Analytical Run #: 159293 Lab Sample ID: 273331

ICAL Calibration #: Concentration Units: ug/L

Analysis Type: Initial Analysis

Analyte	Analysis Date/Time		Spiked Conc.	Measured Conc.	%R**	Lower Limit (1)	Upper Limit (1)
Arsenic	4/29/19	17:49	5000	5450	109	90	110
Manganese	4/29/19	17:49	5000	5320	106	90	110

Default Limits (not applicable to MDL Check) **No percent recovery is calculated for MDL checks. The check is simply whether the analyte is detected.

(1) Control Limits: 70-130

Prep:

Using 1 L volumetric flasks, pipetted the following and brought up to volume using milli-Q H_2O.
(5% HNO_3, 5% HCl)
1000 ug/L Std. - **10 mL** of Custom Assurance Std. #23 (100 mg/L Al, As, B, Ba, Ca, Co, Cr, Cu, Fe, Li, Mg, Mn, Mo, Ni, Pb, Sb, Se, Sn, Sr, Ti, Tl, V, Zn) M13518 , **10 mL** of Custom Assurance Std. #3 (100 mg/L Ag, Be, Cd) M13506 and **1 mL** of Si (1000 mg/L) M13394 and 1 mL M13203 Ce
0.25 ug/L Std. - **0.25 mL** of the 1000 ug/L Std.
0.5 ug/L Std. - **0.5 mL** of the 1000 ug/L Std.
1 ug/L Std. - **1 mL** of the 1000 ug/L Std.
5 ug/L Std. - **5 mL** of the 1000 ug/L Std.
10 ug/L Std. - **10 mL** of the 1000 ug/L Std.
20 ug/L Std. - **20 mL** of the 1000 ug/L Std.
50 ug/L Std. - **50 mL** of the 1000 ug/L Std.
100 ug/L Std. - **1 mL** of Custom Assurance Std. (CAS) #23 and **1 mL** of CAS #3
10,000 ug/L Std. - **100 mL** CAS #23, **100 mL** CAS #3 and **1 mL** of K (10,000 mg/L) M13465 .
100k ug/L Std. - **10 mL** of Cu (10,000 mg/L) M13166 , **10 mL** of Mn (10,000 mg/L) M13167 , **10 mL** of Cr (10,000 mg/L) M13165 , **10 mL** Pb (10,000 mg/L) M13169 , **10 mL** of Zn (10,000 mg/L) M13168 and **10 mL** of Na (10,000 mg/L) M13461 .
100,000 ug/L Std. - **10 mL** of Mg (10,000 mg/L) M13319 , **10 mL** of Fe (10,000 mg/L) M13463 , **10 mL** of Ca (10,000 mg/L) M13467 and **10 mL** Al (10,000 mg/L) M13462 .
500,000 ug/L Std. - **50 mL** of Mg (10,000 mg/L), **50 mL** of Fe (10,000 mg/L), **50 mL** of Ca (10,000 mg/L) and **50 mL** of Al (10,000 mg/L)
1000k ug/L Std. - **100 mL** of Mg (10,000 mg/L), **100 mL** of Fe (10,000 mg/L), **100 mL** of Ca (10,000 mg/L) and **100 mL** of Al (10,000 mg/L)

S	300	M13391	10000	1.5	07/2019

Of this Base standard, pipet 10 mls into 500 ml volumetric to create a working std or 1 ml into 50 ml digestion tube for a digested working standard.

Expiration Date: 10/2018

		Instrument:	ICP 6500
Standard Log #:	M13476	Standard:	ICSA
Analyst:	[redacted]	Concentrations:	500,000 ug/L Al, Ca, Fe, Mg
Prep Date:	05/02/2018	Expiration Date:	10/2018
Prep:	Into a 500 mL volumetric flask, pipetted **50 mL** Interferents A Standard ((5000 mg/L Al, Ca, Mg) (2000 mg/L Fe)) M13305 and **15 mL** Fe (10000 mg/L) M13321 and brought up to volume with milli-Q H_2O.		

Standard Log #:	M13477	Reagent:	TCLP EXTRACTION FLUID #1
Analyst:	[redacted]	pH:	4.93 ± 0.05
Prep Date:	05/02/2018	Expiration Date:	05/02/2019
Prep:	Into a 20 L carboy filled with 19 L of DI H_2O, add **114 mL** Glacial acetic acid AB.653 and **128.6 mL** 10N NaOH M13417. Dilute to 20 L and mix.		

Standard Log #:	M13478	Reagent:	TCLP EXTRACTION FLUID #1
Analyst:	[redacted]	pH:	4.93 ± 0.05
Prep Date:	05/02/2018	Expiration Date:	05/02/2019
Prep:	Into a 20 L carboy filled with 19 L of DI H_2O, add **114 mL** Glacial acetic acid AB.653 and **128.6 mL** 10N NaOH M13417. Dilute to 20 L and mix.		

Standard Log #:	M13475	Reagent:	Potassium Permanganate Solution
Analyst:	[redacted]		
Prep Date:	04/30/2018	Expiration Date:	10/30/2018
Prep:	Into a 1 L volumetric flask, partially filled with milli-Q H_2O, dissolved 50 g potassium permanganate M13080 and brought up to volume.		

		Instrument:	CETAC
Standard Log #:	M13474	Reagent:	Hg Aqua Regia
Analyst:	[redacted]		
Prep Date:	04/27/2018	Expiration Date:	04/27/2018
Prep:	Carefully mixed 3 parts HCl AB.656 with 1 part HNO_3 AB.655 in a hood.		

