PROPERTY CONDITION CODES

Condition codes are used to classify materiel in terms of readiness for issue.

<u>CODE</u>	<u>TITLE</u>	<u>DEFINITION</u>
A	Serviceable (Issuable without Qualification)	New, used, repaired, or reconditioned materiel which is serviceable and issuable to all customers without limitation or restriction. Includes materiel with more than 6 months shelf-life remaining.
B	Serviceable (Issuable With Qualification)	New, used, repaired, or reconditioned materiel which is serviceable and issuable for its intended purpose, but which is restricted from issue to specific units, activities, or geographical areas by reason of its limited usefulness or short service life expectancy. Includes materiel with 3 through 6 months shelf-life remaining.
F	Unserviceable (Reparable)	Economically reparable materiel which requires repair, overhaul, or reconditioning; includes reparable items which are radioactively contaminated.
G	Unserviceable (Incomplete)	Materiel requiring additional parts or components to complete the end item prior to issue.
H	Unserviceable (Condemned)	Materiel which has been determined to be unserviceable and does not meet repair criteria; includes condemned items which are radioactively contaminated or have passed the expiration date.

(NOTE: Classify obsolete and excess materiel to its proper condition before consigning to the DLA Disposition Services Field Office. Do not classify materiel in Supply Condition H unless it is truly unserviceable and does not meet repair criteria.)
