RE: Final Feasibility Study for Depot-Wide Remedial Investigation/Feasibility Study for Arsenic and Manganese in Soil at the Former Curtis Bay Ordnance Depot, Anne Arundel County, Maryland – May 2022

Dear [REDACTED]

The Federal Facilities Installation Restoration Program of the Maryland Department of the Environment has reviewed the above referenced document. The comments made on the previous version of this document have been adequately addressed; therefore, this document is considered to be final and will be placed in the site file.

If you have any questions, please contact me at [REDACTED]

Sincerely,

[REDACTED]

[REDACTED]
Remedial Project Manager
Federal Facilities Installation Restoration Program