		Instrument:	ICP 6000
Standard Log #:	M13471	Standard:	B&Si ICAL
Analyst:	[redacted]	Concentrations:	50, 200, 1000, 2000 and 10,000 ug/L (B, Si)
Prep Date:	04/26/2018	Expiration Date:	07/2019
Prep:	Into five, 1 L volumetric flasks, pipetted the following from stock standards B (1000 mg/L) M13390 and Si (1000 mg/L) M13394 and brought up to volume using milli-Q H_2O. *50 ug/L std.* - **0.05 mL** of each *200 ug/L std.* - **0.2 mL** of each *1000 ug/L std.* -**1.0 mL** of each, also used for Continuing Calibration Verification *2000 ug/L std.* - **2.0 mL** of each *10,000 ug/L std.* -**10 mL** of each		

		Instrument:	ICP 6000
Standard Log #:	M13472	Standard:	B&Si ICV
Analyst:	[redacted]	Concentrations:	1000 ug/L (B, Si)
Prep Date:	04/26/2018	Expiration Date:	07/02/2018
Prep:	Into a 1 L volumetric flask, pipetted **10 mL** of Custom Assurance Std. #23 (100 mg/L Al, As, B, Ba, Ca, Co, Cr, Cu, Fe, Li, Mg, Mn, Mo, Ni, Pb, Sb, Se, Sn, Sr, Ti, Tl, V, Zn) M13364 and **1.0 mL** Si (1000 mg/L) M13085 and brought up to volume using milli-Q H_2O.		

		Instrument:	ICP 6000
Standard Log #:	M13473	Standard:	B & Si ICSAB
Analyst:	[redacted]	Concentrations:	500,000 µg/L (Al, Ca, Fe, Mg) 500 µg/L (B,Si)
Prep Date:	04/26/2018	Expiration Date:	10/30/2018
Prep:	Into a 100 mL volumetric flask, pipetted **10 mL** of Interferents A custom stock (5000 mg/L Al, Ca, Mg and 2000 mg/L Fe) M13305 , **0.05 mL** of B (1000 µg/mL) M13390 , **0.05 mL** of Si (1000 µg/mL) M13394 and **3 mL** of Fe (10,000 mg/L) M13321 and brought up to volume using Milli-Q H_2O.		

Standard Log #:	M13470	Reagent:	NaCl Hydroxylamine Sulfate

Prep:

Using 1 L volumetric flasks, pipetted the following and brought up to volume using milli-Q H_2O.
(5% HNO_3, 5% HCl)
1000 ug/L Std. - **10 mL** of Custom Assurance Std. #23 (100 mg/L Al, As, B, Ba, Ca, Co, Cr, Cu, Fe, Li, Mg, Mn, Mo, Ni, Pb, Sb, Se, Sn, Sr, Ti, Tl, V, Zn) M13252 , **10 mL** of Custom Assurance Std. #3 (100 mg/L Ag, Be, Cd) M13217 and **1 mL** of Si (1000 mg/L) M13085 and 1 mL M13203 Ce
0.25 ug/L Std. - **0.25 mL** of the 1000 ug/L Std.
0.5 ug/L Std. - **0.5 mL** of the 1000 ug/L Std.
1 ug/L Std. - **1 mL** of the 1000 ug/L Std.
5 ug/L Std. - **5 mL** of the 1000 ug/L Std.
10 ug/L Std. - **10 mL** of the 1000 ug/L Std.
20 ug/L Std. - **20 mL** of the 1000 ug/L Std.
50 ug/L Std. - **50 mL** of the 1000 ug/L Std.
100 ug/L Std. - **1 mL** of Custom Assurance Std. (CAS) #23 and **1 mL** of CAS #3
10,000 ug/L Std. - **100 mL** CAS #23, **100 mL** CAS #3 and **1 mL** of K (10,000 mg/L) M13233 .
100k ug/L Std. - **10 mL** of Cu (10,000 mg/L) M13166 , **10 mL** of Mn (10,000 mg/L) M13167 , **10 mL** of Cr (10,000 mg/L) M13165 , **10 mL** Pb (10,000 mg/L) M13169 , **10 mL** of Zn (10,000 mg/L) M13168 and **10 mL** of Na (10,000 mg/L) M13135 .
100,000 ug/L Std. - **10 mL** of Mg (10,000 mg/L) M13236 , **10 mL** of Fe (10,000 mg/L) M13235 , **10 mL** of Ca (10,000 mg/L) M13237 and **10 mL** Al (10,000 mg/L) M13232 .
500,000 ug/L Std. - **50 mL** of Mg (10,000 mg/L), **50 mL** of Fe (10,000 mg/L), **50 mL** of Ca (10,000 mg/L) and **50 mL** of Al (10,000 mg/L)
1000k ug/L Std. - **100 mL** of Mg (10,000 mg/L), **100 mL** of Fe (10,000 mg/L), **100 mL** of Ca (10,000 mg/L) and **100 mL** of Al (10,000 mg/L)

LIMS Run #(s)	**Analysis Date**	**Analyst / Data Interpreter**	**Independent Reviewer**	**Date of Review**	**Approved? (Yes or No)**
159414	03/22/2019, 03/23/2019	[redacted]	[redacted]	03/25/2019	Yes

Instructions: Complete one checklist per *analytical run* . Enter the appropriate response for each question.
Each "No" response requires an explanation in the Comments section, and may require the initiation of a Nonconformance Report.

Requirement:	**Acceptance Criteria**	**Analyst Review**		**Independent Review**		**Comments:**
		Yes	No	Yes	No	(indicate reference to an attachment if necessary)
1. Were samples dried to a constant weight?	Dry and crumbly to the touch and % Solids >95%	Yes		Yes		If No: See PM for further instruction
2. Was the date and time recorded for each sample on the bench sheet?	---	Yes		Yes		If No: Enter the dates and times
3. Was the ambient temperature recorded on the bench sheet?	Should be recorded daily	Yes		Yes		If No: Check daily temperature logbook to find the ambient temperature and record on the bench sheet.
4. Were all the samples sieved and ground?	---	Yes		Yes		
5. Was the initial sample weight recorded on the bench sheet for all samples?	---	Yes		Yes		
6. Was the amount of sample retained on the #10 Sieve recorded on the bench sheet for each sample?	---	Yes		Yes		
7. Were multiple grinds required?	---	Yes		Yes		If Yes: Notify the PM
8. Was a grinding (sand) blank processed at the appropriate frequency?	One after every 10 samples or project/program-specific frequency	Yes		Yes		If No: Grind the appropriate number of sand blanks for the current batch of samples
9. Are all samples on the job lists accounted for?	---	Yes		Yes		If No: Analyze samples that were missed.
10. Were nonconformities (if applicable) documented in the NCR spreadsheet?	---	Yes		Yes		If No: Enter nonconformities into the NCR spreadsheet before data review/validation.

FWC26-10 Data Review Checklist

		Method: Percent Solids SW846-8000C	Independent Data Review Checklist		Balance: VOB-01
LIMS Run #(s)	**Analysis Date**	**Analyst / Data Interpreter**	**Independent Reviewer**	**Date of Review**	**Approved? (Yes or No)**
158862 158863	03/26/2019	[redacted]	[redacted]	03/27/2019	Yes

Instructions: Complete one checklist per *analytical run* . Enter the appropriate response for each question.
Each "No" response requires an explanation in the Comments section, and may require the initiation of a Nonconformance Report.

Requirement:	**Acceptance Criteria**	**Analyst Review**		**Independent Review**		**Comments:**
		Yes	No	Yes	No	(indicate reference to an attachment if necessary)
1. Were samples analyzed within hold time?	14 days or program/project specific	Yes		Yes		Qualify data prepared after hold time
2. Were samples dried overnight?	> 8hours	Yes		Yes		If No: place samples back into oven for mimium of 8 hours of total dry time.
3. Were drying start and stop times recorded?	---	Yes		Yes		If No: record times and temperatures
4. Were duplicates analyzed at the appropriate frequency?	1 per 20 of similar matrix or at program/project specific frequency	Yes		Yes		If No: reprep samples with appropreate frequency for a duplicate.
5. Were the duplicates within acceptable limits?	Within in-house or program/project specific QC limits	Yes		Yes		If No: reprep and reanalyze samples or qualify parent sample result (Y).
6. Are all samples on the job lists accounted for?	---	Yes		Yes		If No: analyze samples that were were missed.
7. Were nonconformities (if applicable) documented in the NCR spreadsheet?		Yes		Yes		If No: Enter nonformities into the NCR spreadsheet before data review/validation.

Project Name: CURTIS BAY ORDNANCE DEPOT
Project Phase: ARSENIC & MANGANESE RI

Log-In Date / Time / By: 03/21/2019 13:46 JLS
Project #: PM: [redacted]

Coolers: 3685
Custody Seals Present : **Y**

Temperature: 1.7,2.6 C On Ice: **Y**
COC Present:? **Y** Complete? **Y**

Seal Intact? **Y**
Ship Method: UPS
Adequate Packaging: **Y**

Numbers: DATED AND SIGNED
Tracking Number: 1Z1A4A858441702697,, "440898649
Temp Blank Enclosed? **Y**

Notes: THE SAMPLES WERE RECEIVED IN GOOD CONDITION ICE.

ONE CUSTODY SEAL WAS PRESENT AND INTACT ON EACH COOLER UPON RECEIPT - BOTH DATED 3/20/19 AND SIGNED.

COC INDICATES A SAMPLE DU1D-SU55, BAG FOR CORRESPONDING SAMPLE CLEARLY INDICATES THAT SAMPLE DESCRIPTION IS DU1B-SU55. LOGGED IN PER COC, AWAITING CLIENT TO ADVISE CORRECT DESCRIPTION.

PER THE CLIENT'S INSTRUCTIONS, THE DESCRIPTIONS FOR THE SAMPLES COLLECTED ON 03/19/2019 @ 1810 WERE CHANGED TO DU1A-SU54 AND DU1B-SU54.

CT Laboratories Terms and Conditions

Where a purchaser (Client) places an order for laboratory, consulting or sampling services from CT Laboratories (CTL), CTL shall provide the ordered services pursuant to these Terms and Conditions, and the related Quotation, or as agreed in a negotiated contract. In the absence of a written agreement to the contrary, the Order constitutes an acceptance by the Client of CTL's offer to do business under these Terms and Conditions, and an agreement to be bound by these Terms and Conditions. No contrary or additional terms and conditions expressed in a Client's document shall be deemed to become a part of the contract created upon acceptance of these Terms and Conditions, unless accepted by CTL in advance of the start of the project and in writing.

