only; Non-Navy Components are to perpetuate without action.

LQ02 1271 Industry Code X AN 1/30 Used 1

Description: Code indicating a code from a specific industry code list

LS Loop Header

Pos: 380	Max: 1
Detail -	Optional
Loop: LS	Elements: 1

User Option (Usage): Used

Purpose: To indicate that the next segment begins a loop

Semantics:

- One loop may be nested contained within another loop, provided the inner nested loop terminates before the outer loop. When specified by the standard setting body as mandatory, this segment in combination with "LE", must be used. It is not to be used if not specifically set forth for use. The loop identifier in the loop header and trailer must be identical. The value for the identifier is the loop ID of the required loop segment. The loop ID number is given on the transaction set diagram in the appropriate ASC X12 version/release.
- 2. One loop may be nested contained within another loop, provided the inner nested loop terminates before the outer loop. When specified by the standard setting body as mandatory, this segment in combination with "LE", must be used. It is not to be used if not specifically set forth for use. The loop identifier in the loop header and trailer must be identical. The value for the identifier is the loop ID of the required loop segment. The loop ID number is given on the transaction set diagram in the appropriate ASC X12 version/release.

Comments:

- 1. See Figures Appendix for an explanation of the use of the LS and LE segments.
- 2. See Figures Appendix for an explanation of the use of the LS and LE segments.

Federal Note:

Use as needed in each 2/QTY/320 loop to prevent a syntax error in the use of the 2/REF/390 loop.

<u>Ref</u>	<u>ld</u>	Element Name	Req	Туре	<u>Min/Max</u>	<u>Usage</u>	<u>Rep</u>
LS01	447	Loop Identifier Code	Μ	AN	1/6	Must use	1
		Description: The loop ID number given on the transaction set diagram is the value for this data element in segments LS and LE	for				
		Federal Note: Cite REF to indicate the 2/REF/390 loop.					

REF Reference Identification

Pos: 390	Max: 1
Detail -	Optional
Loop: REF	Elements: 4

User Option (Usage): Used

Purpose: To specify identifying information

Syntax Rules:

1. R0203 - At least one of REF02 or REF03 is required.

Semantics:

- 1. REF04 contains data relating to the value cited in REF02.
- 2. REF04 contains data relating to the value cited in REF02.

DLMS Note:

1. The entire 2/REF/390 loop is an authorized DLMS enhancement for use to provide item unique identification (IUID) serialized data as noted below for specific implementations; see introductory DLMS note 4f. For all other applications, see introductory DLMS note 4a.

2. This transaction will support item identification based upon serial number/unique item identifier (UII) also provides for use of a batch/lot number when applicable. Must use 2/REF/390 loop in location reconciliation request transactions when authorized for including UII, serial number, and/or batch/lot number.

3. Repeat the 2/REF/390 loop for each item to be identified by UII, serial number or batch/lot number. If UII and serial number, and/or batch/lot number are required for the item, enter the UII in REF01, and enter the serial number and/or batch/lot number in REF04. If UII is not used, enter the serial number in REF01 and enter the batch/lot number in REF04. If only batch/lot number is required, enter the batch/lot number in REF01.

4. Authorized for use with location reconciliation request transactions to support Service Ammunition systems (i.e., Naval Operational Logistics Support Center (NOLSC) Ordnance Information System – Wholesale (OIS-W) requirement; Program Manager for Ammunition, Marine Corps Systems Command (MARCORSYSCOM) Ordnance Information System-Marine Corps (OIS-M); and Warner Robins Air Logistics Center Combat Ammunition System (CAS). See introductory DLMS notes 4a and 4e. Refer to ADC 283 and ADC 445.

5. Authorized in support of Financial Improvement and Audit Readiness (FIAR) compliance for capital equipment. Capital candidates require serialization data visibility. Prepare location reconciliation request transactions with the serial number as mandatory and when available, include the UII. Refer to ADC 1198.

6. Authorized under DOD IUID policy for UIT programs. UIT programs require serialization data visibility. For all UIT programs with the exception of SA/LW, prepare the location reconciliation request with the serial number and when available, include the UII. For SA/LW, refer to the separate program procedures pending transition to DLMS logistics transactions. Refer to ADC 1244.

7. Authorized for the reporting of Air Force GFP accountability of serially tracked assets between the Air Force CICP and Air Force APSR systems. Authorized for use with serial number, UII, and batch/lot number. Refer to ADC 1230.

