

841 Specifications/Technical Information

Functional Group=SP

Purpose: This Draft Standard for Trial Use contains the format and establishes the data contents of the Specifications/Technical Information Transaction Set (841) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to transmit or request specifications or technical information between trading partners. It can be used to transmit engineering change and engineering change requests. It can also be used to allow EDI trading partners the ability to exchange a complete or partial technical description of a product, process, service, etc. over the same path as any other EDI transaction. The detail area can include graphic, text, parametric, tabular, image, spectral, or audio data. A transmission includes identification information to assist the receiver in interpreting and utilizing the information included in the transaction. Further action as a consequence of the receipt and initial processing of the specification or other technical data may or may not require human intervention. The transmission and receipt of the data may require private agreement between the trading partners to automate the receipt of the data. The total transaction must be in the general form of all ASC X12 transactions so that an EDI computer system will be able to automatically recognize it as a Specification/Technical Information Transaction Set and pass it on for processing of the data itself. The transaction set is not media dependent. The detail area of the Specification/Technical Information Transaction Set provides a structure which allows for the exchange of a variety of specification information. For example, if the transaction contains information describing a complete assembly, it would be necessary to include the assembly model, the models for each of the individual parts, and the associated specifications. In the case of a process it may be necessary to transmit the specification of the product along with the specifications of the process and raw materials. This transaction set can also be linked to other transaction sets. This transaction set is not limited to a specific transmission protocol and uses other standards as applicable where they do not conflict with these requirements for specification transaction.

DLMS Note:

1. This 841W, Hazardous Material/Hazardous Waste Profile transaction is intended for use by DLA's Distribution Standard System and Component generating systems supporting Disposition Services processing hazardous material/waste for turn-in/disposal to DLA Disposition Services.
2. This transaction will be used to convey the information described in the Generator Communications (GenComm) Interface Standard Version 5.0.0. See DLM 4000.25, Volume 2, Appendix 9.
3. Users operating under the Defense Logistics Management Standards (DLMS) must reference the Unit of Issue and Purchase Unit Conversion Table and Transportation Mode of Shipment Conversion Table, which can be found on the DLMS Program Office Web site at www.dla.mil/j-6/dlms.
4. This entire DLMS Implementation Convention (IC) is considered an authorized DLMS enhancement authorized for implementation by modernized systems under DLMS migration. This transaction should be adopted during, or subsequent, to modernization when applicable to the Component's business process. Prior coordination is not required. Components should ensure that inclusion of this DLMS transaction does not cause inappropriate rejection of the transaction.
5. This DLMS IC incorporates the Proposed DLMS Change and Approved DLMS Change (ADC) listed. PDC/ADCs are available from the DLMS Program Office Web site: <http://www.dla.mil/j-6/dlms/elibrary/Changes/processchanges.asp>.

- ADC 1131, New DLMS Implementation Convention (IC) 841W, Hazardous Material/Hazardous Waste (HM/HW) Profile and New DLMS IC 856W, Hazardous Material/Hazardous Waste Shipment Status

- Administrative Update to Reflect Realignment to Recognize DLMS Program Office Completed on December 29, 2016

Summary:

| <u>Pos</u> | <u>Id</u> | <u>Segment Name</u> | <u>Req</u> | <u>Max Use</u> | <u>Repeat</u> | <u>Notes</u> | <u>Usage</u> |
|------------|-----------|-------------------------|------------|----------------|---------------|--------------|--------------|
| 0100 | SE | Transaction Set Trailer | M | 1 | | | Must use |

Notes:

- 2/0100L To be meaningful, at least one of the SPI, PID, REF, MEA, EFI or CID loops must be present with each occurrence of the HL loop.
- 2/0100 To be meaningful, at least one of the SPI, PID, REF, MEA, EFI or CID loops must be present with each occurrence of the HL loop.
- 2/2010 The sampling sequence specified in the CSS segment will take precedence over any other sampling rate (PSD03, PSD09, SPS06, CSF02, and CSF03) from the point the CSS01 event occurs until the specified sequence is completed.
If no other sampling is specified, then only the sampling indicated in this segment is performed when the CSS01 event occurs.
- 2/2820L The sampling rate specified is the CSF segment. It would take precedence over the normal sampling rate specified in PSD03 while the conditions of the CSF segment are satisfied, but would NOT take precedence over the sampling sequence activated by the proposed CSS segment.
If no other sampling rate is specified, then the only sampling indicated in the CSF segment is performed while the CSF conditions are met. Sampling will cease when the conditions are no longer met.

Hazardous Material/Hazardous Waste Profile

Conditional values specified in DE 740 (Range Minimum) will be interpreted as "greater than or equal to this value." Values specified in DE 741 (Range Maximum) will be interpreted to mean "less than or equal to this value."

- 2/2820 The sampling rate specified is the CSF segment. It would take precedence over the normal sampling rate specified in PSD03 while the conditions of the CSF segment are satisfied, but would NOT take precedence over the sampling sequence activated by the proposed CSS segment.
If no other sampling rate is specified, then the only sampling indicated in the CSF segment is performed while the CSF conditions are met. Sampling will cease when the conditions are no longer met.
Conditional values specified in DE 740 (Range Minimum) will be interpreted as "greater than or equal to this value." Values specified in DE 741 (Range Maximum) will be interpreted to mean "less than or equal to this value."
- 2/2840L Either the MEA segment or the STA segment must occur, but not both.
- 2/2840 Either the MEA segment or the STA segment must occur, but not both.

Comments:

- 2/0330 The PRR segment contains the reason for an engineering change.
- 2/0340 The PRT segment is used to describe what should be done with the parts or assemblies specified in the preceding SPI segment.
- 2/0350 The PRS segment is used to tell the current status of the parts specified in the SPI segment required to make the change.
- 2/0400 The repeated pairs of 234 and 234 data elements in the LIN segment can be used to list where this modified part or assembly is used.
- 2/1700L The CID segment may be used to define either a general class of properties, such as physical properties, or an individual property within a class. The CID loop allows the user the ability to define specifications such as the properties of the item or class, the environmental conditions under which the specifications apply, the test methods to be used, and other parameters related to properties within the current HL hierarchical level.
- 2/1700 The CID segment may be used to define either a general class of properties, such as physical properties, or an individual property within a class. The CID loop allows the user the ability to define specifications such as the properties of the item or class, the environmental conditions under which the specifications apply, the test methods to be used, and other parameters related to properties within the current HL hierarchical level.
- 2/2820L Repetitions of the CSF loop allow several frequency changes (and the conditions that would trigger those changes) to be specified. If the conditions are such that several CSF values are activated at the same time, the value with the highest sampling rate shall prevail.
- 2/2820 Repetitions of the CSF loop allow several frequency changes (and the conditions that would trigger those changes) to be specified. If the conditions are such that several CSF values are activated at the same time, the value with the highest sampling rate shall prevail.
- 2/2840L The CID loop within the CSF loop is used to specify the conditions that will trigger activation of the conditional value in the CSF segment.
Repetitions of the CID loop will have an implied logical AND between the conditions set in each iteration.
- 2/2840 The CID loop within the CSF loop is used to specify the conditions that will trigger activation of the conditional value in the CSF segment.
Repetitions of the CID loop will have an implied logical AND between the conditions set in each iteration.
- 2/2850 The elements of the CID segment identify the conditional property. If the property is a measurement from within the manufacturing process of a plant environment, rather than the product, the segment also identifies the location where the measurements are to be observed.
- 2/2860 If the condition is based on single test measurements, the MEA segment is used to specify the units of measure, and the open or closed numeric range of the conditional test.