1. ORDERS AND RECEIPT OF SAMPLES (Sample Acceptance Policy)

1.1 The Client may place the Order (i.e., specify a Scope of Work) either by submitting a purchase order to CTL in writing, by telephone (confirmed in writing) or by negotiated contract. Whichever option the Client selects for placing the Order, the Order shall not be valid unless it contains sufficient information to enable CTL to carry out the Client's requirements. It is the policy of CTL that samples not meeting the acceptance criteria, outlined in the NELAC standards and Section 5.8.3.2 of the DOD QSM, will not be accepted by the laboratory or will be qualified on the final report. All samples submitted to the laboratory must: (a) be accompanied by proper, full and complete documentation, including sample identification, location, date and time of collection, the collector's name, type of preservation (if any), type of sample, any special comments concerning the sample and any additional pertinent fields on the chain-of-custody. In the absence of any of the required information, the laboratory will attempt to contact the client to obtain the information; if unable to obtain the necessary information, the final report will be qualified. (b) samples must be labeled appropriately with a unique sample identification written with indelible ink on water resistant labels. If the laboratory cannot determine the identity of a sample, it may be rejected and the client will be contacted for further instructions or resampling. (c) samples must be in an appropriate sample container. If the container is inappropriate, the client will be contacted for further instructions or resampling. If analysis is possible, the final report will be qualified. CTL can provide a sampling guide containing approved containers and preservations for analytical methods requested. (d) adhere to method specified holding times. If samples are received with less than ½ the holding time remaining for the requested test, CTL will make its best effort to analyze the samples and notify the client. If holding times are exceeded, the final report will be qualified. (e) contain adequate sample volume to perform the necessary testing. If sufficient volume is not present, the sample may be rejected and the client will be contacted for further instructions or resampling. If samples show signs of damage, contamination or inadequate preservation, the client will be notified. If analysis can be performed, the final report will be qualified. If not, the samples will be rejected and the client notified for further instructions or resampling. It is the Client's responsibility to understand and package samples correctly and provide the proper amount of temperature control (ice) suitable to current weather conditions.

1.2 CTL must be supplied with complete written disclosure of the known or suspected presence of any hazardous substances, as defined by applicable federal or state law. Where any samples which were not accompanied by the required disclosure, cause interruptions in the lab's ability to process work due to contamination of instruments or work areas, the Client will be responsible for the costs of clean up and recovery.

1.3 Prior to Sample Acceptance, the entire risk of loss or damage to samples remains with the Client. In no event will CTL have any responsibility or liability for the action or inaction of any carrier shipping or delivering any sample to or from CTL's premises. Client is responsible to assure that any sample containing any hazardous substance which is to be delivered to CTL's premises will be packaged, labeled, transported and delivered properly and in accordance with applicable laws.

1.4 Clients using CTL's shipping account(s) do so at their own risk and must purchase separate insurance if they do not wish to assume risk of loss. CTL will not assume any risk whatsoever for any samples outside of CTL's control and not successfully delivered to the laboratory within specified hold times.

1.5 CTL will not accept liability for any sample(s), except sample(s) damaged or broken by log-in staff prior to successful log-in of the sample(s) into the CTL- LIMS system. This includes, but may not be limited to: complete, valid COC documentation, all sample receiving issues being resolved from a delay caused by the Client in CTL's ability to log-in samples, including missed turnaround and hold times, delay in processing and, ultimately, additional charges to the Client.

1.6 CTL will only reject samples per directions from the Client. CTL's sole liability is to inform the Client of any sample receipt issues, and may provide an indication how proceeding with the analysis may affect results and final acceptance by the regulating agency. Ultimately, suitability for use is between the Client and the regulating agency(s).

1.7 Signing of this COC by the Client or Client's representative, or directions to CTL via email or Fax constitutes acceptance of these Terms and Conditions, and guarantees payment by the Client to CTL.

2. PAYMENT TERMS

2.1 Services performed by CTL will be in accordance with prices quoted and later confirmed in writing or as stated in the Price Schedule. Invoices may be submitted to Client upon completion of any sample delivery group. Payment in advance is required for all Clients except those whose credit has been established with CTL. For Clients with approved credit, payment terms are net 30 days from the date of invoice by CTL. All overdue payments are subject to an additional interest and service charge of one and one-half percent (1.5%) or the maximum rate permissible by law, per month or portion thereof from the due date until the date of payment. All fees are charged or billed directly to the Client. The billing of a third party will not be accepted without a statement, signed by the third party that acknowledges and accepts payment responsibility. CTL may suspend work and withhold delivery of data under this order at any time in the event Client fails to make timely payment of its invoices. Client shall be responsible for all costs and expenses of collection including reasonable attorney's fees. CTL reserves the right to refuse to proceed with work at any time based upon an unfavorable Client credit report.

3. CHANGE ORDERS, TERMINATION

3.1 Changes to the Scope of Work, price, or result delivery date may be initiated by CTL after Sample Acceptance due to any condition which conflicts with analytical, QA or other protocols warranted in these Terms and Conditions. CTL will not proceed with such changes until an agreement with the Client is reached on the amount of any cost, schedule change or technical change to the Scope of Work, and such agreement is documented in writing.

3.2 Changes to the Scope of Work, including but not limited to increasing or decreasing the work, changing test and analysis specification or acceleration in the performance of the work may be initiated by the Client after sample acceptance. Such a change will be documented in writing and may result in a change in cost and turnaround time commitment. CTL's acceptance of such changes is contingent upon technical feasibility and operational capacity.

