

NEW AREA CODE FOR NCR WITH EVOIP

571

571 is the new area code for DLA employees in the NCR

392

392 is the new DSN prefix for DLA employees in the NCR

Please notify customers of the new DLA phone numbers.

Search EVOIP in SPOE for self help videos and instructions

All employees should update **milConnect** with: duty organization, location, address, phone & fax numbers to be in the EVOIP system

WHAT'S HAPPENING

We're installing a new Unified Telecommunications system & Enterprise Voice over IP phones. DLA employees will receive new numbers with the new area code effective **Feb 8th** for Suffolk, **Feb 9th** for Lorton and **Feb 16th** for Fort Belvoir.

HERE'S WHY

EVoIP will standardize voice services across the DOD & decrease annual telecommunications cost for each organization. The area code is changing because Verizon does not have a new block available of the previous code.

YOU'LL LOVE IT BECAUSE

You can make or receive calls using your work phone anywhere or anytime, even when teleworking, hoteling, or working at a remote location with features like call forwarding, transfer, call waiting, conferencing, and Extension Mobility - allowing you to use your phone number on any EM phone just by logging in. Jabber (a PC based soft phone) will be available in the future as well.