ST Transaction Set Header

| | |
|----------------------------|--------------------|
| Pos: 0100 | Max: 1 |
| Heading - Mandatory | |
| Loop: N/A | Elements: 3 |

User Option (Usage): Must use

Purpose: To indicate the start of a transaction set and to assign a control number

Semantics:

1. The transaction set identifier (ST01) is used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the Invoice Transaction Set).
2. The implementation convention reference (ST03) is used by the translation routines of the interchange partners to select the appropriate implementation convention to match the transaction set definition.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|---|------------|-------------|----------------|--------------|------------|
| ST01 | 143 | Transaction Set Identifier Code | M | ID | 3/3 | Must use | 1 |
| | | Description: Code uniquely identifying a Transaction Set | | | | | |
| | | Code Name | | | | | |
| | | 841 Specifications/Technical Information | | | | | |
| ST02 | 329 | Transaction Set Control Number | M | AN | 4/9 | Must use | 1 |
| | | Description: Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set | | | | | |
| ST03 | 1705 | Implementation Convention Reference | O | AN | 1/35 | Used | 1 |
| | | Description: Reference assigned to identify Implementation Convention | | | | | |
| | | DLMS Note: Use to indicate this transmission uses the DLMS IC 841W. Enter the DLMS IC (e.g., 004030F841W0WA00). | | | | | |

SPI Specification Identifier

| | |
|---------------------|-------------|
| Pos: 0200 | Max: 1 |
| Heading - Mandatory | |
| Loop: SPI | Elements: 1 |

User Option (Usage): Must use

Purpose: To provide a description of the included specification or technical data items

Syntax Rules:

1. P0203 - If either SPI02 or SPI03 is present, then the other is required.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|---------------------|------------|-------------|----------------|--------------|------------|
| SPI01 | 786 | Security Level Code | M | ID | 2/2 | Must use | 1 |

Description: Code indicating the level of confidentiality assigned by the sender to the information following

Code Name

ZZ Mutually Defined

DLMS Note:

Use code "ZZ" for this data element to satisfy mandatory X12 syntax requirements.

REF Reference Identification

| | |
|--------------------|-------------|
| Pos: 0900 | Max: 1 |
| Heading - Optional | |
| Loop: REF | Elements: 2 |

User Option (Usage): Used

Purpose: To specify identifying information

Syntax Rules:

1. R0203 - At least one of REF02 or REF03 is required.

Semantics:

1. REF04 contains data relating to the value cited in REF02.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|---|------------|-------------|----------------|--------------|------------|
| REF01 | 128 | Reference Identification Qualifier | M | ID | 2/3 | Must use | 1 |
| | | Description: Code qualifying the Reference Identification | | | | | |
| | | Code Name | | | | | |
| | | V0 Version | | | | | |
| REF02 | 127 | Reference Identification | X | AN | 1/50 | Used | 1 |
| | | Description: Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier | | | | | |
| | | DLMS Note: Use to identify the Generator's Software Release Version Number. Data value restricted to a maximum of 50 characters. | | | | | |

DTM Date/Time Reference

| | |
|--------------------|-------------|
| Pos: 1000 | Max: >1 |
| Heading - Optional | |
| Loop: REF | Elements: 4 |

User Option (Usage): Used

Purpose: To specify pertinent dates and times

Syntax Rules:

1. R020305 - At least one of DTM02, DTM03 or DTM05 is required.
2. C0403 - If DTM04 is present, then DTM03 is required.
3. P0506 - If either DTM05 or DTM06 is present, then the other is required.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|--|-----------|----------------------------|------------|-------------|----------------|--------------|------------|
| DTM01 | 374 | Date/Time Qualifier | M | ID | 3/3 | Must use | 1 |
| Description: Code specifying type of date or time, or both date and time | | | | | | | |
| Code Name | | | | | | | |
| 097 Transaction Creation | | | | | | | |
| DTM02 | 373 | Date | X | DT | 8/8 | Used | 1 |
| Description: Date expressed as CCYYMMDD where CC represents the first two digits of the calendar year | | | | | | | |
| DTM03 | 337 | Time | X | TM | 4/8 | Used | 1 |
| Description: Time expressed in 24-hour clock time as follows: HHMM, or HHMMSS, or HHMMSSD, or HHMMSSDD, where H = hours (00-23), M = minutes (00-59), S = integer seconds (00-59) and DD = decimal seconds; decimal seconds are expressed as follows: D = tenths (0-9) and DD = hundredths (00-99) | | | | | | | |
| DLMS Note: Express time as HHMM. | | | | | | | |
| DTM04 | 623 | Time Code | O | ID | 2/2 | Used | 1 |
| Description: Code identifying the time. In accordance with International Standards Organization standard 8601, time can be specified by a + or - and an indication in hours in relation to Universal Time Coordinate (UTC) time; since + is a restricted character, + and - are substituted by P and M in the codes that follow | | | | | | | |
| Code Name | | | | | | | |
| UT Universal Time Coordinate | | | | | | | |

N1 Name

| | |
|---------------------------|--------------------|
| Pos: 1200 | Max: 1 |
| Heading - Optional | |
| Loop: N1 | Elements: 4 |

User Option (Usage): Used

Purpose: To identify a party by type of organization, name, and code

Syntax Rules:

1. R0203 - At least one of N102 or N103 is required.
2. P0304 - If either N103 or N104 is present, then the other is required.

Comments:

1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
2. N105 and N106 further define the type of entity in N101.

DLMS Note:

Must use this 1/N1/1200 loop to identify the organization originating the transaction set.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|---|------------|-------------|----------------|--------------|------------|
| N101 | 98 | Entity Identifier Code | M | ID | 2/3 | Must use | 1 |
| | | Description: Code identifying an organizational entity, a physical location, property or an individual | | | | | |
| | | Code Name | | | | | |
| | | HZ Hazardous Waste Generator | | | | | |
| | | DLMS Note: | | | | | |
| | | <i>Use to identify the Hazardous Material/Hazardous Waste Generator's File Transfer DoDAAC.</i> | | | | | |
| N103 | 66 | Identification Code Qualifier | X | ID | 1/2 | Must use | 1 |
| | | Description: Code designating the system/method of code structure used for Identification Code (67) | | | | | |
| | | Code Name | | | | | |
| | | 10 Department of Defense Activity Address Code (DODAAC) | | | | | |
| N104 | 67 | Identification Code | X | AN | 2/80 | Must use | 1 |
| | | Description: Code identifying a party or other code | | | | | |
| N106 | 98 | Entity Identifier Code | O | ID | 2/3 | Must use | 1 |
| | | Description: Code identifying an organizational entity, a physical location, property or an individual | | | | | |
| | | Code Name | | | | | |
| | | FR Message From | | | | | |

HL Hierarchical Level

| | |
|---------------------------|--------------------|
| Pos: 0100 | Max: 1 |
| Detail - Mandatory | |
| Loop: HL | Elements: 3 |

User Option (Usage): Must use

Purpose: To identify dependencies among and the content of hierarchically related groups of data segments

Comments:

1. The HL segment is used to identify levels of detail information using a hierarchical structure, such as relating line-item data to shipment data, and packaging data to line-item data.
2. The HL segment defines a top-down/left-right ordered structure.
3. HL01 shall contain a unique alphanumeric number for each occurrence of the HL segment in the transaction set. For example, HL01 could be used to indicate the number of occurrences of the HL segment, in which case the value of HL01 would be "1" for the initial HL segment and would be incremented by one in each subsequent HL segment within the transaction.
4. HL02 identifies the hierarchical ID number of the HL segment to which the current HL segment is subordinate.
5. HL03 indicates the context of the series of segments following the current HL segment up to the next occurrence of an HL segment in the transaction. For example, HL03 is used to indicate that subsequent segments in the HL loop form a logical grouping of data referring to shipment, order, or item-level information.
6. HL04 indicates whether or not there are subordinate (or child) HL segments related to the current HL segment.

DLMS Note:

1. The transaction set hierarchical data structure is address information, followed by Waste Profile Sheet information, followed by Composition Subsection and EPA Waste Number Subsection as applicable.
2. Use the first 2/HL/0100 loop iteration to provide transaction set recipient address information. All other address information is carried in the Waste Profile Sheet loop.
3. Use the second 2/HL/0100 loop iteration to identify the Waste Profile Sheet (WPS) section information.
4. Use an additional 2/HL/0100 loop iteration to identify the Chemical Composition Subsection (Child of the WPS Section) as applicable.
5. Use an additional 2/HL/0100 loop iteration to identify the Environmental Protection Agency (EPA) Waste Number Subsection (Child of the WPS Section) as applicable.
6. If transmitting multiple WPS sheets, use additional loops as needed preserving the parent child relationship ensuring that the Chemical Composition and EPA Waste Number Subsections are aligned with the applicable WPS loop.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|--|-----------|--------------------------------------|------------|-------------|----------------|--------------|------------|
| HL01 | 628 | Hierarchical ID Number | M | AN | 1/12 | Must use | 1 |
| <p>Description: A unique number assigned by the sender to identify a particular data segment in a hierarchical structure</p> <p>DLMS Note: In the first 2/HL/0100 loop iteration, cite numeric 1. In each subsequent loop iteration, increase incrementally by 1.</p> | | | | | | | |
| HL02 | 734 | Hierarchical Parent ID Number | O | AN | 1/12 | Used | 1 |
| <p>Description: Identification number of the next higher hierarchical data segment that the data segment being described is subordinate to</p> <p>DLMS Note: 1. Use to provide association (parent/child relationship) between the Chemical Composition and EPA Waste Number Subsections with the applicable Waste Profile Sheet. Use in the subordinate (child) loop to identify the HL01 ID Number of the next higher parent loop.</p> | | | | | | | |

Hazardous Material/Hazardous Waste Profile

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|--|------------|-------------|----------------|--------------|------------|
| | | 2. Not applicable to the address loop. | | | | | |
| HL03 | 735 | Hierarchical Level Code | M | ID | 1/2 | Must use | 1 |

Description: Code defining the characteristic of a level in a hierarchical structure

DLMS Note: *The following informational loops are applicable to this transaction. When all loops are used, the HL sequence is V (address), HP (Waste Profile Sheet), KB (Chemical Composition Subsection), and HE (EPA Waste Number Subsection). The KB and HE loops are used as applicable.*

Code Name

V Address Information

DLMS Note:

Use to identify the address loop which specifies the transaction recipient. Use only one address loop per transaction.

HE EPA Waste Number Subsection

DLMS Note:

1. Use to identify the EPA Waste Number Subsection.

2. At this time a local code HE is established for use in 841W, version 4030. A data maintenance action has been submitted for establishment of HE–EPA Waste Number Subsection in a future version.

HP Waste Profile Sheet

DLMS Note:

1. Use to identify the Waste Profile Sheet.

2. At this time a local code HP is established for use in 841W, version 4030. A data maintenance action has been submitted for establishment of HP–Waste Profile Sheet in a future version.

KB Chemical

DLMS Note:

1. Use to identify the Chemical Composition Subsection.

2. Qualifier KB is a migration code approved for use in X12 version 4040.

SPI Specification Identifier

Pos: 0200 Max: 1
 Detail - Optional
 Loop: SPI Elements: 3

User Option (Usage): Used

Purpose: To provide a description of the included specification or technical data items

Syntax Rules:

1. P0203 - If either SPI02 or SPI03 is present, then the other is required.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|---|------------|-------------|----------------|--------------|------------|
| SPI01 | 786 | Security Level Code | M | ID | 2/2 | Must use | 1 |
| | | <p>Description: Code indicating the level of confidentiality assigned by the sender to the information following</p> <p>Code Name 99 Government Defined (Trading Partner Level)</p> | | | | | |
| SPI02 | 128 | Reference Identification Qualifier | X | ID | 2/3 | Used | 1 |
| | | <p>Description: Code qualifying the Reference Identification</p> <p>Code Name WPN Waste Profile Number</p> <p>DLMS Note:</p> <p>1. Use in the HL03 Code HP loop to identify the Waste Profile Number.</p> <p>2. At this time a local code WPN is established for use in 841W, version 4030. A data maintenance action has been submitted for establishment of WPN–Waste Profile Number in a future version.</p> | | | | | |
| SPI03 | 127 | Reference Identification | X | AN | 1/50 | Used | 1 |
| | | <p>Description: Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier</p> | | | | | |

RDT Revision Date/Time

| | |
|-------------------|-------------|
| Pos: 0300 | Max: >1 |
| Detail - Optional | |
| Loop: SPI | Elements: 2 |

User Option (Usage): Used

Purpose: To specify the revision level of the electronic data item

Syntax Rules:

1. C0102 - If RDT01 is present, then RDT02 is required.
2. L030405 - If RDT03 is present, then at least one of RDT04 or RDT05 is required.
3. C0605 - If RDT06 is present, then RDT05 is required.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|---------------------|------------|-------------|----------------|--------------|------------|
| RDT03 | 374 | Date/Time Qualifier | O | ID | 3/3 | Used | 1 |

Description: Code specifying type of date or time, or both date and time

Code Name

585 Report

DLMS Note:

Use in the HL03 Code HP loop to identify the Waste Profile Established Date.

| | | | | | | | |
|-------|-----|------|---|----|-----|------|---|
| RDT04 | 373 | Date | X | DT | 8/8 | Used | 1 |
|-------|-----|------|---|----|-----|------|---|

Description: Date expressed as CCYYMMDD where CC represents the first two digits of the calendar year

LIN Item Identification

| | |
|--------------------------|--------------------|
| Pos: 0400 | Max: 1 |
| Detail - Optional | |
| Loop: SPI | Elements: 2 |

User Option (Usage): Used

Purpose: To specify basic item identification data

Syntax Rules:

1. P0405 - If either LIN04 or LIN05 is present, then the other is required.
2. P0607 - If either LIN06 or LIN07 is present, then the other is required.
3. P0809 - If either LIN08 or LIN09 is present, then the other is required.
4. P1011 - If either LIN10 or LIN11 is present, then the other is required.
5. P1213 - If either LIN12 or LIN13 is present, then the other is required.
6. P1415 - If either LIN14 or LIN15 is present, then the other is required.
7. P1617 - If either LIN16 or LIN17 is present, then the other is required.
8. P1819 - If either LIN18 or LIN19 is present, then the other is required.
9. P2021 - If either LIN20 or LIN21 is present, then the other is required.
10. P2223 - If either LIN22 or LIN23 is present, then the other is required.
11. P2425 - If either LIN24 or LIN25 is present, then the other is required.
12. P2627 - If either LIN26 or LIN27 is present, then the other is required.
13. P2829 - If either LIN28 or LIN29 is present, then the other is required.
14. P3031 - If either LIN30 or LIN31 is present, then the other is required.

Semantics:

1. LIN01 is the line item identification

Comments:

1. See the Data Dictionary for a complete list of IDs.
2. LIN02 through LIN31 provide for fifteen different product/service IDs for each item. For example: Case, Color, Drawing No., U.P.C. No., ISBN No., Model No., or SKU.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|--|------------|-------------|----------------|--------------|------------|
| LIN02 | 235 | Product/Service ID Qualifier | M | ID | 2/2 | Must use | 1 |
| | | Description: Code identifying the type/source of the descriptive number used in Product/Service ID (234) | | | | | |
| | | Code Name | | | | | |
| | | JP Package Type Code | | | | | |
| | | DLMS Note: | | | | | |
| | | <i>Use in the HL03 Code HP loop to identify the Packing Type. Insert "BULK", "DRUM", or a brief narrative describing the Packing Type.</i> | | | | | |
| LIN03 | 234 | Product/Service ID | M | AN | 1/48 | Must use | 1 |
| | | Description: Identifying number for a product or service | | | | | |

N1 Name

| | |
|--------------------------|--------------------|
| Pos: 0510 | Max: 1 |
| Detail - Optional | |
| Loop: N1 | Elements: 5 |

User Option (Usage): Used

Purpose: To identify a party by type of organization, name, and code

Syntax Rules:

1. R0203 - At least one of N102 or N103 is required.
2. P0304 - If either N103 or N104 is present, then the other is required.

Comments:

1. This segment, used alone, provides the most efficient method of providing organizational identification. To obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction processing party.
2. N105 and N106 further define the type of entity in N101.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|-------------------------------|------------|-------------|----------------|--------------|------------|
| N101 | 98 | Entity Identifier Code | M | ID | 2/3 | Must use | 1 |

Description: Code identifying an organizational entity, a physical location, property or an individual

Code Name

HZ Hazardous Waste Generator

DLMS Note:

Use in the HL03 Code HP loop to identify the Generator Name. Use the N102 to provide the facility name; use the N201 to identify the Technical Contact Title; use the N3 and N4 to provide the facility address.

