940 Warehouse Shipping Order

Functional Group=OW

Purpose: This Draft Standard for Trial Use contains the format and establishes the data contents of the Warehouse Shipping Order Transaction Set (940) for use within the context of an Electronic Data Interchange (EDI) environment. This transaction set can be used to enable the depositor to advise a warehouse to make a shipment, confirm a shipment, or modify or cancel a previously transmitted shipping order.

Federal Note:

1. Use to direct shipments, to inquire about the status of open shipment directives, and to cancel or modify previously submitted shipment directives.

2. Use a single occurrence of this transaction set to exchange single or multiple transactions between a single organization and a single or multiple organizations.

3. DoD logistics users should refer to the Defense Logistics Management Standards (DLMS) Implementation Convention (IC) available at URL: www.dla.mil/does/DLMS. The DLMS IC provides specific business rules, conditions, and authorized codes necessary for appropriate use of this IC within the DLMS.

DLMS Note:

1. ICPs or IMMs use this transaction set to direct storage facility shipments, to reposition inventory between storage facilities, to transmit lateral redistribution orders under Total Asset Visibility (TAV) procedures, to inquire about the status of open shipment directives, to cancel and modify previously submitted shipment directives, and to advise that open shipment directives will be administratively (force) closed. The Defense Reutilization and Marketing Service (DRMS) uses this transaction set to inquire about discrepancies in either shipments to or receipts at a Defense Reutilization and Marketing Office (DRMO).

2. The Department of Defense (DoD) distinguishes among redistribution orders; materiel release orders, inquiries, cancellations, and modifications; disposal release orders, inquiries, cancellations, modifications, and shipment confirmation inquiries; historical materiel release orders; historical disposal release orders; and materiel release order administrative closures.

3. Users operating under the Defense Logistics Management Standards (DLMS) must reference the Unit of Issue and Purchase Unit Conversion Table and the Transportation Mode of Shipment Conversion Table which can be found on the Enterprise Business Standards Office (EBSO) Web site at www.dla.mil/does/DLMS.

4. This DLMS Implementation Convention contains:

a. Data associated with a DLMS enhancement which may not be received or understood by the recipient's automated processing system. DLMS procedures may not have been developed. Components must coordinate requirements and business rules with EBSO prior to use.

b. Data associated with an Approved Change which may not have an established implementation date. This data may not be received or understood by the recipient's automated processing system. Components must coordinate implementation with EBSO prior to use.

c. Data which is retained in the DLMS for a transition period to support transaction conversion in a mixed legacy MILSTRIP DLMS environment. This data will be streamlined out once full DLMS implementation is reached. Components may coordinate with EBSO early termination (or retention) of specific data requirements for users operating in a full DLMS environment.

d. Data elements which have an expanded field size above existing legacy MILSTRIP capability which may not be supported by the recipient's automated processing system. Components must coordinate implementation with

EBSO prior to use.

e. Data required to accommodate Component-unique transaction requirements (ex. C-series transactions). Data does not apply to legacy MILSTRIP transactions.

f. Data associated with a DLMS enhancement authorized for implementation by modernized systems under DLMS migration. This data (including expanded field sizes) should be adopted during, or subsequent, to modernization when applicable to the Component's business process. Prior coordination is not required. Components should ensure that inclusion of this data in a DLMS transaction does not cause inappropriate rejection of the transaction.

5. This transaction may be used to provide item unique identification (IUID) information in accordance with DLMS procedures and OSD Supply Policy. Implementation is limited to the Positive Inventory Control (PIC) Nuclear Weapon Related Materiel (NWRM) Unique Item Tracking (UIT) program and the Retail Transportation and Supply Receipt and Acknowledgement Interchange (Distribution Code 111) under OSD Supply Policy for item unique identification (IUID). For all other procedures, the UII information is a placeholder for DLMS enhancements pending development of DLMS procedures and overarching OSD Supply Policy. Refer to the IUID web at URL: http://www.acq.osd.mil/dpap/pdi/uid/ for DoD policy.

6. Effective April 1, 2014, Refer to ADC 1075. Users must reference the GENC Standard for country codes(https://geo.aitcnet.org/NSGREG/genc/discovery) for a listing of authorized values. Under DLMS, use the GENC Digraph (two-character) code values.

7. This revision to the DLMS IC incorporates Proposed DLMS Changes (PDC) and Approved DLMS Changes (ADC) listed. PDCs/ADCs are available from the EBSO Web site: http://www.dla.mil/HQ/InformationOperations/DLMS/eLibrary/Changes/processchanges/

Purpose: To identify a party by type of organization, name, and code

Syntax Rules:

- 1. P0304 If either N103 or N104 is present, then the other is required.
- 2. R0203 At least one of N102 or N103 is required.

