Prep Date:	05/07/2018	Expiration Date:	05/17/2018

PREP

Into a 100 mL V.F., added 13.89g NH4F (W43077) and 7.305g EDTA (W43689). Brought to volume with D.I. H2O. Stirred and dissolved for 15 minutes. Stored in refrigerator.

Standard Log #:	M13490	Reagent/Standard:	Mehlich 3 Extractant
Analyst:	[redacted]	Concentration:	NA
Prep Date:	05/07/2018	Expiration Date:	05/17/2018

PREP

Into a 2000 mL V.F., filled with approximately 1500 mL D.I. H2O, added 40g NH4NO3 (W43076), 8 mL Mehlich 3 Stock Solution (M13489), 23 mL Glacial Acetic Acid (AB 653), 1.64 mL HNO3 (AB 655). Brought to volume with D.I. H2O. Dissolved/stirred for 15 minutes. Stored in refrigerator.

Matrix: S-Soil Slg-Sludge GW-GroundWater M-Misc Waste SW-Surface Water A-Air WW-WasteWater DW-Drinking Water SD=Sediment Leachate=LE

		Method: Multi-Incremental Soil Homogenization (8330B Explosives)			
LIMS Run #(s)	**Analysis Date**	**Analyst / Data Interpreter**	**Independent Reviewer**	**Date of Review**	**Approved? (Yes or No)**
159470	03/28/2019 - 04/01/2019	[redacted]	[redacted]	04/02/2019	Yes

Instructions: Complete one checklist per *analytical run* . Enter the appropriate response for each question.
Each "No" response requires an explanation in the Comments section, and may require the initiation of a Nonconformance Report.

Requirement:	**Acceptance Criteria**	**Analyst Review**		**Independent Review**		**Comments:**
		Yes	No	Yes	No	(indicate reference to an attachment if necessary)
1. Were samples dried to a constant weight?	Dry and crumbly to the touch and % Solids >95%	Yes		Yes		If No: See PM for further instruction
2. Was the date and time recorded for each sample on the bench sheet?	---	Yes		Yes		If No: Enter the dates and times
3. Was the ambient temperature recorded on the bench sheet?	Should be recorded daily	Yes		Yes		If No: Check daily temperature logbook to find the ambient temperature and record on the bench sheet.
4. Were all the samples sieved and ground?	---	Yes		Yes		
5. Was the initial sample weight recorded on the bench sheet for all samples?	---	Yes		Yes		
6. Was the amount of sample retained on the #10 Sieve recorded on the bench sheet for each sample?	---	Yes		Yes		
7. Were multiple grinds required?	---		No		No	If Yes: Notify the PM
8. Was a grinding (sand) blank processed at the appropriate frequency?	One after every 10 samples or project/program-specific frequency	Yes		Yes		If No: Grind the appropriate number of sand blanks for the current batch of samples
9. Are all samples on the job lists accounted for?	---	Yes		Yes		If No: Analyze samples that were missed.
10. Were nonconformities (if applicable) documented in the NCR spreadsheet?	---	Yes		Yes		If No: Enter nonconformities into the NCR spreadsheet before data review/validation.

Instructions: Complete one checklist per *analytical run* . Enter the appropriate response for each question.
Each "No" response requires an explanation in the Comments section, and may require the initiation of a Nonconformance Report.

Requirement:	**Acceptance Criteria**	**Analyst Review**		**Independent Review**		**Comments:**
		Yes	No	Yes	No	(indicate reference to an attachment if necessary)
1. Were samples dried to a constant weight?	Dry and crumbly to the touch and % Solids >95%	Yes		Yes		If No: See PM for further instruction
2. Was the date and time recorded for each sample on the bench sheet?	---	Yes		Yes		If No: Enter the dates and times
3. Was the ambient temperature recorded on the bench sheet?	Should be recorded daily	Yes		Yes		If No: Check daily temperature logbook to find the ambient temperature and record on the bench sheet.
4. Were all the samples sieved and ground?	---	Yes		Yes		
5. Was the initial sample weight recorded on the bench sheet for all samples?	---	Yes		Yes		
6. Was the amount of sample retained on the #10 Sieve recorded on the bench sheet for each sample?	---	Yes		Yes		
7. Were multiple grinds required?	---		No		No	If Yes: Notify the PM
8. Was a grinding (sand) blank processed at the appropriate frequency?	One after every 10 samples or project/program-specific frequency	Yes		Yes		If No: Grind the appropriate number of sand blanks for the current batch of samples
9. Are all samples on the job lists accounted for?	---	Yes		Yes		If No: Analyze samples that were missed.
10. Were nonconformities (if applicable) documented in the NCR spreadsheet?	---	Yes		Yes		If No: Enter nonconformities into the NCR spreadsheet before data review/validation.

1. Were samples analyzed within hold time?	14 days or program/project specific	Yes		Yes		Qualify data prepared after hold time
2. Were samples dried overnight?	> 8hours	Yes		Yes		If No: place samples back into oven for mimium of 8 hours of total dry time.
3. Were drying start and stop times recorded?	---	Yes		Yes		If No: record times and temperatures
4. Were duplicates analyzed at the appropriate frequency?	1 per 20 of similar matrix or at program/project specific frequency	Yes		Yes		If No: reprep samples with appropreate frequency for a duplicate.
5. Were the duplicates within acceptable limits?	Within in-house or program/project specific QC limits	Yes		Yes		If No: reprep and reanalyze samples or qualify parent sample result (Y).
6. Are all samples on the job lists accounted for?	---	Yes		Yes		If No: analyze samples that were were missed.
7. Were nonconformities (if applicable) documented in the NCR spreadsheet?		Yes		Yes		If No: Enter nonformities into the NCR spreadsheet before data review/validation.

CT Laboratories Terms and Conditions

Where a purchaser (Client) places an order for laboratory, consulting or sampling services from CT Laboratories (CTL), CTL shall provide the ordered services pursuant to these Terms and Conditions, and the related Quotation, or as agreed in a negotiated contract. In the absence of a written agreement to the contrary, the Order constitutes an acceptance by the Client of CTL's offer to do business under these Terms and Conditions, and an agreement to be bound by these Terms and Conditions. No contrary or additional terms and conditions expressed in a Client's document shall be deemed to become a part of the contract created upon acceptance of these Terms and Conditions, unless accepted by CTL in advance of the start of the project and in writing.

1. ORDERS AND RECEIPT OF SAMPLES (Sample Acceptance Policy)

1.1 The Client may place the Order (i.e., specify a Scope of Work) either by submitting a purchase order to CTL in writing, by telephone (confirmed in writing) or by negotiated contract. Whichever option the Client selects for placing the Order, the Order shall not be valid unless it contains sufficient information to enable CTL to carry out the Client's requirements. It is the policy of CTL that samples not meeting the acceptance criteria, outlined in the NELAC standards and Section 5.8.3.2 of the DOD QSM, will not be accepted by the laboratory or will be qualified on the final report. All samples submitted to the laboratory must: (a) be accompanied by proper, full and complete documentation, including sample identification, location, date and time of collection, the collector's name, type of preservation (if any), type of sample, any special comments concerning the sample and any additional pertinent fields on the chain-of-custody. In the absence of any of the required information, the laboratory will attempt to contact the client to obtain the information; if unable to obtain the necessary information, the final report will be qualified.
(b) samples must be labeled appropriately with a unique sample identification written with indelible ink on water resistant labels. If the laboratory cannot determine the identity of a sample, it may be rejected and the client will be contacted for further instructions or resampling. (c) samples must be in an appropriate sample container. If the container is inappropriate, the client will be contacted for further instructions or resampling. If analysis is possible, the final report will be qualified. CTL can provide a sampling guide containing approved containers and preservations for analytical methods requested. (d) adhere to method specified holding times. If samples are received with less than ½ the holding time remaining for the requested test, CTL will make its best effort to analyze the samples and notify the client. If holding times are exceeded, the final report will be qualified. (e) contain adequate sample volume to perform the necessary testing. If sufficient volume is not present, the sample may be rejected and the client will be contacted for further instructions or resampling. If samples show signs of damage, contamination or inadequate preservation, the client will be notified. If analysis can be performed, the final report will be qualified. If not, the samples will be rejected and the client notified for further instructions or resampling. It is the Client's responsibility to understand and package samples correctly and provide the proper amount of temperature control (ice) suitable to current weather conditions.
1.2 CTL must be supplied with complete written disclosure of the known or suspected presence of any hazardous substances, as defined by applicable federal or state law. Where any samples which were not accompanied by the required disclosure, cause interruptions in the lab's ability to process work due to contamination of instruments or work areas, the Client will be responsible for the costs of clean up and recovery.
1.3 Prior to Sample Acceptance, the entire risk of loss or damage to samples remains with the Client. In no event will CTL have any responsibility or liability for the action or inaction of any carrier shipping or delivering any sample to or from CTL's premises. Client is responsible to assure that any sample containing any hazardous substance which is to be delivered to CTL's premises will be packaged, labeled, transported and delivered properly and in accordance with applicable laws.
1.4 Clients using CTL's shipping account(s) do so at their own risk and must purchase separate insurance if they do not wish to assume risk of loss. CTL will not assume any risk whatsoever for any samples outside of CTL's control and not successfully delivered to the laboratory within specified hold times.
1.5 CTL will not accept liability for any sample(s), except sample(s) damaged or broken by log-in staff prior to successful log-in of the sample(s) into the CTL- LIMS system. This includes, but may not be limited to: complete, valid COC documentation, all sample receiving issues being resolved from a delay caused by the Client in CTL's ability to log-in samples, including missed turnaround and hold times, delay in processing and, ultimately, additional charges to the Client.
1.6 CTL will only reject samples per directions from the Client. CTL's sole liability is to inform the Client of any sample receipt issues, and may provide an indication how proceeding with the analysis may affect results and final acceptance by the regulating agency. Ultimately, suitability for use is between the Client and the regulating agency(s).
1.7 Signing of this COC by the Client or Client's representative, or directions to CTL via email or Fax constitutes acceptance of these Terms and Conditions, and guarantees payment by the Client to CTL.

2. PAYMENT TERMS

2.1 Services performed by CTL will be in accordance with prices quoted and later confirmed in writing or as stated in the Price Schedule. Invoices may be submitted to Client upon completion of any sample delivery group. Payment in advance is required for all Clients except those whose credit has been established with CTL. For Clients with approved credit, payment terms are net 30 days from the date of invoice by CTL. All overdue payments are subject to an additional interest and service charge of one and one-half percent (1.5%) or the maximum rate permissible by law, per month or portion thereof from the due date until the date of payment. All fees are charged or billed directly to the Client. The billing of a third party will not be accepted without a statement, signed by the third party that acknowledges and accepts payment responsibility. CTL may suspend work and withhold delivery of data under this order at any time in the event Client fails to make timely payment of its invoices. Client shall be responsible for all costs and expenses of collection including reasonable attorney's fees. CTL reserves the right to refuse to proceed with work at any time based upon an unfavorable Client credit report.

3. CHANGE ORDERS, TERMINATION

3.1 Changes to the Scope of Work, price, or result delivery date may be initiated by CTL after Sample Acceptance due to any condition which conflicts with analytical, QA or other protocols warranted in these Terms and Conditions. CTL will not proceed with such changes until an agreement with the Client is reached on the amount of any cost, schedule change or technical change to the Scope of Work, and such agreement is documented in writing.
3.2 Changes to the Scope of Work, including but not limited to increasing or decreasing the work, changing test and analysis specification or acceleration in the performance of the work may be initiated by the Client after sample acceptance. Such a change will be documented in writing and may result in a change in cost and turnaround time commitment. CTL's acceptance of such changes is contingent upon technical feasibility and operational capacity.
3.3 Suspension or termination of all or any part of the work may be initiated by the Client. CTL will be compensated consistent with Section 2 of these Terms and Conditions. CTL will complete all work in progress and be paid in full for all work completed.