3.3 Suspension or termination of all or any part of the work may be initiated by the Client. CTL will be compensated consistent with Section 2 of these Terms and Conditions. CTL will complete all work in progress and be paid in full for all work completed.

4. WARRANTIES AND LIABILITY

4.1 Where applicable, CTL will use analytical methodologies which are in substantial conformity with published test methods. CTL has implemented these methods in its Laboratory Quality Manuals and referenced Standard Operating Procedures and where the nature or composition of the sample requires it, CTL reserves the right to deviate from these methodologies as necessary or appropriate, based on the reasonable judgment of CTL, which deviations, if any, will be made on a basis consistent with recognized standards of the industry and/or CTL's Laboratory Quality Manuals. Client may request that CTL perform according to a mutually agreed Quality Assurance Project Plan (QAPP). In the event that samples arrive prior to agreement on a QAPP, CTL will proceed with analyses under its standard Quality Manuals then in effect, and CTL will not be responsible for any resampling or other charges if work must be repeated to comply with a subsequently finalized QAPP.

4.2 CTL shall start preparation and/or analysis within holding times provided that Sample Acceptance occurs within 48 hours of sampling or 1/2 of the holding time for the test, whichever is less. Samples received that do not meet this provision will be charged as expedited samples and the appropriate rate will be added accordingly. Where resolution of inconsistencies leading to Sample Acceptance does not occur within this period, CTL will use its best efforts to meet holding times and will proceed with the work provided that, in CTL's judgment, the chain-of-custody or definition of the Scope of Work provide sufficient guidance. Reanalysis of samples to comply with CTL's Quality Manuals will be deemed to have met holding times provided the initial analysis was performed within the applicable holding time. Where reanalysis demonstrates that sample matrix interference is the cause of failure to meet any Quality Manual requirements, the warranty will be deemed to have been met.

4.3 CTL warrants that it possesses and maintains all licenses and certifications which are required to perform services under these Terms and Conditions provided that such requirements are specified in writing to CTL prior to Sample Acceptance. CTL will notify the Client in writing of any decertification or revocation of any license, or notice of either, which affects work in progress.

4.4 The warranty obligations set forth in Sections 4.1, 4.2 and 4.3 are the sole and exclusive warranties given by CTL in connection with any services performed by CTL or any Results generated from such services, and CTL gives and makes NO OTHER REPRESENTATION OR WARRANTY OF ANY KIND, EXPRESS OR IMPLIED. No representative of CTL is authorized to give or make any other representation or warranty or modify this warranty in any way.

4.5 Client's sole and exclusive remedy for the breach of warranty in connection with any services performed by CTL, will be limited to repeating any services performed, contingent on the Client's providing, at the request of CTL and at the Client's expense, additional sample(s) if necessary. Any reanalysis requested by the Client generating Results consistent with the original Results will be at the Client's expense. If resampling is necessary, CTL's liability for resampling costs will be limited to actual cost or one hundred or one hundred fifty dollars ($150) per sample, whichever is less.

4.6 CTL's liability for any and all causes of action arising hereunder, whether based in contract, tort, warranty, negligence or otherwise, shall be limited to the lesser amount of compensation for the services performed or $100,000. All claims, including those for negligence, shall be deemed waived unless suit thereon is filed within one year after CTL's completion of the services. Under no circumstances, whether arising in contract, tort (including negligence), or otherwise, shall CTL be responsible for loss of use, loss of profits, or for any special, indirect, incidental or consequential damages occasioned by the services performed or by application or use of the reports prepared.

4.7 In no event shall CTL have any responsibility or liability to the Client for any failure or delay in performance by CTL which results, directly or indirectly, in whole or in part, from any cause or circumstance beyond the reasonable control of CTL. Such causes and circumstances shall include, but not be limited to, acts of God, acts of Client, acts or orders of any governmental authority, strikes or other labor disputes, natural disasters, accidents, wars, civil disturbances, equipment breakdown, matrix interference or unknown highly contaminated samples that impact instrument operation, unavailability of supplies from usual suppliers, difficulties or delays in transportation, mail or delivery services, or any other cause beyond CTL's reasonable control.

5. RESULTS, WORK PRODUCT

5.1 Data or information provided to CTL or generated by services performed under this agreement shall only become the property of the Client upon receipt in full by CTL of payment for the whole Order. Ownership of any analytical method, QA/QC protocols, software programs or equipment developed by CTL for performance of work will be retained by CTL, and Client shall not disclose such information to any third party.

5.2 Data and sample materials provided by Client or at Client's request, and the result obtained by CTL shall be held in confidence (unless such information is generally available to the public or is in the public domain or Client has failed to pay CTL for all services rendered or is otherwise in breach of these Terms and Conditions), subject to any disclosure required by law or legal process.

5.3 Should the Results delivered by CTL be used by the Client or Client's client, even though subsequently determined not to meet the warranties described in these Terms and Conditions, then the compensation will be adjusted based upon mutual agreement. In no case shall the Client unreasonably withhold CTL's right to independently defend its data.

5.4 CTL reserves the right to subcontract services ordered by the Client to another laboratory or laboratories, if, in CTL's sole judgment, it is reasonably necessary, appropriate or advisable to do so, and with the Client's permission. CTL will in no way be liable for any subcontracted services and all applicable warranties, guarantees and insurance are those of the subcontracted laboratory.