Comments:

- This segment, used alone, provides the most efficient method of providing organizational identification. To
 obtain this efficiency the "ID Code" (N104) must provide a key to the table maintained by the transaction
 processing party.
- 2. N105 and N106 further define the type of entity in N101.

Federal Note:

1. Use this 2/N1/1100 loop to identify the organization receiving the transaction set, a new consignee for diversions, and to identify entities within the ship-to address that will actually receive the materiel.

2. Use additional iterations to identify other organizations associated with the transaction.

			Use either this code, or both codes BT and ST, for reimbursable materiel. Use in redistribution orders, materiel release orders, historical materiel release orders, materiel release order modifications, disposal release orders, and historical disposal release orders to identify the organization which receives both the materiel and the billing for the materiel.					
		BT	Bill-to-Party					
			DLMS Note:					

1. Use with code ST for reimbursable materiel. Use in redistribution orders, materiel release orders, historical materiel release orders, materiel release order modifications, disposal release orders, and historical disposal release orders to

identify the organization to receive the billing for the materiel when different from the organization receiving the materiel. Use precludes the use of code BS for the Bill-to DoDAAC.

2. Use for SFIS compliant systems to identify the BPN of the party to receive the bill. BPN may only be used when the corresponding DoDAAC is also provided. This will require a second iteration of the N1 loop with the same gualifier.

3. Authorized DLMS enhancement; see introductory DLMS note 4f.

CA Carrier

DLMS Note:

1. Use as needed for directed returns to identify the carrier to be used for the return shipment. Refer to ADC 1164.

2. The carrier is identified by name (N102) and Standard Carrier Alpha Code (SCAC) using Code 2 (N103), when available.

3. Authorized DLMS enhancement; see DLMS introductory note 4f.

CN Consignee

DLMS Note:

Use in materiel release order cancellations to identify the new consignee to which a shipment should be diverted.

DA Delivery Address

DLMS Note:

1. Use with 2/N2/1101, 2/N3/1102, and 2/N4/1103 to fully identify in-the-clear exception ship-to address information under authorized conditions.

2. Use for MRO Exception Data Transaction to indicate the ship-to clear-text exception address is a MRO Type Address Code (TAC) 2 (ship-to) freight address.

3. DLMS enhancement; see introductory DLMS notes 4a and 4e.

4. Use when this transaction supports the Retail Transportation and Supply Receipt and Acknowledgement Interchange SBSS interface with CMOS to provide the shipping address when not associated with a DoDAAC.

IF International Freight Forwarder

Federal Note:

Use for MRO clear-text exception data FMS Notice of Availability (NOA) address.

DLMS Note:

Use when transaction includes Component-unique MRO exception data; may be referred to as MAPAC "TAC" 3 address. See introductory DLMS note 4e.

KK Registering Party

DLMS Note:

1. Use to identify the Component UIT registry. May be used by a Component when their UIT process requires that a copy of the transaction should also be sent to a UIT registry for information purposes. Must be used with 2/N106/1100 code 'PK-Party to Receive Copy' to identify that this is only an information copy of the transaction, for use with the Component UIT registry. Identifier in 2/N104.

2. Authorized DLMS enhancement for Air Force use with PIC NWRM UIT program. For PIC UIT, must use in conjunction with 2/N106 code PK and cite the applicable Routing Identifier in 2/N104.

3. Except noted as above, DLMS enhancement; see introductory DLMS note 4a.

LG Location of Goods

DLMS Note:

For LROs, use to identify an alternative supply source.

MQ Delivery Location

DLMS Note:

1. Use to provide the delivery location indicating where the materiel is to be staged/stored.

2. Authorized DLMS enhancement under DLA industrial activity support agreement. Refer to ADC 381.

RC Receiving Location

DLMS Note:

Use for Disposal Shipment Confirmation Follow-up (W0506=NH, DIC AFX/AFZ) to identify the DLA Disposition Services Field Office responsible for this follow-up action. This is the receiving activity, or intended receiving activity, for property shipped to DLA Disposition Services. This is an authorized DLMS enhancement. Refer to ADC 464.

SB Storage Area

DLMS Note:

1. Use to identify the storage facility to receive the transaction set.

2. Use for Disposal Shipment Confirmation Follow-up (W0506=NH, DIC AFX/AFZ) to identify the activity to receive the transaction. This will normally be the shipping activity identified by RIC. If the RIC is not available, the transaction may be directed to the DoDAAC identified in the Document Number. In this usage, the transaction may be transmitted to the ICP/IMM that directed the disposal action. ICPs/IMMs receiving this Follow-up shall either retransmit this transaction to the shipping activity or coordinate with the shipping activity to prepare the appropriate response. Refer to ADC 464.