4. WARRANTIES AND LIABILITY

4.1 Where applicable, CTL will use analytical methodologies which are in substantial conformity with published test methods. CTL has implemented these methods in its Laboratory Quality Manuals and referenced Standard Operating Procedures and where the nature or composition of the sample requires it, CTL reserves the right to deviate from these methodologies as necessary or appropriate, based on the reasonable judgment of CTL, which deviations, if any, will be made on a basis consistent with recognized standards of the industry and/or CTL's Laboratory Quality Manuals. Client may request that CTL perform according to a mutually agreed Quality Assurance Project Plan (QAPP). In the event that samples arrive prior to agreement on a QAPP, CTL will proceed with analyses under its standard Quality Manuals then in effect, and CTL will not be responsible for any resampling or other charges if work must be repeated to comply with a subsequently finalized QAPP.
4.2 CTL shall start preparation and/or analysis within holding times provided that Sample Acceptance occurs within 48 hours of sampling or 1/2 of the holding time for the test, whichever is less. Samples received that do not meet this provision will be charged as expedited samples and the appropriate rate will be added accordingly. Where resolution of inconsistencies leading to Sample Acceptance does not occur within this period, CTL will use its best efforts to meet holding times and will proceed with the work provided that, in CTL's judgment, the chain-of-custody or definition of the Scope of Work provide sufficient guidance. Reanalysis of samples to comply with CTL's Quality Manuals will be deemed to have met holding times provided the initial analysis was performed within the applicable holding time. Where reanalysis demonstrates that sample matrix interference is the cause of failure to meet any Quality Manual requirements, the warranty will be deemed to have been met.
4.3 CTL warrants that it possesses and maintains all licenses and certifications which are required to perform services under these Terms and Conditions provided that such requirements are specified in writing to CTL prior to Sample Acceptance. CTL will notify the Client in writing of any decertification or revocation of any license, or notice of either, which affects work in progress.
4.4 The warranty obligations set forth in Sections 4.1, 4.2 and 4.3 are the sole and exclusive warranties given by CTL in connection with any services performed by CTL or any Results generated from such services, and CTL gives and makes NO OTHER REPRESENTATION OR WARRANTY OF ANY KIND, EXPRESS OR IMPLIED. No representative of CTL is authorized to give or make any other representation or warranty or modify this warranty in any way.
4.5 Client's sole and exclusive remedy for the breach of warranty in connection with any services performed by CTL, will be limited to repeating any services performed, contingent on the Client's providing, at the request of CTL and at the Client's expense, additional sample(s) if necessary. Any reanalysis requested by the Client generating Results consistent with the original Results will be at the Client's expense. If resampling is necessary, CTL's liability for resampling costs will be limited to actual cost or one hundred or one hundred fifty dollars ($150) per sample, whichever is less.
4.6 CTL's liability for any and all causes of action arising hereunder, whether based in contract, tort, warranty, negligence or otherwise, shall be limited to the lesser amount of compensation for the services performed or $100,000. All claims, including those for negligence, shall be deemed waived unless suit thereon is filed within one year after CTL's completion of the services. Under no circumstances, whether arising in contract, tort (including negligence), or otherwise, shall CTL be responsible for loss of use, loss of profits, or for any special, indirect, incidental or consequential damages occasioned by the services performed or by application or use of the reports prepared.
4.7 In no event shall CTL have any responsibility or liability to the Client for any failure or delay in performance by CTL which results, directly or indirectly, in whole or in part, from any cause or circumstance beyond the reasonable control of CTL. Such causes and circumstances shall include, but not be limited to, acts of God, acts of Client, acts or orders of any governmental authority, strikes or other labor disputes, natural disasters, accidents, wars, civil disturbances, equipment breakdown, matrix interference or unknown highly contaminated samples that impact instrument operation, unavailability of supplies from usual suppliers, difficulties or delays in transportation, mail or delivery services, or any other cause beyond CTL's reasonable control.

5. RESULTS, WORK PRODUCT

5.1 Data or information provided to CTL or generated by services performed under this agreement shall only become the property of the Client upon receipt in full by CTL of payment for the whole Order. Ownership of any analytical method, QA/QC protocols, software programs or equipment developed by CTL for performance of work will be retained by CTL, and Client shall not disclose such information to any third party.
5.2 Data and sample materials provided by Client or at Client's request, and the result obtained by CTL shall be held in confidence (unless such information is generally available to the public or is in the public domain or Client has failed to pay CTL for all services rendered or is otherwise in breach of these Terms and Conditions), subject to any disclosure required by law or legal process.
5.3 Should the Results delivered by CTL be used by the Client or Client's client, even though subsequently determined not to meet the warranties described in these Terms and Conditions, then the compensation will be adjusted based upon mutual agreement. In no case shall the Client unreasonably withhold CTL's right to independently defend its data.
5.4 CTL reserves the right to subcontract services ordered by the Client to another laboratory or laboratories, if, in CTL's sole judgment, it is reasonably necessary, appropriate or advisable to do so, and with the Client's permission. CTL will in no way be liable for any subcontracted services and all applicable warranties, guarantees and insurance are those of the subcontracted laboratory.
5.5 CTL shall dispose of the Client's samples and extracts 30 days after the analytical report is issued, unless instructed to store them for an alternate period of time or to return such samples to the Client, in a manner consistent with U.S. Environmental Protection Agency regulations or other applicable Federal, state or local requirements. Additional charges will apply for samples or extracts stored longer than 30 days at the Clients request. Any samples for projects that are canceled or not accepted, or for which return was requested, will be returned to the Client at Client expense. CTL reserves the right to return to the Client any sample or unused portion of a sample that is not within CTL's permitted capability or the capabilities of CTL's designated waste disposal vendor(s), or will make arrangements to dispose of these samples at Client direction and expense.
5.6 Unless a different time period is agreed to in any order under these Terms and Conditions, CTL agrees to retain all records for five (5) years.
5.7 In the event that CTL is required to respond to legal process related to services for Client, Client agrees to reimburse CTL for hourly charges for personnel involved in the response and attorney fees reasonably incurred in obtaining advice concerning the response, preparation to testify, and appearances related to the legal process, travel and all reasonable expenses associated with the litigation.

6. INSURANCE

6.1 CTL shall maintain in force during the performance of services under these Terms and Conditions, Workers' Compensation and Employer's Liability Insurance in accordance with the laws of the states having jurisdiction over CTL's employees who are engaged in the performance of the work. CTL shall also maintain during such period, Comprehensive General and Contractual Liability (limit of $2,000,000 per occurrence/ aggregate), Comprehensive Automobile Liability, owned and hired, ($1,000,000 combined single limit), and Professional/Pollution Liability Insurance (limit of $5,000,000 per occurrence/aggregate). Any Client required changes to these limits or conditions will result in a change in cost to the Client.

7. AUDIT

7.1 Upon prior notice to CTL, the Client may audit and inspect CTL's records and accounts covering reimbursable costs related to work done for the Client, for a period of one (1) year after completion of the work. The purpose of any such audit shall be only for verification of such costs, and CTL shall not be required to provide access to cost records where prices are expressed as fixed fees or published unit prices.

CT Laboratories Terms and Conditions

Where a purchaser (Client) places an order for laboratory, consulting or sampling services from CT Laboratories (CTL), CTL shall provide the ordered services pursuant to these Terms and Conditions, and the related Quotation, or as agreed in a negotiated contract. In the absence of a written agreement to the contrary, the Order constitutes an acceptance by the Client of CTL's offer to do business under these Terms and Conditions, and an agreement to be bound by these Terms and Conditions. No contrary or additional terms and conditions expressed in a Client's document shall be deemed to become a part of the contract created upon acceptance of these Terms and Conditions, unless accepted by CTL in advance of the start of the project and in writing.

1. ORDERS AND RECEIPT OF SAMPLES (Sample Acceptance Policy)

1.1 The Client may place the Order (i.e., specify a Scope of Work) either by submitting a purchase order to CTL in writing, by telephone (confirmed in writing) or by negotiated contract. Whichever option the Client selects for placing the Order, the Order shall not be valid unless it contains sufficient information to enable CTL to carry out the Client's requirements. It is the policy of CTL that samples not meeting the acceptance criteria, outlined in the NELAC standards and Section 5.8.3.2 of the DOD QSM, will not be accepted by the laboratory or will be qualified on the final report. All samples submitted to the laboratory must: (a) be accompanied by proper, full and complete documentation, including sample identification, location, date and time of collection, the collector's name, type of preservation (if any), type of sample, any special comments concerning the sample and any additional pertinent fields on the chain-of-custody. In the absence of any of the required information, the laboratory will attempt to contact the client to obtain the information; if unable to obtain the necessary information, the final report will be qualified. (b) samples must be labeled appropriately with a unique sample identification written with indelible ink on water resistant labels. If the laboratory cannot determine the identity of a sample, it may be rejected and the client will be contacted for further instructions or resampling. (c) samples must be in an appropriate sample container. If the container is inappropriate, the client will be contacted for further instructions or resampling. If analysis is possible, the final report will be qualified. CTL can provide a sampling guide containing approved containers and preservations for analytical methods requested. (d) adhere to method specified holding times. If samples are received with less than ½ the holding time remaining for the requested test, CTL will make its best effort to analyze the samples and notify the client. If holding times are exceeded, the final report will be qualified. (e) contain adequate sample volume to perform the necessary testing. If sufficient volume is not present, the sample may be rejected and the client will be contacted for further instructions or resampling. If samples show signs of damage, contamination or inadequate preservation, the client will be notified. If analysis can be performed, the final report will be qualified. If not, the samples will be rejected and the client notified for further instructions or resampling. It is the Client's responsibility to understand and package samples correctly and provide the proper amount of temperature control (ice) suitable to current weather conditions.

1.2 CTL must be supplied with complete written disclosure of the known or suspected presence of any hazardous substances, as defined by applicable federal or state law. Where any samples which were not accompanied by the required disclosure, cause interruptions in the lab's ability to process work due to contamination of instruments or work areas, the Client will be responsible for the costs of clean up and recovery.

1.3 Prior to Sample Acceptance, the entire risk of loss or damage to samples remains with the Client. In no event will CTL have any responsibility or liability for the action or inaction of any carrier shipping or delivering any sample to or from CTL's premises. Client is responsible to assure that any sample containing any hazardous substance which is to be delivered to CTL's premises will be packaged, labeled, transported and delivered properly and in accordance with applicable laws.

1.4 Clients using CTL's shipping account(s) do so at their own risk and must purchase separate insurance if they do not wish to assume risk of loss. CTL will not assume any risk whatsoever for any samples outside of CTL's control and not successfully delivered to the laboratory within specified hold times.

1.5 CTL will not accept liability for any sample(s), except sample(s) damaged or broken by log-in staff prior to successful log-in of the sample(s) into the CTL- LIMS system. This includes, but may not be limited to: complete, valid COC documentation, all sample receiving issues being resolved from a delay caused by the Client in CTL's ability to log-in samples, including missed turnaround and hold times, delay in processing and, ultimately, additional charges to the Client.

1.6 CTL will only reject samples per directions from the Client. CTL's sole liability is to inform the Client of any sample receipt issues, and may provide an indication how proceeding with the analysis may affect results and final acceptance by the regulating agency. Ultimately, suitability for use is between the Client and the regulating agency(s).

1.7 Signing of this COC by the Client or Client's representative, or directions to CTL via email or Fax constitutes acceptance of these Terms and Conditions, and guarantees payment by the Client to CTL.

2. PAYMENT TERMS

2.1 Services performed by CTL will be in accordance with prices quoted and later confirmed in writing or as stated in the Price Schedule. Invoices may be submitted to Client upon completion of any sample delivery group. Payment in advance is required for all Clients except those whose credit has been established with CTL. For Clients with approved credit, payment terms are net 30 days from the date of invoice by CTL. All overdue payments are subject to an additional interest and service charge of one and one-half percent (1.5%) or the maximum rate permissible by law, per month or portion thereof from the due date until the date of payment. All fees are charged or billed directly to the Client. The billing of a third party will not be accepted without a statement, signed by the third party that acknowledges and accepts payment responsibility. CTL may suspend work and withhold delivery of data under this order at any time in the event Client fails to make timely payment of its invoices. Client shall be responsible for all costs and expenses of collection including reasonable attorney's fees. CTL reserves the right to refuse to proceed with work at any time based upon an unfavorable Client credit report.