ZD Party to Receive Reports

DLMS Note:

Use in the HL03 Code V loop to identify the DLA Disposition Services Field Office RIC as the transaction recipient.

| | | | | | | | |
|------|----|-------------|---|----|------|------|---|
| N102 | 93 | Name | X | AN | 1/60 | Used | 1 |
|------|----|-------------|---|----|------|------|---|

Description: Free-form name

| | | | | | | | |
|------|----|--------------------------------------|---|----|-----|------|---|
| N103 | 66 | Identification Code Qualifier | X | ID | 1/2 | Used | 1 |
|------|----|--------------------------------------|---|----|-----|------|---|

Description: Code designating the system/method of code structure used for Identification Code (67)

Code Name

M4 Department of Defense Routing Identifier Code (RIC)

| | | | | | | | |
|------|----|----------------------------|---|----|------|------|---|
| N104 | 67 | Identification Code | X | AN | 2/80 | Used | 1 |
|------|----|----------------------------|---|----|------|------|---|

Description: Code identifying a party or other code

| | | | | | | | |
|------|----|-------------------------------|---|----|-----|------|---|
| N106 | 98 | Entity Identifier Code | O | ID | 2/3 | Used | 1 |
|------|----|-------------------------------|---|----|-----|------|---|

Description: Code identifying an organizational entity, a physical location, property or an individual

Code Name

TO Message To

DLMS Note:

Use in the HL03 Code V loop with N101 Code ZD to identify that the DLA Disposition Services Field

Hazardous Material/Hazardous Waste Profile

Code **Name**

Office RIC is the transaction recipient.

N2 Additional Name Information

| | |
|-------------------|-------------|
| Pos: 0520 | Max: 2 |
| Detail - Optional | |
| Loop: N1 | Elements: 1 |

User Option (Usage): Used

Purpose: To specify additional names

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|---------------------|------------|-------------|----------------|--------------|------------|
| N201 | 93 | Name | M | AN | 1/60 | Must use | 1 |

Description: Free-form name

DLMS Note: Use in the HL03 Code HP loop with N101 Code HZ to identify the Technical Contact Title at the facility.

N3 Address Information

| | |
|-------------------|-------------|
| Pos: 0530 | Max: 2 |
| Detail - Optional | |
| Loop: N1 | Elements: 2 |

User Option (Usage): Used

Purpose: To specify the location of the named party

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|--|------------|-------------|----------------|--------------|------------|
| N301 | 166 | Address Information | M | AN | 1/55 | Must use | 1 |
| | | Description: Address information | | | | | |
| | | DLMS Note: Use in the HL03 Code HP loop with N101 Code HZ to identify line 1 of the facility address. | | | | | |
| N302 | 166 | Address Information | O | AN | 1/55 | Used | 1 |
| | | Description: Address information | | | | | |
| | | DLMS Note: Use in the HL03 Code HP loop with N101 Code HZ to identify line 2 of the facility address. | | | | | |

N4 Geographic Location

| | |
|--------------------------|--------------------|
| Pos: 0540 | Max: >1 |
| Detail - Optional | |
| Loop: N1 | Elements: 3 |

User Option (Usage): Used

Purpose: To specify the geographic place of the named party

Syntax Rules:

1. E0207 - Only one of N402 or N407 may be present.
2. C0605 - If N406 is present, then N405 is required.
3. C0704 - If N407 is present, then N404 is required.

Comments:

1. A combination of either N401 through N404, or N405 and N406 may be adequate to specify a location.
2. N402 is required only if city name (N401) is in the U.S. or Canada.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|--|------------|-------------|----------------|--------------|------------|
| N401 | 19 | City Name | O | AN | 2/30 | Used | 1 |
| | | Description: Free-form text for city name | | | | | |
| | | DLMS Note: Use in the HL03 Code HP loop with N101 Code HZ to identify the city of the facility. | | | | | |
| N402 | 156 | State or Province Code | X | ID | 2/2 | Used | 1 |
| | | Description: Code (Standard State/Province) as defined by appropriate government agency | | | | | |
| | | DLMS Note: Use in the HL03 Code HP loop with the N101 Code HZ to identify the state code of the facility. | | | | | |
| N403 | 116 | Postal Code | O | ID | 3/15 | Used | 1 |
| | | Description: Code defining international postal zone code excluding punctuation and blanks (zip code for United States) | | | | | |
| | | DLMS Note: Use in the HL03 Code HP loop with the N101 Code HZ to identify the zip code of the facility. | | | | | |

PER Administrative Communications Contact

| | |
|-------------------|-------------|
| Pos: 0550 | Max: >1 |
| Detail - Optional | |
| Loop: N1 | Elements: 6 |

User Option (Usage): Used

Purpose: To identify a person or office to whom administrative communications should be directed

Syntax Rules:

1. P0304 - If either PER03 or PER04 is present, then the other is required.
2. P0506 - If either PER05 or PER06 is present, then the other is required.
3. P0708 - If either PER07 or PER08 is present, then the other is required.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|---|-----------|---------------------------------------|------------|-------------|----------------|--------------|------------|
| PER01 | 366 | Contact Function Code | M | ID | 2/2 | Must use | 1 |
| <p>Description: Code identifying the major duty or responsibility of the person or group named</p> <p>Code Name</p> <p>BL Technical Department</p> <p>DLMS Note: Use in the HL03 Code HP loop to identify the Technical Contact Name. This name is associated to the Technical Contact Title in the N201.</p> <p>CE Certifier</p> <p>DLMS Note: Use in the HL03 Code HP loop to identify the Certifier Name. This name is associated with the Generator name (N01 Code HZ).</p> | | | | | | | |
| PER02 | 93 | Name | O | AN | 1/60 | Used | 1 |
| <p>Description: Free-form name</p> | | | | | | | |
| PER03 | 365 | Communication Number Qualifier | X | ID | 2/2 | Used | 1 |
| <p>Description: Code identifying the type of communication number</p> <p>Code Name</p> <p>TE Telephone</p> <p>DLMS Note: Use in the HL03 Code HP loop with PER01 Code BL to identify the telephone number of the Technical Contact.</p> | | | | | | | |
| PER04 | 364 | Communication Number | X | AN | 1/256 | Used | 1 |
| <p>Description: Complete communications number including country or area code when applicable</p> | | | | | | | |
| PER05 | 365 | Communication Number Qualifier | X | ID | 2/2 | Used | 1 |
| <p>Description: Code identifying the type of communication number</p> <p>Code Name</p> <p>EX Telephone Extension</p> <p>DLMS Note: Use in the HL03 Code HP loop with PER01 Code BL to identify the telephone extension, if applicable, of the Technical Contact.</p> | | | | | | | |

Hazardous Material/Hazardous Waste Profile

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|-----------------------------|------------|-------------|----------------|--------------|------------|
| PER06 | 364 | Communication Number | X | AN | 1/256 | Used | 1 |

Description: Complete communications number including country or area code when applicable

N9 Reference Identification

| | |
|-------------------|-------------|
| Pos: 0560 | Max: >1 |
| Detail - Optional | |
| Loop: N1 | Elements: 2 |

User Option (Usage): Used

Purpose: To transmit identifying information as specified by the Reference Identification Qualifier

Syntax Rules:

1. R0203 - At least one of N902 or N903 is required.
2. C0605 - If N906 is present, then N905 is required.

Semantics:

1. N906 reflects the time zone which the time reflects.
2. N907 contains data relating to the value cited in N902.

Element Summary:

| Ref | Id | Element Name | Req | Type | Min/Max | Usage | Rep |
|------|-----|------------------------------------|-----|------|---------|----------|-----|
| N901 | 128 | Reference Identification Qualifier | M | ID | 2/3 | Must use | 1 |

Description: Code qualifying the Reference Identification

Code Name

ABO State Hazardous Waste Entity Identifier

DLMS Note:

Use in the HL03 Code HP loop to identify the Generator State Identification.

CAM U.S. Environmental Protection Agency (EPA) Identification Number

DLMS Note:

1. *Use in the HL03 Code HP loop to identify the Generator US EPA Identification.*
2. *Qualifier CAM is a migration code approved for use in X12 version 4040.*

| | | | | | | | |
|------|-----|--------------------------|---|----|------|------|---|
| N902 | 127 | Reference Identification | X | AN | 1/50 | Used | 1 |
|------|-----|--------------------------|---|----|------|------|---|

Description: Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier

PID Product/Item Description

| | |
|-------------------|-------------|
| Pos: 0600 | Max: 1 |
| Detail - Optional | |
| Loop: PID | Elements: 3 |

User Option (Usage): Used

Purpose: To describe a product or process in coded or free-form format

Syntax Rules:

1. C0403 - If PID04 is present, then PID03 is required.
2. R0405 - At least one of PID04 or PID05 is required.
3. C0703 - If PID07 is present, then PID03 is required.
4. C0804 - If PID08 is present, then PID04 is required.
5. C0905 - If PID09 is present, then PID05 is required.