5.5 CTL shall dispose of the Client's samples and extracts 30 days after the analytical report is issued, unless instructed to store them for an alternate period of time or to return such samples to the Client, in a manner consistent with U.S. Environmental Protection Agency regulations or other applicable Federal, state or local requirements. Additional charges will apply for samples or extracts stored longer than 30 days at the Clients request. Any samples for projects that are canceled or not accepted, or for which return was requested, will be returned to the Client at Client expense. CTL reserves the right to return to the Client any sample or unused portion of a sample that is not within CTL's permitted capability or the capabilities of CTL's designated waste disposal vendor(s), or will make arrangements to dispose of these samples at Client direction and expense.

5.6 Unless a different time period is agreed to in any order under these Terms and Conditions, CTL agrees to retain all records for five (5) years.

5.7 In the event that CTL is required to respond to legal process related to services for Client, Client agrees to reimburse CTL for hourly charges for personnel involved in the response and attorney fees reasonably incurred in obtaining advice concerning the response, preparation to testify, and appearances related to the legal process, travel and all reasonable expenses associated with the litigation.

6. INSURANCE

6.1 CTL shall maintain in force during the performance of services under these Terms and Conditions, Workers' Compensation and Employer's Liability Insurance in accordance with the laws of the states having jurisdiction over CTL's employees who are engaged in the performance of the work. CTL shall also maintain during such period, Comprehensive General and Contractual Liability (limit of $2,000,000 per occurrence/ aggregate), Comprehensive Automobile Liability, owned and hired, ($1,000,000 combined single limit), and Professional/Pollution Liability Insurance (limit of $5,000,000 per occurrence/aggregate). Any Client required changes to these limits or conditions will result in a change in cost to the Client.

7. AUDIT

7.1 Upon prior notice to CTL, the Client may audit and inspect CTL's records and accounts covering reimbursable costs related to work done for the Client, for a period of one (1) year after completion of the work. The purpose of any such audit shall be only for verification of such costs, and CTL shall not be required to provide access to cost records where prices are expressed as fixed fees or published unit prices.

To: [redacted]
Subject: sample names and time of sample

Hi Bret,
The field team lead just called me to let me know that he had incorrectly told me the sample names for those two sets of samples that we discussed this morning.
The samples identified as DU1A-SU53 and DU1B-SU53 collected at 1604 are correct.
The sample identified as DU1A-SU53 collected at 1810 should be DU1A-SU54.
The sample identified as DU1B-SU53 collected at 1810 should be DU1B-SU54.
I am sorry for any confusion this may cause.
thanks,
--

Subject: [Non-DoD Source] Sample preparation for the Curtis Bay Depot

All,

ERT has contracted CT Laboratories, LLC (CT) to perform the sample preparation and analysis required for the Curtis Bay Ordnance Depot arsenic and manganese RI. After reviewing the Final UFP-QAPP, CT is concerned with processing the sample mass that will be submitted for each of the ISM soil samples collected (approximately 5-10 kg) using the Teflon-coated ball mill specified in the UFP-QAPP. CT indicates that they can process three 1-2 kg masses of soil at a time using the Teflon-coated ball mill. Each of these grind processes will take from 20-30 minutes for clay, and up to one week for sand. Soil samples collected for the RI are expected to be a mixture of sands and clays. Given the large number of soil samples that will be submitted (220+ [surface, subsurface, and QC replicates]) and the need to divide the samples into 5-10 processing masses, the sample processing using the Teflon-coated ball mill is impracticable.

In order to process the soil samples collected at the Curtis Bay Ordnance Depot, ERT and CT propose use of the puck mill for sample grinding. The puck mill is expected to grind the soil samples to the required specification in one minute or less. Use of the puck mill for soil sample grinding will allow the laboratory to process and analyze the submitted soil samples so that the project schedule is not impacted.

To validate use of the puck mill grinding method, CT performed a puck mill grind test on method blank sand materials, both as a blank and arsenic and manganese spiked laboratory control samples and analyzed all for arsenic and manganese using USEPA Method SW846 6010C with the following results:

The concern with use of the puck mill with soil sample submitted for analysis of manganese is adding a high bias to the sample results due to the metals makeup of the puck mill. Although low levels of manganese are detected in the method blank sample, these low levels are not expected to affect project decisions due to the magnitude of the lowest screening level (300 mg/kg, USEPA BTAG) as compared to the detected concentration in the method blank. Also note that all but one LCS recovery was within the DoD QSM QC limit.

The concern with use of the puck mill with soil sample submitted for analysis of arsenic is adding a low bias to the sample results due to volatilization of arsenic during the grinding process. Based on the LCS recoveries (all recoveries were within the DoD QSM QC limit) for arsenic, use of the puck mill for a one-minute grind cycle is not expected to adversely affect the concentrations measured in site soil samples.

Please let me know if sample preparation using the puck mill will be acceptable.

Thank you,

Memorandum for Record

Subject: Response to Email Message, sent 11 March 2019 from ERT on Sample Preparation on the Curtis Bay Depot RI/FS Project for Mn and As to change from processing of ISM Soil Samples from using a Teflon-Coated Ball Mill to a Puck Mill

Your request to use the puck mill for soil sample grinding in order to more efficiently process the large volume and quantities of soil samples consisting of a clay and sand mix is acceptable based on the method QC data provide for the 10 replicate method blanks and the LCS samples processed using the puck mill and analyzed for arsenic and manganese.