3. CHANGE ORDERS, TERMINATION

3.1 Changes to the Scope of Work, price, or result delivery date may be initiated by CTL after Sample Acceptance due to any condition which conflicts with analytical, QA or other protocols warranted in these Terms and Conditions. CTL will not proceed with such changes until an agreement with the Client is reached on the amount of any cost, schedule change or technical change to the Scope of Work, and such agreement is documented in writing.

3.2 Changes to the Scope of Work, including but not limited to increasing or decreasing the work, changing test and analysis specification or acceleration in the performance of the work may be initiated by the Client after sample acceptance. Such a change will be documented in writing and may result in a change in cost and turnaround time commitment. CTL's acceptance of such changes is contingent upon technical feasibility and operational capacity.

3.3 Suspension or termination of all or any part of the work may be initiated by the Client. CTL will be compensated consistent with Section 2 of these Terms and Conditions. CTL will complete all work in progress and be paid in full for all work completed.

4. WARRANTIES AND LIABILITY

4.1 Where applicable, CTL will use analytical methodologies which are in substantial conformity with published test methods. CTL has implemented these methods in its Laboratory Quality Manuals and referenced Standard Operating Procedures and where the nature or composition of the sample requires it, CTL reserves the right to deviate from these methodologies as necessary or appropriate, based on the reasonable judgment of CTL, which deviations, if any, will be made on a basis consistent with recognized standards of the industry and/or CTL's Laboratory Quality Manuals. Client may request that CTL perform according to a mutually agreed Quality Assurance Project Plan (QAPP). In the event that samples arrive prior to agreement on a QAPP, CTL will proceed with analyses under its standard Quality Manuals then in effect, and CTL will not be responsible for any resampling or other charges if work must be repeated to comply with a subsequently finalized QAPP.

4.2 CTL shall start preparation and/or analysis within holding times provided that Sample Acceptance occurs within 48 hours of sampling or 1/2 of the holding time for the test, whichever is less. Samples received that do not meet this provision will be charged as expedited samples and the appropriate rate will be added accordingly. Where resolution of inconsistencies leading to Sample Acceptance does not occur within this period, CTL will use its best efforts to meet holding times and will proceed with the work provided that, in CTL's judgment, the chain-of-custody or definition of the Scope of Work provide sufficient guidance. Reanalysis of samples to comply with CTL's Quality Manuals will be deemed to have met holding times provided the initial analysis was performed within the applicable holding time. Where reanalysis demonstrates that sample matrix interference is the cause of failure to meet any Quality Manual requirements, the warranty will be deemed to have been met.

4.3 CTL warrants that it possesses and maintains all licenses and certifications which are required to perform services under these Terms and Conditions provided that such requirements are specified in writing to CTL prior to Sample Acceptance. CTL will notify the Client in writing of any decertification or revocation of any license, or notice of either, which affects work in progress.

4.4 The warranty obligations set forth in Sections 4.1, 4.2 and 4.3 are the sole and exclusive warranties given by CTL in connection with any services performed by CTL or any Results generated from such services, and CTL gives and makes NO OTHER REPRESENTATION OR WARRANTY OF ANY KIND, EXPRESS OR IMPLIED. No representative of CTL is authorized to give or make any other representation or warranty or modify this warranty in any way.

4.5 Client's sole and exclusive remedy for the breach of warranty in connection with any services performed by CTL, will be limited to repeating any services performed, contingent on the Client's providing, at the request of CTL and at the Client's expense, additional sample(s) if necessary. Any reanalysis requested by the Client generating Results consistent with the original Results will be at the Client's expense. If resampling is necessary, CTL's liability for resampling costs will be limited to actual cost or one hundred or one hundred fifty dollars ($150) per sample, whichever is less.

4.6 CTL's liability for any and all causes of action arising hereunder, whether based in contract, tort, warranty, negligence or otherwise, shall be limited to the lesser amount of compensation for the services performed or $100,000. All claims, including those for negligence, shall be deemed waived unless suit thereon is filed within one year after CTL's completion of the services. Under no circumstances, whether arising in contract, tort (including negligence), or otherwise, shall CTL be responsible for loss of use, loss of profits, or for any special, indirect, incidental or consequential damages occasioned by the services performed or by application or use of the reports prepared.

4.7 In no event shall CTL have any responsibility or liability to the Client for any failure or delay in performance by CTL which results, directly or indirectly, in whole or in part, from any cause or circumstance beyond the reasonable control of CTL. Such causes and circumstances shall include, but not be limited to, acts of God, acts of Client, acts or orders of any governmental authority, strikes or other labor disputes, natural disasters, accidents, wars, civil disturbances, equipment breakdown, matrix interference or unknown highly contaminated samples that impact instrument operation, unavailability of supplies from usual suppliers, difficulties or delays in transportation, mail or delivery services, or any other cause beyond CTL's reasonable control.

5. RESULTS, WORK PRODUCT

5.1 Data or information provided to CTL or generated by services performed under this agreement shall only become the property of the Client upon receipt in full by CTL of payment for the whole Order. Ownership of any analytical method, QA/QC protocols, software programs or equipment developed by CTL for performance of work will be retained by CTL, and Client shall not disclose such information to any third party.

5.2 Data and sample materials provided by Client or at Client's request, and the result obtained by CTL shall be held in confidence (unless such information is generally available to the public or is in the public domain or Client has failed to pay CTL for all services rendered or is otherwise in breach of these Terms and Conditions), subject to any disclosure required by law or legal process.

5.3 Should the Results delivered by CTL be used by the Client or Client's client, even though subsequently determined not to meet the warranties described in these Terms and Conditions, then the compensation will be adjusted based upon mutual agreement. In no case shall the Client unreasonably withhold CTL's right to independently defend its data.

5.4 CTL reserves the right to subcontract services ordered by the Client to another laboratory or laboratories, if, in CTL's sole judgment, it is reasonably necessary, appropriate or advisable to do so, and with the Client's permission. CTL will in no way be liable for any subcontracted services and all applicable warranties, guarantees and insurance are those of the subcontracted laboratory.

5.5 CTL shall dispose of the Client's samples and extracts 30 days after the analytical report is issued, unless instructed to store them for an alternate period of time or to return such samples to the Client, in a manner consistent with U.S. Environmental Protection Agency regulations or other applicable Federal, state or local requirements. Additional charges will apply for samples or extracts stored longer than 30 days at the Clients request. Any samples for projects that are canceled or not accepted, or for which return was requested, will be returned to the Client at Client expense. CTL reserves the right to return to the Client any sample or unused portion of a sample that is not within CTL's permitted capability or the capabilities of CTL's designated waste disposal vendor(s), or will make arrangements to dispose of these samples at Client direction and expense.

5.6 Unless a different time period is agreed to in any order under these Terms and Conditions, CTL agrees to retain all records for five (5) years.

5.7 In the event that CTL is required to respond to legal process related to services for Client, Client agrees to reimburse CTL for hourly charges for personnel involved in the response and attorney fees reasonably incurred in obtaining advice concerning the response, preparation to testify, and appearances related to the legal process, travel and all reasonable expenses associated with the litigation.

6. INSURANCE

6.1 CTL shall maintain in force during the performance of services under these Terms and Conditions, Workers' Compensation and Employer's Liability Insurance in accordance with the laws of the states having jurisdiction over CTL's employees who are engaged in the performance of the work. CTL shall also maintain during such period, Comprehensive General and Contractual Liability (limit of $2,000,000 per occurrence/ aggregate), Comprehensive Automobile Liability, owned and hired, ($1,000,000 combined single limit), and Professional/Pollution Liability Insurance (limit of $5,000,000 per occurrence/aggregate). Any Client required changes to these limits or conditions will result in a change in cost to the Client.

7. AUDIT

7.1 Upon prior notice to CTL, the Client may audit and inspect CTL's records and accounts covering reimbursable costs related to work done for the Client, for a period of one (1) year after completion of the work. The purpose of any such audit shall be only for verification of such costs, and CTL shall not be required to provide access to cost records where prices are expressed as fixed fees or published unit prices.

CT Laboratories Terms and Conditions

Where a purchaser (Client) places an order for laboratory, consulting or sampling services from CT Laboratories (CTL), CTL shall provide the ordered services pursuant to these Terms and Conditions, and the related Quotation, or as agreed in a negotiated contract. In the absence of a written agreement to the contrary, the Order constitutes an acceptance by the Client of CTL's offer to do business under these Terms and Conditions, and an agreement to be bound by these Terms and Conditions. No contrary or additional terms and conditions expressed in a Client's document shall be deemed to become a part of the contract created upon acceptance of these Terms and Conditions, unless accepted by CTL in advance of the start of the project and in writing.

1. ORDERS AND RECEIPT OF SAMPLES (Sample Acceptance Policy)

1.1 The Client may place the Order (i.e., specify a Scope of Work) either by submitting a purchase order to CTL in writing, by telephone (confirmed in writing) or by negotiated contract. Whichever option the Client selects for placing the Order, the Order shall not be valid unless it contains sufficient information to enable CTL to carry out the Client's requirements. It is the policy of CTL that samples not meeting the acceptance criteria, outlined in the NELAC standards and Section 5.8.3.2 of the DOD QSM, will not be accepted by the laboratory or will be qualified on the final report. All samples submitted to the laboratory must: (a) be accompanied by proper, full and complete documentation, including sample identification, location, date and time of collection, the collector's name, type of preservation (if any), type of sample, any special comments concerning the sample and any additional pertinent fields on the chain-of-custody. In the absence of any of the required information, the laboratory will attempt to contact the client to obtain the information; if unable to obtain the necessary information, the final report will be qualified.
(b) samples must be labeled appropriately with a unique sample identification written with indelible ink on water resistant labels. If the laboratory cannot determine the identity of a sample, it may be rejected and the client will be contacted for further instructions or resampling. (c) samples must be in an appropriate sample container. If the container is inappropriate, the client will be contacted for further instructions or resampling. If analysis is possible, the final report will be qualified. CTL can provide a sampling guide containing approved containers and preservations for analytical methods requested. (d) adhere to method specified holding times. If samples are received with less than ½ the holding time remaining for the requested test, CTL will make its best effort to analyze the samples and notify the client. If holding times are exceeded, the final report will be qualified. (e) contain adequate sample volume to perform the necessary testing. If sufficient volume is not present, the sample may be rejected and the client will be contacted for further instructions or resampling. If samples show signs of damage, contamination or inadequate preservation, the client will be notified. If analysis can be performed, the final report will be qualified. If not, the samples will be rejected and the client notified for further instructions or resampling. It is the Client's responsibility to understand and package samples correctly and provide the proper amount of temperature control (ice) suitable to current weather conditions.
1.2 CTL must be supplied with complete written disclosure of the known or suspected presence of any hazardous substances, as defined by applicable federal or state law. Where any samples which were not accompanied by the required disclosure, cause interruptions in the lab's ability to process work due to contamination of instruments or work areas, the Client will be responsible for the costs of clean up and recovery.
1.3 Prior to Sample Acceptance, the entire risk of loss or damage to samples remains with the Client. In no event will CTL have any responsibility or liability for the action or inaction of any carrier shipping or delivering any sample to or from CTL's premises. Client is responsible to assure that any sample containing any hazardous substance which is to be delivered to CTL's premises will be packaged, labeled, transported and delivered properly and in accordance with applicable laws.
1.4 Clients using CTL's shipping account(s) do so at their own risk and must purchase separate insurance if they do not wish to assume risk of loss. CTL will not assume any risk whatsoever for any samples outside of CTL's control and not successfully delivered to the laboratory within specified hold times.
1.5 CTL will not accept liability for any sample(s), except sample(s) damaged or broken by log-in staff prior to successful log-in of the sample(s) into the CTL- LIMS system. This includes, but may not be limited to: complete, valid COC documentation, all sample receiving issues being resolved from a delay caused by the Client in CTL's ability to log-in samples, including missed turnaround and hold times, delay in processing and, ultimately, additional charges to the Client.
1.6 CTL will only reject samples per directions from the Client. CTL's sole liability is to inform the Client of any sample receipt issues, and may provide an indication how proceeding with the analysis may affect results and final acceptance by the regulating agency. Ultimately, suitability for use is between the Client and the regulating agency(s).
1.7 Signing of this COC by the Client or Client's representative, or directions to CTL via email or Fax constitutes acceptance of these Terms and Conditions, and guarantees payment by the Client to CTL.