Semantics:

1. Use PID03 to indicate the organization that publishes the code list being referred to.
2. PID04 should be used for industry-specific product description codes.
3. PID08 describes the physical characteristics of the product identified in PID04. A "Y" indicates that the specified attribute applies to this item; an "N" indicates it does not apply. Any other value is indeterminate.
4. PID09 is used to identify the language being used in PID05.

Comments:

1. If PID01 equals "F", then PID05 is used. If PID01 equals "S", then PID04 is used. If PID01 equals "X", then both PID04 and PID05 are used.
2. Use PID06 when necessary to refer to the product surface or layer being described in the segment.
3. PID07 specifies the individual code list of the agency specified in PID03.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|---|----------------------|-------------|----------------|--------------|------------|
| PID01 | 349 | Item Description Type | M | ID | 1/1 | Must use | 1 |
| | | Description: Code indicating the format of a description | | | | | |
| | | Code | Name | | | | |
| | | F | Free-form | | | | |
| PID02 | 750 | Product/Process Characteristic Code | O | ID | 2/3 | Used | 1 |
| | | Description: Code identifying the general class of a product or process characteristic | | | | | |
| | | Code | Name | | | | |
| | | WT | Waste | | | | |
| | | DLMS Note: | | | | | |
| | | <i>Use in the HL03 Code HP loop to identify the Name of the Waste.</i> | | | | | |
| | | CCN | Common Chemical Name | | | | |
| | | DLMS Note: | | | | | |
| | | <i>Use in the HL03 Code KB loop to identify the Chemical Name.</i> | | | | | |
| PID05 | 352 | Description | X | AN | 1/80 | Used | 1 |
| | | Description: A free-form description to clarify the related data elements and their content | | | | | |
| | | DLMS Note: Enter "PSN1", "PSN2", and "PSN3" as required to identify the 80 character increments of the Proper Shipping Name. | | | | | |

PKD Packaging Description

Pos: 0650 Max: >1
 Detail - Optional
 Loop: PID Elements: 2

User Option (Usage): Used

Purpose: To specify a package description and other information

Syntax Rules:

1. C0201 - If PKD02 is present, then PKD01 is required.
2. C0302 - If PKD03 is present, then PKD02 is required.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|---|------------|-------------|----------------|--------------|------------|
| PKD01 | 103 | Packaging Code | X | AN | 3/5 | Used | 1 |
| | | <p>Description: Code identifying the type of packaging; Part 1: Packaging Form, Part 2: Packaging Material; if the Data Element is used, then Part 1 is always required</p> <p>Code Name MXD Mixed</p> <div style="background-color: #f0f0f0; padding: 5px; margin-top: 5px;"> <p>DLMS Note: Use in the HL03 Code HP loop to identify the Mode of Collection.</p> </div> | | | | | |
| PKD02 | 822 | Source Subqualifier | X | AN | 1/15 | Used | 1 |
| | | <p>Description: A reference that indicates the table or text maintained by the Source Qualifier</p> | | | | | |

QTY Quantity

| | |
|--------------------------|--------------------|
| Pos: 0700 | Max: >1 |
| Detail - Optional | |
| Loop: PID | Elements: 2 |

User Option (Usage): Used

Purpose: To specify quantity information

Syntax Rules:

1. R0204 - At least one of QTY02 or QTY04 is required.
2. E0204 - Only one of QTY02 or QTY04 may be present.

Semantics:

1. QTY04 is used when the quantity is non-numeric.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|--|---------------------------------------|-------------|----------------|--------------|------------|
| QTY01 | 673 | Quantity Qualifier | M | ID | 2/2 | Must use | 1 |
| | | Description: Code specifying the type of quantity | | | | | |
| | | Code | Name | | | | |
| | | TT | Total Production Volume | | | | |
| | | DLMS Note: | | | | | |
| | | <i>Use in the HL03 Code HP loop to identify the Projected Annual Volume.</i> | | | | | |
| | | XL | Approximate Number of Units Projected | | | | |
| | | DLMS Note: | | | | | |
| | | <i>Use in the HL03 Code HP loop to identify the Projected Annual Units.</i> | | | | | |
| QTY02 | 380 | Quantity | X | R | 1/15 | Used | 1 |
| | | Description: Numeric value of quantity | | | | | |

MEA Measurements

| | |
|-------------------|-------------|
| Pos: 0740 | Max: >1 |
| Detail - Optional | |
| Loop: PID | Elements: 4 |

User Option (Usage): Used**Purpose:** To specify physical measurements or counts, including dimensions, tolerances, variances, and weights(See Figures Appendix for example of use of C001)**Syntax Rules:**

1. R03050608 - At least one of MEA03, MEA05, MEA06 or MEA08 is required.
2. C0504 - If MEA05 is present, then MEA04 is required.
3. C0604 - If MEA06 is present, then MEA04 is required.
4. L07030506 - If MEA07 is present, then at least one of MEA03, MEA05 or MEA06 is required.
5. E0803 - Only one of MEA08 or MEA03 may be present.

Semantics:

1. MEA04 defines the unit of measure for MEA03, MEA05, and MEA06.

Comments:

1. When citing dimensional tolerances, any measurement requiring a sign (+ or -), or any measurement where a positive (+) value cannot be assumed, use MEA05 as the negative (-) value and MEA06 as the positive (+) value.

DLMS Note:

Use in the HP loop to identify the quantities associated with the hazardous waste/hazardous material.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|-----------------------|------------|-------------|----------------|--------------|------------|
| MEA02 | 738 | Measurement Qualifier | O | ID | 1/3 | Used | 1 |

Description: Code identifying a specific product or process characteristic to which a measurement applies

DLMS Note: *For DLMS use, only the following codes are authorized.*

Code Name

AK Volatile Organic Compounds (VOCs)

HAL Total Halogens

DLMS Note:

1. Use to identify the quantity of halogens.

2. At this time a local code HAL is established for use in 841W, version 4030. A data maintenance action has been submitted for establishment of HAL–Total Halogens in a future version.

PCB Polychlorinated Biphenyl (PCB)

DLMS Note:

1. Use to identify the quantity of PCBs.

2. At this time a local code PCB is established for use in 841W, version 4030. A data maintenance action has been submitted for establishment of PCB–Polychlorinated Biphenyl (PCB) in a future version.

PHE Phenol

DLMS Note:

1. Use to identify the quantity of Phenol.

2. Qualifier PHE is a migration code approved for use in X12 version 5030.

QUR Reportable Quantity

DLMS Note:

Use to identify the DoT Reportable Quantity. Cite the associated DoT unit of issue in the MEA04.

Hazardous Material/Hazardous Waste Profile

Code Name

ZCR Chromium

DLMS Note:

Use to identify the quantity of Chromium Hex.

ZCU Copper

ZNI Nickel

ZZN Zinc

| | | | | | | | |
|-------|-----|--------------------------|---|---|------|------|---|
| MEA03 | 739 | Measurement Value | X | R | 1/20 | Used | 1 |
|-------|-----|--------------------------|---|---|------|------|---|

Description: The value of the measurement

| | | | | | | | |
|-------|------|----------------------------------|---|------|--|------|---|
| MEA04 | C001 | Composite Unit of Measure | X | Comp | | Used | 1 |
|-------|------|----------------------------------|---|------|--|------|---|

Description: To identify a composite unit of measure(See Figures Appendix for examples of use)

DLMS Note: *Use to identify the value of the units expressed in MEA03. For example, if the percent of copper is 50, cite 50 in MEA03 and P1 in MEA04.*

Comments:

1. If C001-02 is not used, its value is to be interpreted as 1.
2. If C001-03 is not used, its value is to be interpreted as 1.
3. If C001-05 is not used, its value is to be interpreted as 1.
4. If C001-06 is not used, its value is to be interpreted as 1.
5. If C001-08 is not used, its value is to be interpreted as 1.
6. If C001-09 is not used, its value is to be interpreted as 1.
7. If C001-11 is not used, its value is to be interpreted as 1.
8. If C001-12 is not used, its value is to be interpreted as 1.
9. If C001-14 is not used, its value is to be interpreted as 1.
10. If C001-15 is not used, its value is to be interpreted as 1.

| | | | | | | | |
|----------|-----|---|---|----|-----|----------|---|
| MEA04-01 | 355 | Unit or Basis for Measurement Code | M | ID | 2/2 | Must use | 1 |
|----------|-----|---|---|----|-----|----------|---|

Description: Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken

DLMS Note: *For DLMS use, only the following codes are authorized. DLMS users see the Unit of Issue and Purchase Unit Conversion table for code conversions between X12 and DOD.*

Code Name

19 Tank Truck

DLMS Note:

DoT equivalent code is TT.