Based on an evaluation of the listed Measurement Performance Criteria (MPC) for the two metals in QAPP Worksheet #12, the method blank result for manganese needs to be < 1/10 the regulatory limit (or < 1/10th the amount measure in any sample [whichever is greater] per the DoD QSM). Between the writing of the Draft QAPP and then the Final version of the QAPP, two additional regulatory criteria were added to Worksheet #15: the USEPA Residential and the USEPA BTAG, with the BTAG regulatory value for Mn being the lowest at 330 mg/kg. A tenth of that value is 33 mg/kg, therefore any Method Blank analysis needs to be < 33 mg/kg for Mn. The Method Blank results presented for Mn range from 2.8 to 4.5 mg/kg which is a factor of 7x below 1/10th the Regulatory Limit. Also 9 of the 10 LCS samples spiked for Mn were within acceptable percent recovery limits with the one falling outside the QC limit at 80% which was slightly below the 85% Lower Limit.

For the Arsenic analysis, using the puck mill with a limit of a one-minute grind cycle is acceptable to prevent the puck mill from getting too hot. If another grinding cycle will be done, several minutes should be allowed for the puck mill to cool down. The puck mill should not contain arsenic as part of its elemental makeup, so that shouldn't be a contributing factor in the method blank analysis. The lowest regulatory action level listed for Arsenic in QAPP Worksheet #15 is 0.68 mg/kg, the EPA Residential value. Based on the reported method blank results, the values for arsenic are below the EPA Residential Action Limit or are non-detect.

Case Narrative

Client: ERT, Inc.
Project: Former Curtis Bay Ordnance Depot – Arsenic & Manganese RI/FS; Anne Arundel County, MD
Sample Receipt Dates: 03/26/2019, 03/27/2019, 03/28/2019, & 03/29/2019
SDG #: 143765 (Folders 143765, 143811, 143856 & 143900)

Eighty-six ISM samples were received and analyzed for Arsenic and Manganese. Prior to analysis, the ISM samples were dried, sieved, and ground following the homogenization procedure outlined by the client. The assigned sample ID number, date sampled, and date received are indicated in the attached Project Summary. The samples were received intact and at a temperature within method specified acceptance limits. A breakdown of sample receipt information can be found on the Sample Condition Report located in the last section of the data package and any exceptions are noted below. The analyses were performed following DOD QSM 5.

Manual integrations have been performed on the data provided with this package. If manual integrations were performed, a Reason #(s) was included on the raw data that corresponds to the "Index Key for Manual Integration Rationale". The raw data includes a "Before" and "After" manual integration illustration. The manual integrations were initialed and dated by the analyst, as well as, by the person reviewing the data.

Revision 06/12/2019: The GFAA Arsenic (7010) QC forms (MS, MSD, and Duplicates/Replicates) were recalculated and regenerated.

Sample Analysis and Quality Control

Metals Analysis:

The samples were analyzed using US EPA Method 6010C (ICP Metals). Any samples that had an Arsenic result less than the LOQ on the ICP (6010C) analysis were re-logged for GFAA (7010) Arsenic analysis in order to meet the RSL. Per the client's request, both the GFAA and the ICP Arsenic results were reported when both procedures were performed. All samples were analyzed within the holding time. The following summaries of quality control procedures are included:

Initial and Continuing Calibration Verification
Blanks Summary
ICP Interference Check Data
Spike Sample Recovery
Duplicates Data
Laboratory Control Sample Data
Analysis Run Log

ICP Arsenic & Manganese (6010C) Soil Analysis

Continuing Calibration Verification (CCV) standards were analyzed at two levels (CCV1 & CCV2) with potentially differing wavelengths. Data associated with CCV's were evaluated based on the concentration of the element in the samples and compared to the appropriate CCV level/wavelength.

Some samples may have been analyzed and/or reanalyzed diluted to obtain results for all target analytes within the calibration range of the instrument.

Analytical Run # 159293

Arsenic was detected in the Method Blank (MB) greater than the Method Detection Limit (MDL) but less than ½ the Reporting Limit (RL). The samples were reported and not qualified because the MB arsenic result was less than 1/10th of the sample results.

Manganese was detected in the MB above the MDL and greater than ½ the RL. The samples were reported and qualified with a "B" flag when the MB manganese result was greater than 1/10th of the sample results.

The sample QC was performed on a sample from SDG # 143587.

Analytical Run # 159294

Arsenic was detected in the MB greater than the MDL but less than ½ the RL. The samples were reported and qualified with a "B" flag when the MB arsenic result was greater than 1/10th of the sample results.

Manganese was detected in the MB above the MDL and greater than ½ the RL. The samples were reported and not qualified because the MB manganese result was less than 1/10th of the sample results.

The sample QC was performed on a sample from SDG # 143587.

Analytical Run # 159388

Arsenic was detected in the MB greater than the MDL but less than ½ the RL. The samples were reported and not qualified because the MB arsenic result was less than 1/10th of the sample results.

Manganese was detected in the MB above the MDL and greater than ½ the RL. The samples were reported and not qualified because the MB manganese result was less than 1/10th of the sample results.

The Duplicate (DUP) and Triplicate (TRIP) for sample # 255904 were not applicable for arsenic because the parent sample result was less than five times the Limit of Quantitation (LOQ). The parent sample was reported and not qualified.

Analytical Run # 159809

Arsenic was detected in the MB greater than the MDL but less than ½ the RL. The samples were reported and qualified with a "B" flag when the MB result was greater than 1/10th of the sample results.

Manganese was detected in the MB above the MDL and greater than ½ the RL. The samples were reported and qualified with a "B" flag when the MB result was greater than 1/10th of the sample results.