2. PAYMENT TERMS

2.1 Services performed by CTL will be in accordance with prices quoted and later confirmed in writing or as stated in the Price Schedule. Invoices may be submitted to Client upon completion of any sample delivery group. Payment in advance is required for all Clients except those whose credit has been established with CTL. For Clients with approved credit, payment terms are net 30 days from the date of invoice by CTL. All overdue payments are subject to an additional interest and service charge of one and one-half percent (1.5%) or the maximum rate permissible by law, per month or portion thereof from the due date until the date of payment. All fees are charged or billed directly to the Client. The billing of a third party will not be accepted without a statement, signed by the third party that acknowledges and accepts payment responsibility. CTL may suspend work and withhold delivery of data under this order at any time in the event Client fails to make timely payment of its invoices. Client shall be responsible for all costs and expenses of collection including reasonable attorney's fees. CTL reserves the right to refuse to proceed with work at any time based upon an unfavorable Client credit report.

3. CHANGE ORDERS, TERMINATION

3.1 Changes to the Scope of Work, price, or result delivery date may be initiated by CTL after Sample Acceptance due to any condition which conflicts with analytical, QA or other protocols warranted in these Terms and Conditions. CTL will not proceed with such changes until an agreement with the Client is reached on the amount of any cost, schedule change or technical change to the Scope of Work, and such agreement is documented in writing.
3.2 Changes to the Scope of Work, including but not limited to increasing or decreasing the work, changing test and analysis specification or acceleration in the performance of the work may be initiated by the Client after sample acceptance. Such a change will be documented in writing and may result in a change in cost and turnaround time commitment. CTL's acceptance of such changes is contingent upon technical feasibility and operational capacity.
3.3 Suspension or termination of all or any part of the work may be initiated by the Client. CTL will be compensated consistent with Section 2 of these Terms and Conditions. CTL will complete all work in progress and be paid in full for all work completed.

4. WARRANTIES AND LIABILITY

4.1 Where applicable, CTL will use analytical methodologies which are in substantial conformity with published test methods. CTL has implemented these methods in its Laboratory Quality Manuals and referenced Standard Operating Procedures and where the nature or composition of the sample requires it, CTL reserves the right to deviate from these methodologies as necessary or appropriate, based on the reasonable judgment of CTL, which deviations, if any, will be made on a basis consistent with recognized standards of the industry and/or CTL's Laboratory Quality Manuals. Client may request that CTL perform according to a mutually agreed Quality Assurance Project Plan (QAPP). In the event that samples arrive prior to agreement on a QAPP, CTL will proceed with analyses under its standard Quality Manuals then in effect, and CTL will not be responsible for any resampling or other charges if work must be repeated to comply with a subsequently finalized QAPP.
4.2 CTL shall start preparation and/or analysis within holding times provided that Sample Acceptance occurs within 48 hours of sampling or 1/2 of the holding time for the test, whichever is less. Samples received that do not meet this provision will be charged as expedited samples and the appropriate rate will be added accordingly. Where resolution of inconsistencies leading to Sample Acceptance does not occur within this period, CTL will use its best efforts to meet holding times and will proceed with the work provided that, in CTL's judgment, the chain-of-custody or definition of the Scope of Work provide sufficient guidance. Reanalysis of samples to comply with CTL's Quality Manuals will be deemed to have met holding times provided the initial analysis was performed within the applicable holding time. Where reanalysis demonstrates that sample matrix interference is the cause of failure to meet any Quality Manual requirements, the warranty will be deemed to have been met.
4.3 CTL warrants that it possesses and maintains all licenses and certifications which are required to perform services under these Terms and Conditions provided that such requirements are specified in writing to CTL prior to Sample Acceptance. CTL will notify the Client in writing of any decertification or revocation of any license, or notice of either, which affects work in progress.
4.4 The warranty obligations set forth in Sections 4.1, 4.2 and 4.3 are the sole and exclusive warranties given by CTL in connection with any services performed by CTL or any Results generated from such services, and CTL gives and makes NO OTHER REPRESENTATION OR WARRANTY OF ANY KIND, EXPRESS OR IMPLIED. No representative of CTL is authorized to give or make any other representation or warranty or modify this warranty in any way.
4.5 Client's sole and exclusive remedy for the breach of warranty in connection with any services performed by CTL, will be limited to repeating any services performed, contingent on the Client's providing, at the request of CTL and at the Client's expense, additional sample(s) if necessary. Any reanalysis requested by the Client generating Results consistent with the original Results will be at the Client's expense. If resampling is necessary, CTL's liability for resampling costs will be limited to actual cost or one hundred or one hundred fifty dollars ($150) per sample, whichever is less.
4.6 CTL's liability for any and all causes of action arising hereunder, whether based in contract, tort, warranty, negligence or otherwise, shall be limited to the lesser amount of compensation for the services performed or $100,000. All claims, including those for negligence, shall be deemed waived unless suit thereon is filed within one year after CTL's completion of the services. Under no circumstances, whether arising in contract, tort (including negligence), or otherwise, shall CTL be responsible for loss of use, loss of profits, or for any special, indirect, incidental or consequential damages occasioned by the services performed or by application or use of the reports prepared.
4.7 In no event shall CTL have any responsibility or liability to the Client for any failure or delay in performance by CTL which results, directly or indirectly, in whole or in part, from any cause or circumstance beyond the reasonable control of CTL. Such causes and circumstances shall include, but not be limited to, acts of God, acts of Client, acts or orders of any governmental authority, strikes or other labor disputes, natural disasters, accidents, wars, civil disturbances, equipment breakdown, matrix interference or unknown highly contaminated samples that impact instrument operation, unavailability of supplies from usual suppliers, difficulties or delays in transportation, mail or delivery services, or any other cause beyond CTL's reasonable control.

5. RESULTS, WORK PRODUCT

5.1 Data or information provided to CTL or generated by services performed under this agreement shall only become the property of the Client upon receipt in full by CTL of payment for the whole Order. Ownership of any analytical method, QA/QC protocols, software programs or equipment developed by CTL for performance of work will be retained by CTL, and Client shall not disclose such information to any third party.
5.2 Data and sample materials provided by Client or at Client's request, and the result obtained by CTL shall be held in confidence (unless such information is generally available to the public or is in the public domain or Client has failed to pay CTL for all services rendered or is otherwise in breach of these Terms and Conditions), subject to any disclosure required by law or legal process.
5.3 Should the Results delivered by CTL be used by the Client or Client's client, even though subsequently determined not to meet the warranties described in these Terms and Conditions, then the compensation will be adjusted based upon mutual agreement. In no case shall the Client unreasonably withhold CTL's right to independently defend its data.
5.4 CTL reserves the right to subcontract services ordered by the Client to another laboratory or laboratories, if, in CTL's sole judgment, it is reasonably necessary, appropriate or advisable to do so, and with the Client's permission. CTL will in no way be liable for any subcontracted services and all applicable warranties, guarantees and insurance are those of the subcontracted laboratory.
5.5 CTL shall dispose of the Client's samples and extracts 30 days after the analytical report is issued, unless instructed to store them for an alternate period of time or to return such samples to the Client, in a manner consistent with U.S. Environmental Protection Agency regulations or other applicable Federal, state or local requirements. Additional charges will apply for samples or extracts stored longer than 30 days at the Clients request. Any samples for projects that are canceled or not accepted, or for which return was requested, will be returned to the Client at Client expense. CTL reserves the right to return to the Client any sample or unused portion of a sample that is not within CTL's permitted capability or the capabilities of CTL's designated waste disposal vendor(s), or will make arrangements to dispose of these samples at Client direction and expense.
5.6 Unless a different time period is agreed to in any order under these Terms and Conditions, CTL agrees to retain all records for five (5) years.
5.7 In the event that CTL is required to respond to legal process related to services for Client, Client agrees to reimburse CTL for hourly charges for personnel involved in the response and attorney fees reasonably incurred in obtaining advice concerning the response, preparation to testify, and appearances related to the legal process, travel and all reasonable expenses associated with the litigation.

6. INSURANCE

6.1 CTL shall maintain in force during the performance of services under these Terms and Conditions, Workers' Compensation and Employer's Liability Insurance in accordance with the laws of the states having jurisdiction over CTL's employees who are engaged in the performance of the work. CTL shall also maintain during such period, Comprehensive General and Contractual Liability (limit of $2,000,000 per occurrence/ aggregate), Comprehensive Automobile Liability, owned and hired, ($1,000,000 combined single limit), and Professional/Pollution Liability Insurance (limit of $5,000,000 per occurrence/aggregate). Any Client required changes to these limits or conditions will result in a change in cost to the Client.

7. AUDIT

7.1 Upon prior notice to CTL, the Client may audit and inspect CTL's records and accounts covering reimbursable costs related to work done for the Client, for a period of one (1) year after completion of the work. The purpose of any such audit shall be only for verification of such costs, and CTL shall not be required to provide access to cost records where prices are expressed as fixed fees or published unit prices.

"Based on the Method Blank and LCS QC data provided and justification for switching from use of a Teflon-Coated Ball Mill to using a Puck Mill to process the Curtis Bay RI/FS ISM Soil Samples, I find the request for the change to the sample prep to be acceptable. I have a more detailed response in the form of an MFR which I have attached as a file to this email response."

Subject: [Non-DoD Source] Sample preparation for the Curtis Bay Depot

All,

ERT has contracted CT Laboratories, LLC (CT) to perform the sample preparation and analysis required for the Curtis Bay Ordnance Depot arsenic and manganese RI. After reviewing the Final UFP-QAPP, CT is concerned with processing the sample mass that will be submitted for each of the ISM soil samples collected (approximately 5-10 kg) using the Teflon-coated ball mill specified in the UFP-QAPP. CT indicates that they can process three 1-2 kg masses of soil at a time using the Teflon-coated ball mill. Each of these grind processes will take from 20-30 minutes for clay, and up to one week for sand. Soil samples collected for the RI are expected to be a mixture of sands and clays. Given the large number of soil samples that will be submitted (220+ [surface, subsurface, and QC replicates]) and the need to divide the samples into 5-10 processing masses, the sample processing using the Teflon-coated ball mill is impracticable.

In order to process the soil samples collected at the Curtis Bay Ordnance Depot, ERT and CT propose use of the puck mill for sample grinding. The puck mill is expected to grind the soil samples to the required specification in one minute or less. Use of the puck mill for soil sample grinding will allow the laboratory to process and analyze the submitted soil samples so that the project schedule is not impacted.

To validate use of the puck mill grinding method, CT performed a puck mill grind test on method blank sand materials, both as a blank and arsenic and manganese spiked laboratory control samples and analyzed all for arsenic and manganese using USEPA Method SW846 6010C with the following results:

Puck Mill Grind Test for Analytical Method SW846 6010C (one minute grind time)

The concern with use of the puck mill with soil sample submitted for analysis of manganese is adding a high bias to the sample results due to the metals makeup of the puck mill. Although low levels of manganese are detected in the method blank sample, these low levels are not expected to affect project decisions due to the magnitude of the lowest screening level (300 mg/kg, USEPA BTAG) as compared to the detected concentration in the method blank. Also note that all but one LCS recovery was within the DoD QSM QC limit.

The concern with use of the puck mill with soil sample submitted for analysis of arsenic is adding a low bias to the sample results due to volatilization of arsenic during the grinding process. Based on the LCS recoveries (all recoveries were within the DoD QSM QC limit) for arsenic, use of the puck mill for a one-minute grind cycle is not expected to adversely affect the concentrations measured in site soil samples.

Please let me know if sample preparation using the puck mill will be acceptable.

Thank you,

--

Memorandum for Record

Subject: Response to Email Message, sent 11 March 2019 from ERT on Sample Preparation on the Curtis Bay Depot RI/FS Project for Mn and As to change from processing of ISM Soil Samples from using a Teflon-Coated Ball Mill to a Puck Mill

Your request to use the puck mill for soil sample grinding in order to more efficiently process the large volume and quantities of soil samples consisting of a clay and sand mix is acceptable based on the method QC data provide for the 10 replicate method blanks and the LCS samples processed using the puck mill and analyzed for arsenic and manganese.