1P Tank Car

DLMS Note:

DoT equivalent code is TC.

Hazardous Material/Hazardous Waste Profile

| Code | Name |
|-------------|---|
| 59 | Parts Per Million DLMS Note: <i>GenComm equivalent code is PPM.</i> |
| 61 | Parts Per Billion DLMS Note: <i>GenComm equivalent code is PPB.</i> |
| BR | Barrel DLMS Note: <i>DoT equivalent codes are DF, DM, and DW. Must use with the MEA09.</i> |
| BX | Box DLMS Note: <i>DoT equivalent codes are CF, CM, and CW. Must use with the MEA09.</i> |
| CL | Cylinder DLMS Note: <i>DoT equivalent code is CY.</i> |
| NA | Milligrams per Kilogram DLMS Note: <i>GenComm equivalent code is MG/KG.</i> |
| NC | Car DLMS Note: <i>DoT equivalent code is HG.</i> |
| P1 | Percent DLMS Note: <i>GenComm equivalent code is PER.</i> |
| TK | Tank DLMS Note: <i>DoT equivalent code is TP.</i> |

MEA09 752 **Surface/Layer/Position Code** O ID 2/2 Used 1

Description: Code indicating the product surface, layer or position that is being described

| Code | Name |
|-------------|--|
| SD | Relative Position 48 DLMS Note: 1. Use with MEA04-01 Code BX (DoT Code CF) to denote Fiber or Plastic Box, Carton, Case. 2. Use with MEA04-01 Code BR (DoT Code DF) to denote Fiberboard or Plastic Drum, Barrel, Keg. |
| SE | Relative Position 49 DLMS Note: 1. Use with MEA04-01 Code BX (DoT Code CM) to denote Metal Box, Carton, Case. 2. Use with MEA04-01 Code BR (DoT Code DM) to denote Metal Drum, Barrel, Keg. |
| SF | Relative Position 50 DLMS Note: 1. Use with MEA04-01 Code BX (DoT Code CW) to denote Wood Box, Carton, Case. 2. Use with MEA04-01 Code BR (DoT Code DW) to denote Wooden Drum, Barrel, Keg. |

LOC Location

| | |
|--------------------------|--------------------|
| Pos: 0760 | Max: 1 |
| Detail - Optional | |
| Loop: PID | Elements: 3 |

User Option (Usage): Used

Purpose: To describe the location in space and time of the axis of an item relative to an origin axis; Euclidean geometry has been assumed with orthogonal axes; the sequence of axes has been chosen in the customary sequence of X, Y, and Z, however, it is possible to just use two-dimensional space rather than three-dimensional space

Syntax Rules:

1. P0607 - If either LOC06 or LOC07 is present, then the other is required.
2. C1110 - If LOC11 is present, then LOC10 is required.
3. C1312 - If LOC13 is present, then LOC12 is required.
4. C1514 - If LOC15 is present, then LOC14 is required.
5. C1716 - If LOC17 is present, then LOC16 is required.
6. C1918 - If LOC19 is present, then LOC18 is required.
7. C2120 - If LOC21 is present, then LOC20 is required.
8. P2223 - If either LOC22 or LOC23 is present, then the other is required.

Semantics:

1. LOC01 through LOC03 describe the item.
2. LOC04 is a description of the positional reference point on the item.
3. LOC05 through LOC08 describe the environment in which the item is placed.
4. LOC09 is a description of the positional reference point in the environment. This is the origin of the original axes.
5. LOC10 through LOC15 describe the translation in the three-dimensional space of the axes with respect to the original axes.
6. LOC10 is the principal X axis of the item.
7. LOC10 through LOC14 describe the principal XY plane of the item.
8. LOC16 is measured with respect to the XY plane around the X axis.
9. LOC18 is measured with respect to the YZ plane around the Y axis.
10. LOC20 is measured with respect to the ZX plane around the Z axis.

Comments:

1. It is possible to translate the axis system in zero, one, two, or three axial directions.
2. The temporal measurements would be used, for example, to describe the positions of a robot head. They may be specified as t1, t2... or n1, n2...etc. Or, they may be specified in time units such as 0, 0.8, 1.6, etc. They may also represent positions where they would be specified as p1, p2, etc.
3. All angular positions of an axis vector are measured in a counter-clockwise rotation around the original axis vector, looking from the positive direction of the vector towards the origin. The angular unit is specified by the corresponding unit of measurement, as in LOC17, LOC19, and LOC21.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|---|------------|-------------|----------------|--------------|------------|
| LOC01 | 128 | Reference Identification Qualifier | M | ID | 2/3 | Must use | 1 |
| | | Description: Code qualifying the Reference Identification | | | | | |
| | | Code Name | | | | | |
| | | PHC Process Handling Code | | | | | |
| | | DLMS Note: | | | | | |
| | | <i>Use in the HL03 Code HP loop to identify the Process Generating Waste. Enter description in the LOC3.</i> | | | | | |
| LOC02 | 127 | Reference Identification | M | AN | 1/50 | Must use | 1 |
| | | Description: Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier | | | | | |

Hazardous Material/Hazardous Waste Profile

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|--|------------|-------------|----------------|--------------|------------|
| | | DLMS Note: Use "PGW" to satisfy syntax requirements. | | | | | |
| LOC03 | 352 | Description | O | AN | 1/80 | Used | 1 |
| | | Description: A free-form description to clarify the related data elements and their content | | | | | |

PKG Marking, Packaging, Loading

| | |
|-------------------|-------------|
| Pos: 0780 | Max: 1 |
| Detail - Optional | |
| Loop: PKG | Elements: 4 |

User Option (Usage): Used

Purpose: To describe marking, packaging, loading, and unloading requirements

Syntax Rules:

1. R040506 - At least one of PKG04, PKG05 or PKG06 is required.
2. C0403 - If PKG04 is present, then PKG03 is required.
3. C0501 - If PKG05 is present, then PKG01 is required.

Semantics:

1. PKG04 should be used for industry-specific packaging description codes.

Comments:

1. Use the MEA (Measurements) Segment to define dimensions, tolerances, weights, counts, physical restrictions, etc.
2. If PKG01 equals "F", then PKG05 is used. If PKG01 equals "S", then PKG04 is used. If PKG01 equals "X", then both PKG04 and PKG05 are used.
3. Use PKG03 to indicate the organization that publishes the code list being referred to.
4. Special marking or tagging data can be given in PKG05 (description).

DLMS Note:

Use in the HP loop to identify the Proper Shipping Name. If the Proper Shipping Name is greater than 80 characters, enter "PSN1" in the PKG04 to identify the first 80 characters of the Proper shipping Name, and then repeat the PKG loop. Enter "PSN2" in the PKG04 and enter the next 80 characters of the Proper Shipping Name into the PKG05. If the Proper Shipping Name is greater than 160 characters, repeat the PKG loop and enter "PSN3" in the PKG04 followed by the remaining 40 characters of the Proper Shipping Name in the PKG05.