8. Supports Inter-Service Ammunition BG1/BG2 data requirement. See introductory DLMS note 4e. When the serial number is used in REF01 with Ammunition BG1/BG2 transactions, this qualifier implies that the transaction is a BG1 (Serial Number or Lot and Serial Number Controlled Item Transaction). When the batch number is used in REF01 with Ammunition BG1/BG2 transactions, this qualifier implies that the transaction is a BG2 (Lot Number Controlled Item Transaction). In a mixed DLSS/DLMS environment, UII is not used in Ammunition BG1/BG2 transactions. Only authorized values for Ammunition BG1/BG2 are BT and SE, used at REF01 and REF04-01. Refer to ADC 283 and ADC 445.

P

DTM Date/Time Reference

os: 400	Max: >1
Detail - C	Optional
oon: RFF	Elements: 2

User Option (Usage): Used

Purpose: To specify pertinent dates and times

Syntax Rules:

- 1. C0403 If DTM04 is present, then DTM03 is required.
- 2. P0506 If either DTM05 or DTM06 is present, then the other is required.
- 3. R020305 At least one of DTM02, DTM03 or DTM05 is required.

DLMS Note:

Use multiple repetitions as needed to identify dates related to data represented 2/REF/390.

Element Summary:

<u> </u>	Ref	<u>ld</u>	<u>Eleme</u>	nt Name	<u>Req</u>	Type	<u>Min/Max</u>	<u>Usage</u>	<u>Rep</u>

CCYYMMDD

Pos: 410	Max: 1
Detail - C	Optional
Loop: REF	Elements: 3

User Option (Usage): Used

Purpose: To identify a party by type of organization, name, and code

Syntax Rules:

- 1. P0304 If either N103 or N104 is present, then the other is required.
- 2. R0203 At least one of N102 or N103 is required.

Comments:

- 1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
- 2. N105 and N106 further define the type of entity in N101.

DLMS Note:

Use to identify the manufacturer of the UIT item.

<u>Ref</u> N101	<u>Id</u> 98	<u>Element Name</u> Entity Identifier Code	<u>Req</u> M	<u>Type</u> ID	<u>Min/Max</u> 2/3	<u>Usage</u> Must use	<u>Rер</u> 1

LE Loop Trailer

Pos: 440	Max: 1			
Detail - Mandatory				
Loop: LS	Elements: 1			

User Option (Usage): Must use

Purpose: To indicate that the loop immediately preceding this segment is complete

Semantics:

- One loop may be nested contained within another loop, provided the inner nested loop terminates before the other loop. When specified by the standards setting body as mandatory, this segment in combination with "LS", must be used. It is not to be used if not specifically set forth for use. The loop identifier in the loop header and trailer must be identical. The value for the identifier is the loop ID of the required loop beginning segment. The loop ID number is given on the transaction set diagram in the appropriate ASC X12 version/release.
- 2. One loop may be nested contained within another loop, provided the inner nested loop terminates before the other loop. When specified by the standards setting body as mandatory, this segment in combination with "LS", must be used. It is not to be used if not specifically set forth for use. The loop identifier in the loop header and trailer must be identical. The value for the identifier is the loop ID of the required loop beginning segment. The loop ID number is given on the transaction set diagram in the appropriate ASC X12 version/release.

Comments:

- 1. See Figures Appendix for an explanation of the use of the LE and LS segments.
- 2. See Figures Appendix for an explanation of the use of the LE and LS segments.

Federal Note:

Use in each 2/QTY/320 loop to terminate any 2/REF/390 loop iterations.

<u>Ref</u>	<u>ld</u>	Element Name	<u>Req</u>	Type	<u>Min/Max</u>	<u>Usage</u>	<u>Rep</u>
LE01	447	Loop Identifier Code	Μ	AN	1/6	Must use	1
		Description: The loop ID number given on the transaction set diagram is the value for this data element in segments LS and LE					
		Federal Note: Repeat the content of 2/LS/380					

SE Transaction Set Trailer

Pos: 020	Max: 1			
Summary - Mandatory				
Loop: N/A	Elements: 2			

User Option (Usage): Must use

Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments)

Comments:

1. SE is the last segment of each transaction set.

<u>Ref</u>	<u>ld</u>	Element Name	Req	Type	<u>Min/Max</u>	<u>Usage</u>	<u>Rep</u>
SE01	96	Number of Included Segments	М	N0	1/10	Must use	1
		Description: Total number of segments included in a transaction set including ST and SE segments					
SE02	329	Transaction Set Control Number	М	AN	4/9	Must use	1
		Description: Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set					
		Federal Note: Cite the same number as the one cited in ST02.