Based on an evaluation of the listed Measurement Performance Criteria (MPC) for the two metals in QAPP Worksheet #12, the method blank result for manganese needs to be < 1/10 the regulatory limit (or < 1/10th the amount measure in any sample [whichever is greater] per the DoD QSM). Between the writing of the Draft QAPP and then the Final version of the QAPP, two additional regulatory criteria were added to Worksheet #15: the USEPA Residential and the USEPA BTAG, with the BTAG regulatory value for Mn being the lowest at 330 mg/kg. A tenth of that value is 33 mg/kg, therefore any Method Blank analysis needs to be < 33 mg/kg for Mn. The Method Blank results presented for Mn range from 2.8 to 4.5 mg/kg which is a factor of 7x below 1/10th the Regulatory Limit. Also 9 of the 10 LCS samples spiked for Mn were within acceptable percent recovery limits with the one falling outside the QC limit at 80% which was slightly below the 85% Lower Limit.

For the Arsenic analysis, using the puck mill with a limit of a one-minute grind cycle is acceptable to prevent the puck mill from getting too hot. If another grinding cycle will be done, several minutes should be allowed for the puck mill to cool down. The puck mill should not contain arsenic as part of its elemental makeup, so that shouldn't be a contributing factor in the method blank analysis. The lowest regulatory action level listed for Arsenic in QAPP Worksheet #15 is 0.68 mg/kg, the EPA Residential value. Based on the reported method blank results, the values for arsenic are below the EPA Residential Action Limit or are non-detect.

Case Narrative

Client: ERT, Inc.
Project: Former Curtis Bay Ordnance Depot – Arsenic & Manganese RI/FS; Anne Arundel County, MD
Sample Receipt Dates: 04/02/2019, 04/03/2019, & 04/04/2019
SDG #: 143965 (Folders 143965, 144004, & 144017)

Seventy-two ISM samples were received and analyzed for Arsenic and Manganese. Prior to analysis, the ISM samples were dried, sieved, and ground following the homogenization procedure outlined by the client. The assigned sample ID number, date sampled, and date received are indicated in the attached Project Summary. The samples were received intact and at a temperature within method specified acceptance limits. A breakdown of sample receipt information can be found on the Sample Condition Report located in the last section of the data package and any exceptions are noted below. The analyses were performed following DOD QSM 5.

Manual integrations have been performed on the data provided with this package. If manual integrations were performed, a Reason #(s) was included on the raw data that corresponds to the "Index Key for Manual Integration Rationale". The raw data includes a "Before" and "After" manual integration illustration. The manual integrations were initialed and dated by the analyst, as well as, by the person reviewing the data.

Sample Analysis and Quality Control

Metals Analysis:

The samples were analyzed using US EPA Method 6010C (ICP Metals). Any samples that had an Arsenic result less than the LOQ on the ICP (6010C) analysis were re-logged for GFAA (7010) Arsenic analysis in order to meet the RSL. Per the client's request, both the GFAA and the ICP Arsenic results were reported when both procedures were performed. All samples were analyzed within the holding time. The following summaries of quality control procedures are included:

Initial and Continuing Calibration Verification
Blanks Summary
ICP Interference Check Data
Spike Sample Recovery
Duplicates Data
Laboratory Control Sample Data
Analysis Run Log

ICP Arsenic & Manganese (6010C) Soil Analysis

Continuing Calibration Verification (CCV) standards were analyzed at two levels (CCV1 & CCV2) with potentially differing wavelengths. Data associated with CCV's were evaluated based on the concentration of the element in the samples and compared to the appropriate CCV level/wavelength.

Some samples may have been analyzed and/or reanalyzed diluted to obtain results for all target analytes within the calibration range of the instrument.

Analytical Run # 159931

Manganese was detected in the Method Blank (MB) above the Method Detection Limit (MDL) and greater than ½ the Reporting Limit (RL). The samples were reported and not qualified because the MB result was less than 1/10th of the sample results.

The Duplicate (DUP) for sample # 259433 was not acceptable for arsenic and manganese because the results exceeded the Relative Percent Difference (RPD) limit. The parent sample was reported and qualified with a "Y" flag for the failing elements.

The Matrix Spike (MS) and Matrix Spike Duplicate (MSD) for sample # 259433 had outside recoveries for manganese. A PDS was analyzed and was acceptable. The parent sample was reported and not qualified.

The DUP and Triplicate (TRIP) for sample # 259434 were not acceptable for manganese because the results exceeded the RPD limit. The parent sample was reported and qualified with a "Y" flag for the failing element.

The MS and MSD for sample # 259434 had outside recoveries for manganese. A PDS was analyzed and was acceptable. The parent sample was reported and not qualified.

The DUP and TRIP for sample # 259465 were not applicable for arsenic because the parent sample result was less than five times the Limit of Quantitation (LOQ). The parent sample was reported and not qualified.

Analytical Run # 160109

The Laboratory Control Sample (LCS) was reanalyzed for manganese and was acceptable.

Manganese was detected in the MB above the MDL and greater than ½ the RL. The affected samples were reported and qualified with a "B" flag when the MB result was greater than 1/10th of the sample results.

The DUP and TRIP for sample # 260924 were not applicable for arsenic because the parent sample result was less than five times the LOQ. An MSD was analyzed to demonstrate precision and was acceptable. The parent sample was reported and not qualified.

The DUP and TRIP for sample # 260925 were not applicable for arsenic because the parent sample result was less than five times the LOQ. An MSD was analyzed to demonstrate precision and was acceptable. The parent sample was reported and not qualified.

The TRIP for sample # 260925 was not acceptable for manganese because the result exceeded the RPD limit. The parent sample was reported and qualified with a "Y" flag for the failing element.

Analytical Run # 160126

Arsenic was detected in the MB greater than the MDL but less than ½ the RL. The samples were reported and not qualified because the MB arsenic result was less than 1/10th of the results.

Manganese was detected in the MB above the MDL and greater than ½ the RL. The affected samples were reported and qualified with a "B" flag when the MB result was greater than 1/10th of the sample results.

The TRIP for sample # 259469 was not acceptable for arsenic because the result exceeded the RPD limit. The parent sample was reported and qualified with a "Y" flag for the failing element.

The TRIP for sample # 259470 was not acceptable for arsenic because the result exceeded the RPD limit. The parent sample was reported and qualified with a "Y" flag for the failing element.

Analytical Run # 160127

Arsenic was detected in the MB greater than the MDL but less than ½ the RL. The samples were reported and not qualified because the MB arsenic result was less than 1/10th of the results.

Manganese was detected in the MB above the MDL and greater than ½ the RL. The affected samples were reported and qualified with a "B" flag when the MB result was greater than 1/10th of the sample results.

GFAA Arsenic (7010) Soil Analysis

Analytical Run # 160412

Arsenic was detected in the MB above the MDL and greater than ½ the RL. The samples were reported and qualified with a "B" flag when the MB result was greater than 1/10th of the sample results.

The DUP and TRIP for sample # 259436 were not applicable for arsenic because the parent sample result was less than five times the LOQ. The parent sample was reported and not qualified.

The samples were diluted for analysis to reduce the background signal to less than 1.0. The samples were reported and qualified with a "V" flag when the final results were less than the adjusted RL.

C	Toxicity present in BOD sample.
D	Diluted Out.
E	Safe, No Total Coliform detected.
F	Unsafe, Total Coliform detected, no E. Coli detected.
G	Unsafe, Total Coliform detected and E. Coli detected.
H	Holding time exceeded.
J	Estimated value.
L	Significant peaks were detected outside the chromatographic window.
M	Matrix spike and/or Matrix Spike Duplicate recovery outside acceptance limits.
N	Insufficient BOD oxygen depletion.
O	Complete BOD oxygen depletion.
P	Concentration of analyte differs more than 40% between primary and confirmation analysis.
Q	Laboratory Control Sample outside acceptance limits.
R	See Narrative at end of report.
S	Surrogate standard recovery outside acceptance limits due to apparent matrix effects.
T	Sample received with improper preservation or temperature.
U	Analyte concentration was not above the detection level.
V	Raised Quantitation or Reporting Limit due to limited sample amount or dilution for matrix background interference.
W	Sample amount received was below program minimum.
X	Analyte exceeded calibration range.
Y	Replicate/Duplicate precision outside acceptance limits.
Z	Calibration criteria exceeded.

MANUAL INTEGRATION REASON CODES

CTLaboratories has identified four general cases with valid reasons supporting the use of manual integration techniques. These codes are used on chromatograms in this data package to document the reasons for manual integrations per CTLaboratories' SOP SS-10 current revision.

#1: **Data system failed to select the correct peak or missed the peak entirely.**
In some cases the chromatography system selects and integrates the "wrong peak". In this case the analyst must correct the selection and force the system to integrate the proper peak. In other instances the system may miss the peak completely. In this case the analyst manually integrated the peak

#2: **Data System Splits the Peak Incorrectly or Integrates a False Peak as a Rider Peak.**
This phenomenon is common at low concentrations where the signal to noise ratio is low. A single compound (peak) is incorrectly split into multiple peaks or integrated as a main peak with one or more rider peaks resulting in low or high area counts for the target compound.

#3: Improperly Integrated Isomers and/or coeluting compounds.
For when the system fails to distinguish coeluting compounds and or isomers. The integration areas and concentrations may be inaccurate, and they must be corrected by manual integration. Prime examples are compounds that are unresolved and integrated improperly when present at low concentrations in standards or samples.

#4: System Established Incorrect Baseline.
There are numerous situations in chromatography where the system establishes the baseline incorrectly. Some baseline errors will be obvious to the analyst and may be corrected via manual procedures.

#5: Miscellaneous.
Some situations involving integration errors may require in-depth review and technical judgment. These cases should be brought to the attention of the group supervisor. If the form of manual integration is not clearly covered by these four cases, then review and approval by the group supervisor or the *QA/QC* Supervisor will be required.

Analyte	Analysis Date/Time	Measured Concentration	C***	Detection Limit**	Control Limit	
Arsenic	05/02/2019 14:29	0.15		0.04	0.08	FAIL

** Detection Limit only reported if value was less than the control limit.
***A "U" indicates the analyte was not detected in the method blank at the detection limit or the Control Limit whichever was less.

CT LABORATORIES
delivering more than data from your environmental analyses

Operator Name: [redacted]
Results File: [redacted]slr

Report Date: 05/03/2019 06:45:17

General Parameters

Method : Arsenic
Operator : [redacted]
Instrument Mode: Furnace
Autosampler : Furnace

Analysis Details

Analysis Name: Analysis 3 05/02/2019
Spectrometer: M Series 650779 v1.30
Operator Name: [redacted]

Reagent Details

Reagent	Reagent Name
Matrix Modifier 1	M13557

Spectrometer Parameters - As

Element: As
Measurement Mode: Absorbance
Wavelength: 193.7nm
Bandpass: 0.5nm
Lamp Current: 80%
Background Correction: Zeeman
High Resolution: Off
Optimise Spectrometer Parameters: No
Signal Type: Transient
Transient Type: Area
Number Of Resamples: 2
Measurement Time: 3.5secs
Flier Mode: No
Measure Peak From: 0.75
To: 2.50secs
Use RSD Test: No

Furnace Parameters - As

Cuvette Type: Omega
Injection Temperature: 20°C

Furnace Programme (130.6secs)

Phase	Temp (°C)	Time (sec)	Ramp (°C/sec)	Gas Type	Gas Flow	Commands
1	110	20.0	100	1	0.2L/min	
2	130	30.0	1	1	0.2L/min	
3	300	10.0	50	1	0.2L/min	
4	1100	20.0	100	2	0.2L/min	NL
5	2600	3.5	0	2	Off	RD TC
6	2800	3.5	0	2	0.3L/min	TC

Sampling Parameters - As

Sampling: Furnace
Automatic Spike Prep: 20.0µL
Working Volume: 20.0µL
Sample Volume: 20.0µL

Matrix Modifiers

Modifier	Method	Volume	Order
1 M13557	Wet-mixed	5.0µL	1
2	None	20.0µL	2
3	None	20.0µL	3
4	None	20.0µL	4
5	None	20.0µL	5
6	None	20.0µL	6