Element Summary:

| Ref | Id | Element Name | Req | Type | Min/Max | Usage | Rep |
|-------|-----|--|-----|------|---------|-------|-----|
| PKG01 | 349 | Item Description Type | X | ID | 1/1 | Used | 1 |
| | | Description: Code indicating the format of a description | | | | | |
| | | Code Name | | | | | |
| | | F Free-form | | | | | |
| PKG03 | 559 | Agency Qualifier Code | X | ID | 2/2 | Used | 1 |
| | | Description: Code identifying the agency assigning the code values | | | | | |
| | | Code Name | | | | | |
| | | DL Defense Logistics Agency | | | | | |
| PKG04 | 754 | Packaging Description Code | X | AN | 1/7 | Used | 1 |
| | | Description: A code from an industry code list which provides specific data about the marking, packaging or loading and unloading of a product | | | | | |
| | | DLMS Note: Enter "PSN1", "PSN2", and "PSN3" as required to identify the 80 character increments of the Proper Shipping Name, up to a maximum of 200 characters. | | | | | |
| PKG05 | 352 | Description | X | AN | 1/80 | Used | 1 |
| | | Description: A free-form description to clarify the related data elements and their | | | | | |

Hazardous Material/Hazardous Waste Profile

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|---------------------|------------|-------------|----------------|--------------|------------|
| | | content | | | | | |

REF Reference Identification

| | |
|-------------------|-------------|
| Pos: 0800 | Max: 1 |
| Detail - Optional | |
| Loop: REF | Elements: 2 |

User Option (Usage): Used

Purpose: To specify identifying information

Syntax Rules:

1. R0203 - At least one of REF02 or REF03 is required.

Semantics:

1. REF04 contains data relating to the value cited in REF02.

Element Summary:

| Ref | Id | Element Name | Req | Type | Min/Max | Usage | Rep |
|-------|-----|------------------------------------|-----|------|---------|----------|-----|
| REF01 | 128 | Reference Identification Qualifier | M | ID | 2/3 | Must use | 1 |

Description: Code qualifying the Reference Identification

Code Name

8D Chemical Abstract Service Registry Number

DLMS Note:

Use in the HL03 Code KB loop to identify the Chemical Abstract Service Identifier.

HD Department of Transportation Hazardous Number

DLMS Note:

Use in the HL03 Code HP loop to identify the Hazard Class.

P9 Page Number

DLMS Note:

Use in the HL03 Code HP loop to identify the Emergency Response Guide Page Number.

RE Release Number

DLMS Note:

Use in the HL03 Code HP loop to identify the Edition Year of the Emergency Response Guide.

UN United Nations Hazardous Classification Number

DLMS Note:

Use in the HL03 Code HP loop to identify the UN/NA Number.

CAL U.S. Environmental Protection Agency (EPA) Hazardous Waste Code

DLMS Note:

1. Use in the HL03 Code HE loop to identify the EPA Hazardous Waste Number.

2. Qualifier CAL is a migration code approved for use in X12 version 4040.

PGC Packing Group Code

DLMS Note:

Use in the HL03 Code HP loop to identify the Packing Group (e.g., I, II, III).

| | | | | | | | |
|-------|-----|--------------------------|---|----|------|------|---|
| REF02 | 127 | Reference Identification | X | AN | 1/50 | Used | 1 |
|-------|-----|--------------------------|---|----|------|------|---|

Description: Reference information as defined for a particular Transaction Set or as specified by the Reference Identification Qualifier

LX Assigned Number

| | |
|-------------------|-------------|
| Pos: 1030 | Max: 1 |
| Detail - Optional | |
| Loop: LX | Elements: 1 |

User Option (Usage): Used**Purpose:** To reference a line number in a transaction set**DLMS Note:**

Use in the HP loop to identify the Other Chemical Component Description (2/PSD08/1120) and associated quantity/UOM (2/MEA/1100).

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|---------------------|------------|-------------|----------------|--------------|------------|
| LX01 | 554 | Assigned Number | M | N0 | 1/6 | Must use | 1 |

Description: Number assigned for differentiation within a transaction set

DLMS Note: *In the first 2/LX/1030 loop iteration, cite numeric 1. In each subsequent loop iteration, increase incrementally by 1.*

MEA Measurements

| | |
|--------------------|-------------|
| Pos: 1100 | Max: >1 |
| Detail - Mandatory | |
| Loop: LX | Elements: 3 |

User Option (Usage): Must use

Purpose: To specify physical measurements or counts, including dimensions, tolerances, variances, and weights(See Figures Appendix for example of use of C001)

Syntax Rules:

1. R03050608 - At least one of MEA03, MEA05, MEA06 or MEA08 is required.
2. C0504 - If MEA05 is present, then MEA04 is required.
3. C0604 - If MEA06 is present, then MEA04 is required.
4. L07030506 - If MEA07 is present, then at least one of MEA03, MEA05 or MEA06 is required.
5. E0803 - Only one of MEA08 or MEA03 may be present.

Semantics:

1. MEA04 defines the unit of measure for MEA03, MEA05, and MEA06.

Comments:

1. When citing dimensional tolerances, any measurement requiring a sign (+ or -), or any measurement where a positive (+) value cannot be assumed, use MEA05 as the negative (-) value and MEA06 as the positive (+) value.

DLMS Note:

Use in the HP loop to identify the quantities associated with the hazardous waste/hazardous material.

Element Summary:

| Ref | Id | Element Name | Req | Type | Min/Max | Usage | Rep | | | | |
|-------|-------------|--|-----|------|---------|-------|-----|------|------|-----|-------------|
| MEA02 | 738 | Measurement Qualifier | O | ID | 1/3 | Used | 1 | | | | |
| | | <p>Description: Code identifying a specific product or process characteristic to which a measurement applies</p> <p>DLMS Note: For DLMS use, only the following codes are authorized.</p> <table border="1"> <thead> <tr> <th>Code</th> <th>Name</th> </tr> </thead> <tbody> <tr> <td>OTE</td> <td>Others Each</td> </tr> </tbody> </table> <p>DLMS Note: Use with Other Chemical Component Description at 2/PSD08/1120 to identify the quantity of the Other Chemical Component.</p> | | | | | | Code | Name | OTE | Others Each |
| Code | Name | | | | | | | | | | |
| OTE | Others Each | | | | | | | | | | |
| MEA03 | 739 | Measurement Value | X | R | 1/20 | Used | 1 | | | | |
| | | <p>Description: The value of the measurement</p> | | | | | | | | | |
| MEA04 | C001 | Composite Unit of Measure | X | Comp | | Used | 1 | | | | |
| | | <p>Description: To identify a composite unit of measure(See Figures Appendix for examples of use)</p> <p>DLMS Note: Use to identify the value of the units expressed in MEA03. For example, if the percent of copper is 50, cite 50 in MEA03 and P1 in MEA04.</p> <p>Comments:</p> <ol style="list-style-type: none"> 1. If C001-02 is not used, its value is to be interpreted as 1. 2. If C001-03 is not used, its value is to be interpreted as 1. | | | | | | | | | |

Hazardous Material/Hazardous Waste Profile

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|--|------------|-------------|----------------|--------------|------------|
| | | 3. If C001-05 is not used, its value is to be interpreted as 1. | | | | | |
| | | 4. If C001-06 is not used, its value is to be interpreted as 1. | | | | | |
| | | 5. If C001-08 is not used, its value is to be interpreted as 1. | | | | | |
| | | 6. If C001-09 is not used, its value is to be interpreted as 1. | | | | | |
| | | 7. If C001-11 is not used, its value is to be interpreted as 1. | | | | | |
| | | 8. If C001-12 is not used, its value is to be interpreted as 1. | | | | | |
| | | 9. If C001-14 is not used, its value is to be interpreted as 1. | | | | | |
| | | 10. If C001-15 is not used, its value is to be interpreted as 1. | | | | | |
| MEA04-01 | 355 | Unit or Basis for Measurement Code | M | ID | 2/2 | Must use | 1 |

Description: Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken

DLMS Note: For DLMS use, only the following codes are authorized. DLMS users see the Unit of Issue and Purchase Unit Conversion table for code conversions between X12 and DOD.

Code Name

59 Parts Per Million

DLMS Note:

GenComm equivalent code is PPM.

61 Parts Per Billion

DLMS Note:

GenComm equivalent code is PPB.

NA Milligrams per Kilogram

DLMS Note:

GenComm equivalent code is MG/KG.

P1 Percent

DLMS Note:

GenComm equivalent code is PER.

PSD Physical Sample Description

| | |
|-------------------|-------------|
| Pos: 1120 | Max: >1 |
| Detail - Optional | |
| Loop: LX | Elements: 1 |

User Option (Usage): Used

Purpose: To define the physical sample parameters associated with a test resulting in discrete measurements

Syntax Rules:

1. P0304 - If either PSD03 or PSD04 is present, then the other is required.
2. E0309 - Only one of PSD03 or PSD09 may be present.