The Serial Dilution (L) for sample # 256798 was not applicable for arsenic because the parent sample raw result was less than 50 times the Limit of Quantitation (LOQ). A Post Digestion Spike (PDS) was analyzed and was unacceptable for arsenic. The parent sample was reported and qualified with an "M" flag for the failing element.

The Matrix Spike (MS) for sample # 256798 had an outside recovery for arsenic. A PDS was analyzed and was unacceptable. The parent sample was reported and qualified with an "M" flag for the failing element.

The DUP and TRIP for sample # 256803 were not acceptable for manganese because the results exceeded the Relative Percent Difference (RPD) limit. The parent sample was reported and qualified with a "Y" flag for the failing element.

Analytical Run # 159920

Manganese was detected in the MB above the MDL and greater than ½ the RL. The samples were reported and not qualified because the MB result was less than 1/10th of the sample results.

The DUP and TRIP for sample # 257656 were not applicable for arsenic because the parent sample result was less than five times the LOQ. The parent sample was reported and not qualified.

The L for sample # 257656 was not acceptable for manganese because the result exceeded the RPD limit. A PDS was analyzed and was acceptable. The parent sample was reported and not qualified.

The MS and MSD for sample # 258269 had outside recoveries for manganese. A PDS was analyzed and was acceptable. The parent sample was reported and not qualified.

Analytical Run # 159931

Manganese was detected in the MB above the MDL and greater than ½ the RL. The samples were reported and not qualified because the MB result was less than 1/10th of the sample results.

The DUP for sample # 258271 was not applicable for arsenic because the parent sample result was less than five times the LOQ. An MSD was analyzed to demonstrate precision and was acceptable. The parent sample was reported and not qualified.

GFAA Arsenic (7010) Soil Analysis

Analytical Run # 160412

Arsenic was detected in the MB above the MDL and greater than ½ the RL. The samples were reported and qualified with a "B" flag when the MB result was greater than 1/10th of the sample results.

The L for sample # 257647 was not applicable for arsenic because the parent sample raw result was less than 50 times the LOQ. A PDS was analyzed and was acceptable. The parent sample was reported and not qualified.

The DUP and TRIP for sample # 257647 were not applicable for arsenic because the parent sample result was less than five times the LOQ. An MSD was analyzed to demonstrate precision and was acceptable. The parent sample was reported and not qualified.

The MS and MSD for sample # 257647 had outside recoveries for arsenic. A PDS was analyzed and was acceptable. The parent sample was reported and not qualified.

The samples were diluted for analysis to reduce the background signal to less than 1.0. The samples were reported and qualified with a "V" flag when the final results were less than the adjusted RL.

Data Qualifiers

Code	Description
A	Analyte averaged calibration criteria within acceptable limits.
B	Analyte detected in associated Method Blank.
C	Toxicity present in BOD sample.
D	Diluted Out.
E	Safe, No Total Coliform detected.
F	Unsafe, Total Coliform detected, no E. Coli detected.
G	Unsafe, Total Coliform detected and E. Coli detected.
H	Holding time exceeded.
J	Estimated value.
L	Significant peaks were detected outside the chromatographic window.
M	Matrix spike and/or Matrix Spike Duplicate recovery outside acceptance limits.
N	Insufficient BOD oxygen depletion.
O	Complete BOD oxygen depletion.
P	Concentration of analyte differs more than 40% between primary and confirmation analysis.
Q	Laboratory Control Sample outside acceptance limits.
R	See Narrative at end of report.
S	Surrogate standard recovery outside acceptance limits due to apparent matrix effects.
T	Sample received with improper preservation or temperature.
U	Analyte concentration was not above the detection level.
V	Raised Quantitation or Reporting Limit due to limited sample amount or dilution for matrix background interference.
W	Sample amount received was below program minimum.
X	Analyte exceeded calibration range.
Y	Replicate/Duplicate precision outside acceptance limits.
Z	Calibration criteria exceeded.

CT LABORATORIES

MANUAL INTEGRATION REASON CODES

CTLaboratories has identified four general cases with valid reasons supporting the use of manual integration techniques. These codes are used on chromatograms in this data package to document the reasons for manual integrations per CTLaboratories' SOP SS-10 current revision.

#1: **Data system failed to select the correct peak or missed the peak entirely.**
In some cases the chromatography system selects and integrates the "wrong peak". In this case the analyst must correct the selection and force the system to integrate the proper peak. In other instances the system may miss the peak completely. In this case the analyst manually integrated the peak

#2: **Data System Splits the Peak Incorrectly or Integrates a False Peak as a Rider Peak.**
This phenomenon is common at low concentrations where the signal to noise ratio is low. A single compound (peak) is incorrectly split into multiple peaks or integrated as a main peak with one or more rider peaks resulting in low or high area counts for the target compound.

#3: Improperly Integrated Isomers and/or coeluting compounds.
For when the system fails to distinguish coeluting compounds and or isomers. The integration areas and concentrations may be inaccurate, and they must be corrected by manual integration. Prime examples are compounds that are unresolved and integrated improperly when present at low concentrations in standards or samples.

#4: System Established Incorrect Baseline.
There are numerous situations in chromatography where the system establishes the baseline incorrectly. Some baseline errors will be obvious to the analyst and may be corrected via manual procedures.

#5: Miscellaneous.
Some situations involving integration errors may require in-depth review and technical judgment. These cases should be brought to the attention of the group supervisor. If the form of manual integration is not clearly covered by these four cases, then review and approval by the group supervisor or the *QA/QC* Supervisor will be required.