Sample Preparation: Int. Dilution
Intelligent Dilution Threshold: 90%
Standard Preparation: Fixed
Std Additions: None
Slow Solution Uptake: No
Slow Injection: No
Sampling Delay: No
Number Of Washes: 2

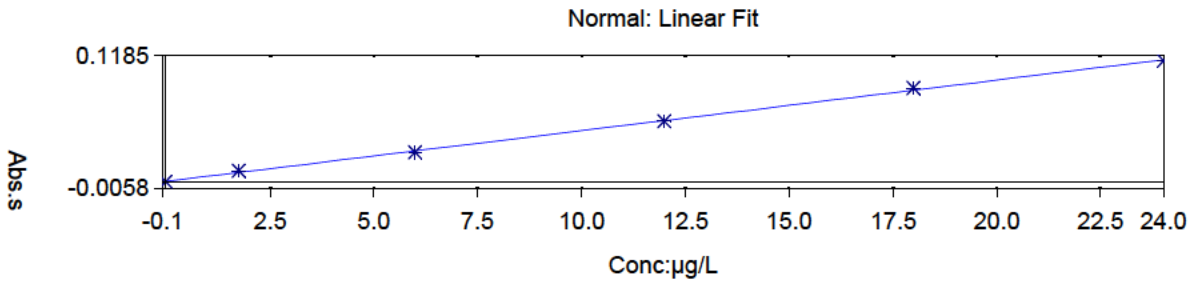
SOLAAR AA Report

Operator Name: [redacted]
Results File: [redacted]slr

Report Date: 05/03/2019 06:45:17

Calibration Parameters - As

Calibration Mode: Normal
Concentration Units: µg/L
Acceptable Fit: 0.995
Master Standard: 25.0000
Line Fit: Linear
Scaled Units: µg/L
Rescale Limit: 10.0%
Use Stored Calibration: No
Scaling Factor: 1.0000
Failure Action: Retest



Standard 1	1.7500	Standard 4	18.0000
Standard 2	6.0000	Standard 5	24.0000
Standard 3	12.0000		

QC Parameters - As

Test	Conc:µg/L	Limits	Action	Repeat
CCB	0.5000	-0.010 to 0.100Abs.s	Retest	Continue
ICV	10.0000	90.0 to 110.0%	Retest	Continue
CCV	10.0000	90.0 to 110.0%	Retest	Continue
QC Anal Spike	10.0000	85.0 to 115.0%	Retest	Continue

Solution Results - As

Y = 0.00472x + 0.0003
Fit: 0.9992
Characteristic Conc: 0.9317

Prep:

Using 1 L volumetric flasks, pipetted the following and brought up to volume using milli-Q H_2O.
(5% HNO_3, 5% HCl)
1000 ug/L Std. - **10 mL** of Custom Assurance Std. #23 (100 mg/L Al, As, B, Ba, Ca, Co, Cr, Cu, Fe, Li, Mg, Mn, Mo, Ni, Pb, Sb, Se, Sn, Sr, Ti, Tl, V, Zn) M13518 , **10 mL** of Custom Assurance Std. #3 (100 mg/L Ag, Be, Cd) M13506 and **1 mL** of Si (1000 mg/L) M13394 and 1 mL M13203 Ce
0.25 ug/L Std. - **0.25 mL** of the 1000 ug/L Std.
0.5 ug/L Std. - **0.5 mL** of the 1000 ug/L Std.
1 ug/L Std. - **1 mL** of the 1000 ug/L Std.
5 ug/L Std. - **5 mL** of the 1000 ug/L Std.
10 ug/L Std. - **10 mL** of the 1000 ug/L Std.
20 ug/L Std. - **20 mL** of the 1000 ug/L Std.
50 ug/L Std. - **50 mL** of the 1000 ug/L Std.
100 ug/L Std. - **1 mL** of Custom Assurance Std. (CAS) #23 and **1 mL** of CAS #3
10,000 ug/L Std. - **100 mL** CAS #23, **100 mL** CAS #3 and **1 mL** of K (10,000 mg/L) M13465 .
100k ug/L Std. - **10 mL** of Cu (10,000 mg/L) M13166 , **10 mL** of Mn (10,000 mg/L) M13167 , **10 mL** of Cr (10,000 mg/L) M13165 , **10 mL** Pb (10,000 mg/L) M13169 , **10 mL** of Zn (10,000 mg/L) M13168 and **10 mL** of Na (10,000 mg/L) M13461 .
100,000 ug/L Std. - **10 mL** of Mg (10,000 mg/L) M13319 , **10 mL** of Fe (10,000 mg/L) M13463 , **10 mL** of Ca (10,000 mg/L) M13467 and **10 mL** Al (10,000 mg/L) M13462 .
500,000 ug/L Std. - **50 mL** of Mg (10,000 mg/L), **50 mL** of Fe (10,000 mg/L), **50 mL** of Ca (10,000 mg/L) and **50 mL** of Al (10,000 mg/L)
1000k ug/L Std. - **100 mL** of Mg (10,000 mg/L), **100 mL** of Fe (10,000 mg/L), **100 mL** of Ca (10,000 mg/L) and **100 mL** of Al (10,000 mg/L)

		Instrument:	ICP 6000
Standard Log #:	M13438	Standard:	Sulfur ICAL
Analyst:	[redacted]	Concentrations:	1000 10,000 100,000 1000K µg/L (S)
Prep Date:	04/11/2018	Expiration Date:	07/2019
Prep:	Into four, 100 mL volumetric flasks, pipetted the following from stock standard S (10,000 µg/mL) M13391 and brought up to volume using milli-Q H_2O. *1000 ug/L std.* - **0.01 mL** *10,000 ug/L std.* - **0.1 mL** *100,000 ug/L std.* **-1.0 mL**, also used as the CCV *1000K ug/L std.* - **10 mL**		

		Instrument:	ICP 6000
Standard Log #:	M13439	Standard:	Sulfur ICV
Analyst:	[redacted]	Concentrations:	100,000 µg/L (S)
Prep Date:	04/11/2018	Expiration Date:	01/19/2019
Prep:	Into a 100 mL volumetric flask, pipetted **1.0 mL** of S (10,000 µg/mL) M13280 and brought up to volume using Milli-Q H_2O.		

Standard Log #:	M13437	Instrument:	ICP
Analyst:	[redacted]	Standard:	LOQ 3050 B&Si Spiking Solution
Prep Date:	04/10/2018	Expiration Date:	07/19

Prep:

Into a 1 L volumetric flask, pipetted the following and brought up to volume with Milli-Q H_2O. (5% HNO_3)

Analyte	Final MDL Conc. (ug/L)	Std. ID #	Std. Conc. (mg/L)	Volume (mL) pipetted
B	52	M13390	1000	2.6
Si	192	M13394	1000	9.6

Of this base standard, pipetted **1 mL** into a 50 mL digestion tube for a digested working standard.

Prep:

Using 1 L volumetric flasks, pipetted the following and brought up to volume using milli-Q H_2O.
(5% HNO_3, 5% HCl)
1000 ug/L Std. - **10 mL** of Custom Assurance Std. #23 (100 mg/L Al, As, B, Ba, Ca, Co, Cr, Cu, Fe, Li, Mg, Mn, Mo, Ni, Pb, Sb, Se, Sn, Sr, Ti, Tl, V, Zn) M13252 , **10 mL** of Custom Assurance Std. #3 (100 mg/L Ag, Be, Cd) M13217 and **1 mL** of Si (1000 mg/L) M13085 and 1 mL M13203 Ce
0.25 ug/L Std. - **0.25 mL** of the 1000 ug/L Std.
0.5 ug/L Std. - **0.5 mL** of the 1000 ug/L Std.
1 ug/L Std. - **1 mL** of the 1000 ug/L Std.
5 ug/L Std. - **5 mL** of the 1000 ug/L Std.
10 ug/L Std. - **10 mL** of the 1000 ug/L Std.
20 ug/L Std. - **20 mL** of the 1000 ug/L Std.
50 ug/L Std. - **50 mL** of the 1000 ug/L Std.
100 ug/L Std. - **1 mL** of Custom Assurance Std. (CAS) #23 and **1 mL** of CAS #3
10,000 ug/L Std. - **100 mL** CAS #23, **100 mL** CAS #3 and **1 mL** of K (10,000 mg/L) M13233 .
100k ug/L Std. - **10 mL** of Cu (10,000 mg/L) M13166 , **10 mL** of Mn (10,000 mg/L) M13167 , **10 mL** of Cr (10,000 mg/L) M13165 , **10 mL** Pb (10,000 mg/L) M13169 , **10 mL** of Zn (10,000 mg/L) M13168 and **10 mL** of Na (10,000 mg/L) M13135 .
100,000 ug/L Std. - **10 mL** of Mg (10,000 mg/L) M13236 , **10 mL** of Fe (10,000 mg/L) M13235 , **10 mL** of Ca (10,000 mg/L) M13237 and **10 mL** Al (10,000 mg/L) M13232 .
500,000 ug/L Std. - **50 mL** of Mg (10,000 mg/L), **50 mL** of Fe (10,000 mg/L), **50 mL** of Ca (10,000 mg/L) and **50 mL** of Al (10,000 mg/L)
1000k ug/L Std. - **100 mL** of Mg (10,000 mg/L), **100 mL** of Fe (10,000 mg/L), **100 mL** of Ca (10,000 mg/L) and **100 mL** of Al (10,000 mg/L)

		Method: Multi-Incremental Soil Homogenization (8330B Explosives)			
LIMS Run #(s)	**Analysis Date**	**Analyst / Data Interpreter**	**Independent Reviewer**	**Date of Review**	**Approved? (Yes or No)**
160354	04/13/2019 - 04/19/2019	[redacted]	[redacted]	04/22/2019	Yes

Instructions: Complete one checklist per *analytical run* . Enter the appropriate response for each question.
Each "No" response requires an explanation in the Comments section, and may require the initiation of a Nonconformance Report.

Requirement:	**Acceptance Criteria**	**Analyst Review**		**Independent Review**		**Comments:**
		Yes	No	Yes	No	(indicate reference to an attachment if necessary)
1. Were samples dried to a constant weight?	Dry and crumbly to the touch and % Solids >95%	Yes		Yes		If No: See PM for further instruction
2. Was the date and time recorded for each sample on the bench sheet?	---	Yes		Yes		If No: Enter the dates and times
3. Was the ambient temperature recorded on the bench sheet?	Should be recorded daily	Yes		Yes		If No: Check daily temperature logbook to find the ambient temperature and record on the bench sheet.
4. Were all the samples sieved and ground?	---	Yes		Yes		
5. Was the initial sample weight recorded on the bench sheet for all samples?	---	Yes		Yes		
6. Was the amount of sample retained on the #10 Sieve recorded on the bench sheet for each sample?	---	Yes		Yes		
7. Were multiple grinds required?	---		No		No	If Yes: Notify the PM
8. Was a grinding (sand) blank processed at the appropriate frequency?	One after every 10 samples or project/program-specific frequency	Yes		Yes		If No: Grind the appropriate number of sand blanks for the current batch of samples
9. Are all samples on the job lists accounted for?	---	Yes		Yes		If No: Analyze samples that were missed.
10. Were nonconformities (if applicable) documented in the NCR spreadsheet?	---	Yes		Yes		If No: Enter nonconformities into the NCR spreadsheet before data review/validation.

Matrix: S-Soil Slg-Sludge GW-GroundWater M-Misc Waste SW-Surface Water A-Air WW-WasteWater DW-Drinking Water SD=Sediment Leachate=LE

		Method: Multi-Incremental Soil Homogenization (8330B Explosives)			
LIMS Run #(s)	**Analysis Date**	**Analyst / Data Interpreter**	**Independent Reviewer**	**Date of Review**	**Approved? (Yes or No)**
160404	04/19/2019	[redacted]	[redacted]	04/22/2019	Yes

Instructions: Complete one checklist per *analytical run* . Enter the appropriate response for each question.
Each "No" response requires an explanation in the Comments section, and may require the initiation of a Nonconformance Report.

