

PUB LOG cross reference to Federal Logistics Information Services (FLIS) - Data Electronic Reading Room

For those users who currently download data files from the DLA electronic reading room, DLA has begun strategies to enhance the publicly available Federal Logistics Information Service data. Now available for download are zip files from **PUBLOG**.

Each zip files may contain one or more **CSV** files (quote enclosed comma delimited) that are logically grouped together. Each CSV file has a header row indicating all available fields and their corresponding delimited order.

The below table serves as a simplified lookup to cross reference reading room extracts to PUB LOG zip files:
