

# **ENERGY CONNECTION**

Volume 2, Issue 3

Mr. Kless

February 14, 2022

Leadership, professionalism, and technical knowledge through dedication to duty, integrity, ethics, honor, courage, and loyalty.

These are DLA's core values, but why do they matter?

Core values are the bedrock of our culture. Like a doctor's orders, these are the Director's orders which prescribe how we do business and how we support the warfighter. Core values matter because they authentically define how we operate, behave, and interact with each other and with our customers or suppliers on a dayto-day basis. Our values and mission drive performance.

How many of you knew what the DLA'S core values are?

I ask that question because in the 2020 Dennison survey, employees were asked to provide a "yes" or "no" response to the following question: "Ignoring core values will get you in trouble." DLA Energy scored 68 – its lowest score – to this specific question.

As part of our 2022 Culture Action Plan, we want to emphasize the importance of these core values in our daily jobs. For a high-performance team like DLA Energy, the responsibility to abide by the agency's core values doesn't just rest on the shoulders of leaders but on everyone's.

As Elvis Presley once said, "Values are like fingerprints. Nobody's the same but you leave 'em all over everything you do."

Leave your mark through leadership, professionalism, and technical knowledge through dedication to duty, integrity, ethics, honor, courage, and loyalty.

Operational fuel requirements and strategic planning were the priorities of this

For a nice change of pace after doing most collaboration virtually, about 60 military and civilian members were socially distanced in person in the DLA HQC auditorium with about 60 more participants online.

A seminar highlight was the virtual panel discussion led by the DASD for

Construction and Acting Principal DASD for Sustainment Michael McAndrew, and DASD for Energy & Environment Resilience Richard Kidd. The leaders discussed the Climate Adaptation Plan, the operational realities of the strategic environment, and future planning efforts answering audience questions.

Brig Gen Canlas and Eric Wiedemann gave a short brief on the NDAA for FY22, specifically on section 352, subsection 2927, that states "the U.S. Transportation Command shall be the element responsible for bulk fuel management and delivery of the Department of Defense on a global basis."

Mr. Wiedemann is part of the DLA Energy operational process team set up to assist in implementing the required actions to comply with the NDAA. He briefly discussed the major milestones and objectives charting the way ahead.

"In the end, this can be a win-win situation," Canlas said. "If we take advantage of the expertise and influence of a global combatant command (TRANSCOM) coupled with DLA's expertise as the Executive Agent and Integrated Materiel Manager, we can make a winning team that can thrive in competition through conflict."

The seminar is part of a full week of activities including the Installation Planning Review Board where the jointly chaired board with representatives from the Joint Staff J4, DLA Energy, Combatant Commands, and military services will discuss, prioritize, and vote on military constructions projects fuel infrastructure.

# **HQC/NCR COVID-19 Status: HPCON C**

Effective Jan. 3: Max telework with onsite staff limited to <25%, limit in-person events, all on-post food sales are grab-n-go (no indoor seating), face masks remain mandatory for ages 2+ while inside regardless of vaccination status, and maintain social distancing.

### **JOB WELL DONE!**

DLA Energy Europe & Africa "Energizer of the Month"

#### **Lucien Megel**

Lucien is a General Supply Specialist on the Inventory Management Team. Due to vacancies on the team, Lucien stepped up and seamlessly filled the gaps. He effectively tracks all the fuel movements in the AOR

including daily fuel deliveries/transfers and processes transactions/documentation for 15 pipeline accounts.

### \*\*IT ALERTS\*\*

#### **Security Changes for Internet Browsers**

When accessing .com websites, you are required to "sign in" using your PIV Authentication certificate. Starting on Feb. 8, the new authentication platform is DISA's Globally Federated User Domain (GFUD), which looks like this:

The intent is to protect users from potential phishing attempts/ malicious Internet links. Typically, you will only be required to authenticate once per browser.

Learn more in this DLA Today Announcement

#### **Update your Mobile Certificates**

DLA's mobile authentication certificates are expiring on March 9, 2022. If you do not download the new certificates, you will lose the ability to authenticate on your mobile device (including Boxer, Microsoft Teams, etc.).