ST Ship To

DLMS Note:

1. Use with code BT for reimbursable materiel. Use in redistribution orders, materiel release orders, historical materiel release orders, disposal release orders, and historical disposal release orders to identify the organization to receive the materiel, when different from the activity being billed for the materiel. Use precludes the use of code BS.

- 2. May be used with clear text address for excess plant property requisitions only. See introductory DLMS note 4e.
- UQ Subsequent Owner DLMS Note:

Code Name

Use only for inter-Service ammunition or ammunition-related ownership transfer with no physical movement of materiel. Use to identify the RIC to which ownership is being transferred (the New Owner RIC). DLMS enhancement. Refer to ADC 1020.

WL Wholesaler

DLMS Note:

1. Use for lateral redistribution of non-Integrated Material Manager (IMM) or Primary Inventory Control Activity (PICA) owned materiel, to identify the materiel owner to receive the transaction set under single stock fund concept. Use with 2/N101/1100 Code LG to identify the activity at which the materiel is physically located. (Note: This is the owning activity as identified in the Asset Status Reporting transaction (DIC DZF rp 31-33).

2. DLMS enhancement: see introductory DLMS note 4a. This activity derived under legacy MILSTRIP by referencing DAAS table.

XN Planning/Maintenance Organization

DLMS Note:

1. Use between the source of supply and the Distribution Depot warehouse storage system to identify the Shop Service Center (SSC) or Shop Store.

2. Authorized DLMS enhancement under DLA industrial activity support agreement. Refer to ADC 284A & 381.

Z1 Party to Receive Status

DLMS Note:

1. Use to indicate the organization to receive shipment status as identified on the original requisition. Use multiple iterations to identify all status recipients, as required.

2. The DLMS provides the capability to carry additional status recipients beyond those identified by legacy MILSTRIP. The Media and Status Code and the Distribution Code will be retained in the DLMS to facilitate transaction conversion in a mixed legacy MILSTRIP/DLMS environment. Additional status recipients identified here cannot be passed to legacy MILSTRIP users.

Z7 Mark-for Party

DLMS Note:

1. Use in redistribution orders, materiel release orders, historical materiel release orders, and materiel release order modifications, to identify an entity located within the ship-to address that is to actually receive the materiel. Total field length is restricted to 24 clear text characters, when not used in combination with a DoDAAC or RIC. If combined with a Mark-for DoDAAC, restrict clear text to 17 characters. If combined with a Mark-for RIC, restrict clear text to 20 characters. Authorized DLMS enhancement; see introductory DLMS note 4f. Refer to ADC 1009A.

2. For DLA Disposition Services public sales, the customer shall be identified as the Mark-for Party using N102. Use in conjunction with N101, Code BS, Bill and Ship To, identifying the unique DLA Disposition Services public sales DoDAAC. No physical shipment is involved; public sales are designated for pick-up only. Refer to ADC 463.

3. DLA Disposition Services uses to identify the Reutilization/Transfer/Donation (RTD) Web Application customer for pick-up of requisitioned property. The customer's requisitioning DoDAAC will be identified as the Mark-For Party and the customer name and phone number will be provided in the subsequent Point of Contact information (PER Segment). Refer to ADC 466.

4. DLMS enhancement; see introductory DLMS note 4a.

IAD Foreign Office

Federal Note:

Use for MRO clear-text exception data FMS in-country address.

DLMS Note:

Use when transaction includes Component-unique MRO exception data; may be referred to as MAPAC "TAC M" address. See introductory DLMS note 4e.

SUS Supply Source

DLMS Note:

Use only when this transaction supports the Retail Transportation and Supply Receipt and Acknowledgement Interchange SBSS interface with CMOS to provide the Routing Identifier Code of the Source of Supply when FLIS item data is not otherwise available to CMOS.

2 93 Name X AN 1/60 Description: Free-form name DLMS Note: 1. Use when transaction includes Component-unique MRO exception data with N101 Code DA, IAD, and IF to identify the exception activity name (this equates to address line 1).

2. Use to identify the delivery location (used with Qualifier MQ above). Field length is 30 positions maximum.

See introductory DLMS notes 4a and 4e.

3. Use with N101 Code Z7, Mark-for Party, to identify the DLA Disposition Services public sales customer by first and last name. Refer to ADC 463.

4. Use with N101 Code Z7 to identify the recipient of materiel. Total field length is restricted to 24 characters. If combined with a Mark-for DoDAAC, restrict clear text to 17 characters. If combined with a Mark-for RIC, restrict clear text to 20 characters. Authorized DLMS enhancement; see introductory DLMS note 4f. Refer to ADC 1009A.