Requirement:	**Acceptance Criteria**	**Analyst Review**		**Independent Review**		**Comments:**
		Yes	No	Yes	No	(indicate reference to an attachment if necessary)
1. Were samples dried to a constant weight?	Dry and crumbly to the touch and % Solids >95%	Yes		Yes		If No: See PM for further instruction
2. Was the date and time recorded for each sample on the bench sheet?	---	Yes		Yes		If No: Enter the dates and times
3. Was the ambient temperature recorded on the bench sheet?	Should be recorded daily	Yes		Yes		If No: Check daily temperature logbook to find the ambient temperature and record on the bench sheet.
4. Were all the samples sieved and ground?	---	Yes		Yes		
5. Was the initial sample weight recorded on the bench sheet for all samples?	---	Yes		Yes		
6. Was the amount of sample retained on the #10 Sieve recorded on the bench sheet for each sample?	---	Yes		Yes		
7. Were multiple grinds required?	---		No		No	If Yes: Notify the PM
8. Was a grinding (sand) blank processed at the appropriate frequency?	One after every 10 samples or project/program-specific frequency	Yes		Yes		If No: Grind the appropriate number of sand blanks for the current batch of samples
9. Are all samples on the job lists accounted for?	---	Yes		Yes		If No: Analyze samples that were missed.
10. Were nonconformities (if applicable) documented in the NCR spreadsheet?	---	Yes		Yes		If No: Enter nonconformities into the NCR spreadsheet before data review/validation.

"Based on the Method Blank and LCS QC data provided and justification for switching from use of a Teflon-Coated Ball Mill to using a Puck Mill to process the Curtis Bay RI/FS ISM Soil Samples, I find the request for the change to the sample prep to be acceptable. I have a more detailed response in the form of an MFR which I have attached as a file to this email response."

Subject: [Non-DoD Source] Sample preparation for the Curtis Bay Depot

All,

ERT has contracted CT Laboratories, LLC (CT) to perform the sample preparation and analysis required for the Curtis Bay Ordnance Depot arsenic and manganese RI. After reviewing the Final UFP-QAPP, CT is concerned with processing the sample mass that will be submitted for each of the ISM soil samples collected (approximately 5-10 kg) using the Teflon-coated ball mill specified in the UFP-QAPP. CT indicates that they can process three 1-2 kg masses of soil at a time using the Teflon-coated ball mill. Each of these grind processes will take from 20-30 minutes for clay, and up to one week for sand. Soil samples collected for the RI are expected to be a mixture of sands and clays. Given the large number of soil samples that will be submitted (220+ [surface, subsurface, and QC replicates]) and the need to divide the samples into 5-10 processing masses, the sample processing using the Teflon-coated ball mill is impracticable.

In order to process the soil samples collected at the Curtis Bay Ordnance Depot, ERT and CT propose use of the puck mill for sample grinding. The puck mill is expected to grind the soil samples to the required specification in one minute or less. Use of the puck mill for soil sample grinding will allow the laboratory to process and analyze the submitted soil samples so that the project schedule is not impacted.

To validate use of the puck mill grinding method, CT performed a puck mill grind test on method blank sand materials, both as a blank and arsenic and manganese spiked laboratory control samples and analyzed all for arsenic and manganese using USEPA Method SW846 6010C with the following results:

Puck Mill Grind Test for Analytical Method SW846 6010C (one minute grind time)

Replicate

Method Blank (mg/kg)

The concern with use of the puck mill with soil sample submitted for analysis of manganese is adding a high bias to the sample results due to the metals makeup of the puck mill. Although low levels of manganese are detected in the method blank sample, these low levels are not expected to affect project decisions due to the magnitude of the lowest screening level (300 mg/kg, USEPA BTAG) as compared to the detected concentration in the method blank. Also note that all but one LCS recovery was within the DoD QSM QC limit.

The concern with use of the puck mill with soil sample submitted for analysis of arsenic is adding a low bias to the sample results due to volatilization of arsenic during the grinding process. Based on the LCS recoveries (all recoveries were within the DoD QSM QC limit) for arsenic, use of the puck mill for a one-minute grind cycle is not expected to adversely affect the concentrations measured in site soil samples.

Please let me know if sample preparation using the puck mill will be acceptable.

Thank you,

Memorandum for Record

Subject: Response to Email Message, sent 11 March 2019 from ERT on Sample Preparation on the Curtis Bay Depot RI/FS Project for Mn and As to change from processing of ISM Soil Samples from using a Teflon-Coated Ball Mill to a Puck Mill

Your request to use the puck mill for soil sample grinding in order to more efficiently process the large volume and quantities of soil samples consisting of a clay and sand mix is acceptable based on the method QC data provide for the 10 replicate method blanks and the LCS samples processed using the puck mill and analyzed for arsenic and manganese.

Based on an evaluation of the listed Measurement Performance Criteria (MPC) for the two metals in QAPP Worksheet #12, the method blank result for manganese needs to be < 1/10 the regulatory limit (or < 1/10th the amount measure in any sample [whichever is greater] per the DoD QSM). Between the writing of the Draft QAPP and then the Final version of the QAPP, two additional regulatory criteria were added to Worksheet #15: the USEPA Residential and the USEPA BTAG, with the BTAG regulatory value for Mn being the lowest at 330 mg/kg. A tenth of that value is 33 mg/kg, therefore any Method Blank analysis needs to be < 33 mg/kg for Mn. The Method Blank results presented for Mn range from 2.8 to 4.5 mg/kg which is a factor of 7x below 1/10th the Regulatory Limit. Also 9 of the 10 LCS samples spiked for Mn were within acceptable percent recovery limits with the one falling outside the QC limit at 80% which was slightly below the 85% Lower Limit.

For the Arsenic analysis, using the puck mill with a limit of a one-minute grind cycle is acceptable to prevent the puck mill from getting too hot. If another grinding cycle will be done, several minutes should be allowed for the puck mill to cool down. The puck mill should not contain arsenic as part of its elemental makeup, so that shouldn't be a contributing factor in the method blank analysis. The lowest regulatory action level listed for Arsenic in QAPP Worksheet #15 is 0.68 mg/kg, the EPA Residential value. Based on the reported method blank results, the values for arsenic are below the EPA Residential Action Limit or are non-detect.

APPENDIX E: PHOTO LOG

This Page Intentionally Left Blank

1. Panorama of part of DU3, facing north at center. Date: 11 March 2019.

2. Small arms debris within DU3-SU07. Date: 11 March 2019.

3. Artesian well along NE fence at DU2. Date: 11 March 2019.

4. Railroad spur within DU1-SU09. 4 flags were offset away from the tracks/gravel. Date: 12 March 2019.

5. Panorama of DU1-SU11. Original location overlapped with “K9” building at left, as well as paved area adjacent to it. Offset the grid to the south in the brush shown at center. Date: 12 March 2019.

6. Panorama of DU1-SU51, from near northwest corner, facing southeast at center. Many flags were originally located on the other side of fence shown at left and were relocated into grass on north side of fence. Date: 12 March 2019.

6. Panorama of DU1- SU08, from near southwest corner. Note railroad tracks at left. Date: 12 March 2019.

7. Woodward, Cote, and Watson sampling in DU1-SU51. Notice the proximity of railroad tracks, and barbwire fence. Date: 12 March 2019.

8., 9., 10., and 11. Woodward, Cote, and Watson sampling in DU1-SU51. Date: 12 March 2019.

12. Panorama of DU1-SU14, from near southwest corner. Date: 13 March 2019.

13. Photo of ditch, RR tracks, and asphalt on east side of DU1-SU14. Flags on or east of ditch were relocated to west side of grid. Date: 13 March 2019.

14. Photo of DU1-SU 14, facing east. Date: 13 March 2019.

15. Panorama of relocated DU1-SU12, from NW corner (facing SE at center). Building 911 in background. The grid was shifted 236 feet due south from planned location. Date: 13 March 2019.

16. Staking sample points in DU2-SU1 using RTK GPS. Woodward at left, Cote at right. Date: 13 March 2019.

17. Panorama of DU2-SU1 from NW corner. Date: 13 March 2019.

18.and 19. Photos showing water line painted out in blue in DU3. An electric line is apparently colinear with it. Note fire hydrants in right photo.
Date: 14 March 2019.

20. Panorama of DU1-SU30, facing east in center, from concrete platform of adjacent building. There is asphalt/gravel in the apparently grassy areas.
Date: 14 March 2019.

21. Panorama of DU1-SU27 (as proposed), facing northwest in center. Date: 14 March 2019.

22. Panorama of DU1-SU37 (as proposed), facing southeast in center, from asphalt pad west of the grid. Date: 14 March 2019.

23. Panorama of DU1-SU28, facing north from the road to the south of it. ERT moved the grid from proposed location into this field. Date: 14 March 2019.

24. Panorama of DU1-SU18, from south edge of SU18, facing nearly north at center. DU1-SU15 is in the distance to the left. Both areas are mostly covered with asphalt or thick gravel. Date: 14 March 2019.

25. Panorama showing parts of DU1-SU32 and SU33, facing east in center. This is the valley bottom of the unnamed drainage flowing south. Koroncai and Watson visible right of center, still flagging points with the Geode GPS. Date: 14 March 2019.

26. Panorama showing DU1-SU50 (as proposed), facing southwest in center. Date: 14 March 2019.

27. Panorama showing DU1-SU48 (as proposed), facing northwest in center. Date: 14 March 2019.

28. Panorama showing DU1-SU44 (as proposed), facing northwest in center. Date: 14 March 2019.

29. Photo of small arms debris in DU3-SU07, facing approximately southwest. Date: 18 March 2019.

30. Photo of old road running through DU1-SU24, facing approximately northeast. [redacted] of USACE at left, Woodward and Cote at right. Date: 26 March 2019.

31.32. [redacted] of USACE observing [redacted] and Ryan of A-Zone drilling in DU3-SU08. Date: 26 March 2019.

33. Example of samples within step probes. Surface interval at bottom, deep interval at top. This sample was collected at DU1-SU17. Date: 26 March 2019.

34. Panorama of DU1-SU13, from NE corner (facing SW at center). Note small pond at left. Some points were offset to north to avoid the pond. Date: 27 March 2019.

35. Panorama of DU1-SU16, from NW corner (facing SE at center). Old road at right. Date: 27 March 2019.

36. Panorama of DU1-SU17, from SW corner (facing NE at center). Sampled 26 March, so flags have been removed. Date: 27 March 2019.

37. Panorama of DU1-SU26, from top of revetment to the west. Date: 27 March 2019.

38. Panorama of DU1-SU26, from SW corner (facing NE at center). Date: 27 March 2019.

39. Panorama of DU1-SU19, from SW corner (facing NE at center). Note building foundation and ruins at right. Date: 27 March 2019.

40. Panorama of DU1-SU21, from SE corner (facing NW at center). Note fence at right. Date: 27 March 2019.

41.and 42. DU4-SU5 & SU4: Inside of retaining pond. Date: 03 April 2019

43. and 44. DU4-SU2 & SU1 flagged, and sampling. You can see Cote and Woodward in the middle on top of the hill in left picture. Date: 03 April 2019

45.and 46. Sampling DU4-SU2. Date: 03 April 2019

47.and 48. Packaging samples for shipment. Cooler contained 8 samples. Date: 03 April 2019

49. and 50. DU2-SU17. Dense stand of Bradford Pears. Date: 03 April 2019

51. and 52. DU2-SU7. Dense stand of Bradford Pears. Date: 03 April 2019

ERT DAILY FIELD REPORT

Project: Curtis Bay Depot RI/FS	**Date: 03/13/2019**
Report Number: 003	Prepared By: [redacted]
Time of Arrival at Site: 0700	Time of Departure from Site: 1700
Time of Safety Brief: 0715	
Weather/Site Conditions:	
Weather: 51 °F, partly cloudy	
Personnel On-Site:	
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT
Equipment Quality Control:	
GPS Morning: Pass	GPS Afternoon: Pass
Site Activities Conducted:	
Mobilized onsite. Conducted daily health and safety brief. Continued sample collection at DU-1. Samples collected are noted in Tables 1-4, below. Sampling equipment (step probes) damaged mid-day, ceased sample collection. Began marking out sampling locations within SUs in DU1.	
Issues Encountered and Resolutions:	
Sampling equipment damaged, replacement equipment ordered.	
Planned Activities:	
Continue mark out of SU locations in DUs.