Comments:

1. PSD08 can provide a more complete description of the physical sampling location.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|---------------------|------------|-------------|----------------|--------------|------------|
| PSD08 | 352 | Description | O | AN | 1/80 | Used | 1 |

Description: A free-form description to clarify the related data elements and their content

DLMS Note: Use in the HP loop to identify the Other Chemical Component Description.

CID Characteristic/Class ID

| | |
|-------------------|-------------|
| Pos: 1700 | Max: 1 |
| Detail - Optional | |
| Loop: CID | Elements: 5 |

User Option (Usage): Used

Purpose: To specify the general class or specific characteristic upon which test results are being reported or are to be taken

Syntax Rules:

1. R01020405 - At least one of CID01, CID02, CID04 or CID05 is required.
2. P0304 - If either CID03 or CID04 is present, then the other is required.
3. C060304 - If CID06 is present, then CID03 and CID04 are required.
4. L070405 - If CID07 is present, then at least one of CID04 or CID05 is required.

Comments:

1. CID06 specifies the individual code list of the agency specified in CID03.
2. CID07 refers to whether or not the characteristic identified in CID04 or CID05 or both is affected by the product change. If it is affected, the value is "Y". A value of "N" is used when it is known that it will not be affected. Any other value indicates it is indeterminate.

DLMS Note:

Use in the HL03 Codes HP, KB, and HE loops to identify various hazardous materials/hazardous waste material characteristics.

Element Summary:

| Ref | Id | Element Name | Req | Type | Min/Max | Usage | Rep |
|-------|-----|-----------------------|-----|------|---------|-------|-----|
| CID01 | 738 | Measurement Qualifier | X | ID | 1/3 | Used | 1 |

Description: Code identifying a specific product or process characteristic to which a measurement applies

Code Name

RB Range Value

DLMS Note:

Use in the HL03 Code KB loop to identify the chemical range in the CID05.

CON Concentration

DLMS Note:

Use in the HL03 Code KB loop to identify the chemical concentration in the CID05.

| | | | | | | | |
|-------|-----|-----------------------|---|----|-----|------|---|
| CID03 | 559 | Agency Qualifier Code | X | ID | 2/2 | Used | 1 |
|-------|-----|-----------------------|---|----|-----|------|---|

Description: Code identifying the agency assigning the code values

Code Name

DL Defense Logistics Agency

| | | | | | | | |
|-------|-----|--------------------------|---|----|------|------|---|
| CID04 | 751 | Product Description Code | X | AN | 1/12 | Used | 1 |
|-------|-----|--------------------------|---|----|------|------|---|

Description: A code from an industry code list which provides specific data about a product characteristic

DLMS Note: Use in the HL03 Code HP loop. The following code values and associated definitions are authorized for use.

ASH Ash Content (Identify the range or percent of ash in the CID05).

BAS Basis for Information (Identify the Basis for Information (e.g. "USER", "LAB", "BOTH") in the CID05).

BTU BTU/LB (Identify the BTU/LB in

Hazardous Material/Hazardous Waste Profile

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|--|------------|-------------|----------------|--------------|------------|
| | | <i>numeric format in the CID05).</i> | | | | | |
| | COL | <i>Color (Identify the color in the CID05).</i> | | | | | |
| | COR | <i>Corrosive Indicator (Indicate Yes or No in the CID07).</i> | | | | | |
| | CRC | <i>Cyanide Reactive Indicator (Indicate Yes or No in the CID07).</i> | | | | | |
| | CSL | <i>Corrodes Steel Indicator (Indicate Yes or No in the CID07).</i> | | | | | |
| | DHM | <i>DoT Hazardous Material (Indicate Yes or No in the CID07).</i> | | | | | |
| | DNS | <i>Density (Identify the density in NNN.NNN format in the CID05).</i> | | | | | |
| | DXW | <i>Dioxin Waste Indicator (Indicate Yes or No in the CID07).</i> | | | | | |

| | |
|-------------------|-------------|
| Pos: 1800 | Max: 1 |
| Detail - Optional | |
| Loop: CID | Elements: 1 |

User Option (Usage): Used

Purpose: To specify item unit data

Syntax Rules:

1. C0302 - If UIT03 is present, then UIT02 is required.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|----------------------------------|------------|-------------|----------------|--------------|------------|
| UIT01 | C001 | Composite Unit of Measure | M | Comp | | Must use | 1 |

Description: To identify a composite unit of measure(See Figures Appendix for examples of use)

DLMS Note: Use to identify the value of the units expressed in the HL03 Code HE loop with CID01 Code RB.

Comments:

1. If C001-02 is not used, its value is to be interpreted as 1.
2. If C001-03 is not used, its value is to be interpreted as 1.
3. If C001-05 is not used, its value is to be interpreted as 1.
4. If C001-06 is not used, its value is to be interpreted as 1.
5. If C001-08 is not used, its value is to be interpreted as 1.
6. If C001-09 is not used, its value is to be interpreted as 1.
7. If C001-11 is not used, its value is to be interpreted as 1.
8. If C001-12 is not used, its value is to be interpreted as 1.
9. If C001-14 is not used, its value is to be interpreted as 1.
10. If C001-15 is not used, its value is to be interpreted as 1.

| | | | | | | | |
|----------|-----|---|---|----|-----|----------|---|
| UIT01-01 | 355 | Unit or Basis for Measurement Code | M | ID | 2/2 | Must use | 1 |
|----------|-----|---|---|----|-----|----------|---|

Description: Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken

DLMS Note: For DLMS use, only the following codes are authorized. DLMS users see the Unit of Issue and Purchase Unit Conversion table for code conversions between X12 and DOD.

Code Name

59 Parts Per Million

DLMS Note:

GenComm equivalent code is PPM.

61 Parts Per Billion

DLMS Note:

Hazardous Material/Hazardous Waste Profile

Code Name

GenComm equivalent code is PPB.

NA Milligrams per Kilogram

DLMS Note:

GenComm equivalent code is MG/KG.

P1 Percent

DLMS Note:

GenComm equivalent code is PER.

MSG Message Text

| | |
|-------------------|-------------|
| Pos: 2200 | Max: >1 |
| Detail - Optional | |
| Loop: CID | Elements: 1 |

User Option (Usage): Used

Purpose: To provide a free-form format that allows the transmission of text information

Syntax Rules:

1. C0302 - If MSG03 is present, then MSG02 is required.

Semantics:

1. MSG03 is the number of lines to advance before printing.

Comments:

1. MSG02 is not related to the specific characteristics of a printer, but identifies top of page, advance a line, etc.
2. If MSG02 is "AA - Advance the specified number of lines before print" then MSG03 is required.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|-------------------------------|------------|-------------|----------------|--------------|------------|
| MSG01 | 933 | Free-Form Message Text | M | AN | 1/264 | Must use | 1 |

Description: Free-form message text

DLMS Note: Use in the HL03 Code HP loop with CID04 Codes SHI, RCA, and RCB.

SE Transaction Set Trailer

| | |
|----------------------------|--------------------|
| Pos: 0100 | Max: 1 |
| Summary - Mandatory | |
| Loop: N/A | Elements: 2 |

User Option (Usage): Must use

Purpose: To indicate the end of the transaction set and provide the count of the transmitted segments (including the beginning (ST) and ending (SE) segments)

Comments:

1. SE is the last segment of each transaction set.

Element Summary:

| <u>Ref</u> | <u>Id</u> | <u>Element Name</u> | <u>Req</u> | <u>Type</u> | <u>Min/Max</u> | <u>Usage</u> | <u>Rep</u> |
|------------|-----------|---|------------|-------------|----------------|--------------|------------|
| SE01 | 96 | Number of Included Segments | M | N0 | 1/10 | Must use | 1 |
| | | Description: Total number of segments included in a transaction set including ST and SE segments | | | | | |
| SE02 | 329 | Transaction Set Control Number | M | AN | 4/9 | Must use | 1 |
| | | Description: Identifying control number that must be unique within the transaction set functional group assigned by the originator for a transaction set | | | | | |
| | | DLMS Note: <i>Cite the same number as the one cited in ST02.</i> | | | | | |
