MEMORANDUM FOR DLA DISPOSITION SERVICES CUSTOMER

SUBJECT: DLA Disposition Service Network Optimization

As I mentioned in my December 9, 2016 memo informing you of our Network Optimization initiative, we are now at the implementation phase of the project.

All decisions were data driven based on comparisons of future projected workload and current site capacity. As a result, our sites will either expand or reduce based upon projected customer requirements. One of the notable changes is where we transitioned to the use of Field Offices. While Field Offices will not accept direct property turn-ins, they will assist with scrap, environmental, hazardous waste, receipt in place, and customer support. Usable property will be scheduled and transported direct to Full Service Sites for processing.

Our goals remain the same; ensure we have the right people, with the right equipment, in the right locations, to meet customer changing needs.

You will continue to receive updates as we progress through the final phases. Our website <http://www.dla.mil/DispositionServices.aspx> contains additional information or email us with specific questions at: dladispsvcsnetopscustomerquestions@dla.mil.

A handwritten signature in black ink, appearing to read "Michael O. Cannon", is positioned above the printed name.

MICHAEL O. CANNON, SES
Director