ERT DAILY FIELD REPORT

Project: Curtis Bay Depot RI/FS	**Date: 03/19/2019**
Report Number: 006	Prepared By: [redacted]
Time of Arrival at Site: 0700	Time of Departure from Site: 1845
Time of Safety Brief: 0715	
Weather/Site Conditions:	
Weather: 46 °F, partly sunny	
Personnel On-Site:	
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT – Field Audit
Equipment Quality Control:	
GPS Morning: Pass	GPS Afternoon: Pass
Site Activities Conducted:	
Mobilized onsite. Conducted daily health and safety brief. Continued sample collection at DU-1. Samples collected are noted in Tables 1-4, below. [redacted] conducted an audit of the field sampling activities.	
Issues Encountered and Resolutions:	
ERT staff was departing site at approximately 1650 hours. However, the gate at the entrance of 720 Ordnance Road was locked. The other gate into the Reserve Center was also locked. The field team contacted [redacted] (Senior ERT PM) who contacted the ERT project manager, [redacted] Ms. [redacted] attempted to call the GSA POC and left a message regarding the locked gate issue. Ms. [redacted] and [redacted] advised the field team to cut the lock and replace it with an ERT lock.	
Planned Activities:	
Continue sample collection in DU1.

ERT DAILY FIELD REPORT

Project: Curtis Bay Depot RI/FS	**Date: 03/20/2019**
Report Number: 007	Prepared By: [redacted]
Time of Arrival at Site: 0700	Time of Departure from Site: 1500
Time of Safety Brief: 0715	
Weather/Site Conditions:	
Weather: 55 °F, partly sunny	
Personnel On-Site:	
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT
Equipment Quality Control:	
GPS Morning: Pass	GPS Afternoon: Pass
Site Activities Conducted:	
Mobilized onsite. Conducted daily health and safety brief. Continued sample collection at DU-1, and DU-3. Team switched to DU3 to support A-Zone in areas where the drill rig would have trouble sampling (e.g., dense trees, extremely wet areas). Samples collected are noted in Tables 1-4, below.	
Issues Encountered and Resolutions:	
None.	
Planned Activities:	
Continue sample collection in DU1.	

Tables 1through 4 included below

ERT DAILY FIELD REPORT

Project: Curtis Bay Depot RI/FS	**Date: 03/22/2019**
Report Number: 009	Prepared By: [redacted]
Time of Arrival at Site: 0700	Time of Departure from Site: 1700
Time of Safety Brief: 0715	
Weather/Site Conditions:	
Weather: 48 °F, partly sunny	
Personnel On-Site:	
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT
Equipment Quality Control:	
GPS Morning: Pass	GPS Afternoon: Pass
Site Activities Conducted:	
Mobilized onsite. Conducted daily health and safety brief. Continued sample collection at DU-1, and DU-3. Team complete the replicate in DU3, then mobilized to DU2 to scout out SU where it is possible to sample using the step probe to support A-Zone.	
Issues Encountered and Resolutions:	
None.	
Planned Activities:	
ERT staff will continue to collect samples in DU1, along with A-Zone collecting samples in DU2/3.

ERT DAILY FIELD REPORT

Project: Curtis Bay Depot RI/FS	**Date: 03/26/2019**
Report Number: 011	Prepared By: [redacted]
Time of Arrival at Site: 0700	Time of Departure from Site: 1700
Time of Safety Brief: 0715	
Weather/Site Conditions:	
Weather: 43 °F, sunny	
Personnel On-Site:	
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT
[redacted]	A-Zone
[redacted]	USACE Baltimore District
Equipment Quality Control:	
GPS Morning: Pass	GPS Afternoon: Pass
Site Activities Conducted:	
Mobilized onsite. Conducted daily health and safety brief. Continued sample collection at DU-1. ERT staff assisted and guided A-Zone in completing sample collection in DU3. Refer to the table below. [redacted] onsite from 0715 – 1000 and 1500 - 1600.	
Issues Encountered and Resolutions:	
None.	
Planned Activities:	
ERT staff will continue to collect samples in DU1 and assisting A-Zone collecting samples in DU2.

ERT DAILY FIELD REPORT

Project: Curtis Bay Depot RI/FS	**Date: 03/29/2019**
Report Number: 014	Prepared By: [redacted]
Time of Arrival at Site: 0700	Time of Departure from Site: 1700
Time of Safety Brief: 0715	
Weather/Site Conditions:	
Weather: 58 °F, sunny	
Personnel On-Site:	
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT
[redacted]	A-Zone
Equipment Quality Control:	
GPS Morning: Pass	GPS Afternoon: Pass
Site Activities Conducted:	
Mobilized onsite. Conducted daily health and safety brief. Continued sample collection at DU-1. ERT staff assisted and guided A-Zone in collecting samples in DU2 and DU1. Refer to the table below.	
Issues Encountered and Resolutions:	
None.	
Planned Activities:	
ERT staff will continue to collect samples in DU1 along with A-Zone collecting samples in DU1/2.

ERT DAILY FIELD REPORT

Project: Curtis Bay Depot RI/FS	**Date: 04/01/2019**
Report Number: 015	Prepared By: [redacted]
Time of Arrival at Site: 0700	Time of Departure from Site: 1700
Time of Safety Brief: 0715	
Weather/Site Conditions:	
Weather: 51 °F, sunny	
Personnel On-Site:	
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT
[redacted]	A-Zone
Equipment Quality Control:	
GPS Morning: Pass	GPS Afternoon: Pass
Site Activities Conducted:	
Mobilized onsite. Conducted daily health and safety brief. Continued sample collection at DU-1. ERT staff assisted and guided A-Zone in collecting samples in DU2 and DU1. Refer to the table below. Started mark out of SU and increment locations in background sampling area.	
Issues Encountered and Resolutions:	
RTK and Base station encounter a communication error. Minor delay in sampling due to only one functioning GPS. Overall, the field effort is on schedule.	
Planned Activities:	
ERT staff will continue to collect samples with A-Zone in DU2.	

Tables 1through 4 included below

ERT DAILY FIELD REPORT

Project: Curtis Bay Depot RI/FS	**Date: 04/02/2019**
Report Number: 016	Prepared By: [redacted]
Time of Arrival at Site: 0700	Time of Departure from Site: 1700
Time of Safety Brief: 0715	
Weather/Site Conditions:	
Weather: 48 °F, cloudy with a chance of rain	
Personnel On-Site:	
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT
[redacted]	ERT
[redacted]	A-Zone
Equipment Quality Control:	
GPS Morning: Pass	GPS Afternoon: Pass
Site Activities Conducted:	
Mobilized onsite. Conducted daily health and safety brief. Began sampling the background DU. ERT staff assisted and guided A-Zone in collecting samples in DU2. Refer to the table below. A-Zone de-mobilized from site upon completion of DU2.	
Issues Encountered and Resolutions:	
Planned Activities:	
ERT staff will continue to collect samples in the background DU.

SAMPLE COLLECTION CHECKLIST

Project Name/Number: Curtis Bay Depot Asst Mn RT 3753
Site Information/Location: AM counting MB
Date: 19 March 2019

Answer each question by checking the appropriate column (yes, no, not observed (N/O) or N/A). If "no" is checked, provide an explanation on the form.

	General	Yes	No	N/O	N/A
1	Were new protective gloves worn between sampling locations and/or intervals?	☒	☐	☐	☐
2	Were samples collected using methods described in the FSP?	☒	☐	☐	☐
3	Were sample containers filled in the correct order? (VOCs first)	☐	☐	☐	☒
4	Was sampling equipment appropriate for the purpose and site conditions?	☒	☐	☐	☐
5	Was sampling equipment decontaminated or disposable/dedicated equipment used between each sample?	☒	☐	☐	☐
6	Were procedures for collecting QA/QC samples followed as per the FSP?	☐	☐	☒	☐
7	Were sampling locations properly identified by land survey?	☒	☐	☐	☒
8	Were bottles adequately protected from contamination prior to sample collection?	☒	☐	☐	☐
	Ground Water for Chemical Analysis				
9	Were ground water parameters stable before sample collection (as per FSP)?	☐	☐	☐	☒
10	Were turbidity readings below 50 NTU (or if all other field parameters are stable and turbidity cannot be lowered below 50 NTU, were turbidity readings within + or – 10% over three, five-minute readings)?	☐	☐	☐	☒

The QC Inspector shall sign this checklist upon completion of all items on the checklist.

QC Inspector Signature: [redacted]

Notes: [redacted]

Four coolers Sample locations were determined using GPS, in accordance with the WFP-QAPP.

Earth Resources Technology

Form: QA-003
Date: 30-Apr-09
Version 1.2

FIELD DOCUMENTATION CHECKLIST

Project Name/Number: Curtis Bay Depot As & Mn RI 3753
Site Information/Location: AA County MD
Date: 19 March 2009

Answer each question by checking the appropriate column (yes, no, or N/A). If "no" is checked, please provide an explanation on the form.

Field Documentation	Yes	No	N/A
1 Was all original field data, except boring logs, recorded in black indelible ink? or blue	☒	☐	☐
2 Were log books filled out properly; accurately recounting the days events?	☒	☐	☐
3 Were all field forms completed and information accurately recorded:			
- Field Sampling Forms	☒	☐	☐
- Chain of Custody Forms	☒	☐	☐
- Field Log Notebooks	☒	☐	☐
- List additional field forms completed: H&S, Site Control Log	☒	☐	☐
4 Was field documentation forwarded to office for peer review and QC if requested?	☒	☐	☐
5 Were deficiencies reported to QC Manager/Project Team Manager?	☐	☐	☒

The QC Inspector shall sign this checklist upon completion of all items on the checklist.

QC Inspector Signature: [redacted]

Version 1.2

SAMPLE HANDLING CHECKLIST

Project Name/Number: Curtis Bay Depot Area 1 Unit 3753
Site Information/Location: AA County, MD
Date: 19 March 2019

Answer each question by checking the appropriate column (yes, no, not observed (N/O) or N/A). If "no" is checked, provide an explanation on the form.

	Packing, Storing, and Shipment of Samples	Yes	No	N/O	N/A
1	Were the samples handled according to the FSP?	☒	☐	☐	☐
2	Did the samples remain on ice or refrigerated (except for sample transfer from coolers or refrigerators) from collection until cooler was taped for shipment?	☒	☐	☐	☐
3	Were COC forms filled out accurately and completely including project name and number, sampling date, sampling time, analytical parameters, preservatives, size and number of containers for each analytical parameter, and media sampled?	☒	☐	☐	☐
4	Were COC forms signed and dated by the preparer and the form taped to the inside of the cooler lid?	☐	☐	☒	☐
5	Were signed and dated custody seals properly placed on the cooler and the cooler sealed with strapping tape?	☐	☐	☒	☐
6	Was a shipping label attached to the cooler?	☐	☐	☒	☐

The QC Inspector shall sign this checklist upon completion of all items on the checklist.

QC Inspector Signature [redacted]

Notes:

Lab has not noted any deficiencies re COC & cooler seals.

Earth Resources Technology

Form: QA-005
Date: 30-Apr-09
Version 1.2

INSTRUMENT CALIBRATION CHECKLIST

Project Name/Number: CBD Assessment
Site Information/Location: [redacted] County, MD
Date: 19 March 2018

Answer each question by checking the appropriate column (yes, no, not observed (N/O) or N/A). If "no" is checked, provide an explanation on the form.

	Instrument Calibration	Yes	No	N/O	N/A
1	Were all field instruments calibrated properly according to manufacturer's instructions?	☐	☐	☒	☐
2	Were all field instruments calibrated and calibration checked on the schedule in the FSP?	☐	☐	☒	☐
3	Did the calibration log form(s) list all calibration events?	☐	☐	☒	☐

The QC Inspector shall sign this checklist upon completion of all items on the checklist.

QC Inspector Signature: [redacted]

Notes:

The only instruments requiring "calibration" are the GPS units. GPS units were verified at the beginning & end of each work day against a benchmark.

DECONTAMINATION CHECKLIST

Project Name/Number: CBD As & Mn RI
Site Information/Location: AA County, MD
Date: 19 March 09

Answer each question by checking the appropriate column (yes, no, not observed (N/O) or N/A). If "no" is checked, provide an explanation on the form.

	Equipment	Yes	No	N/O	N/A
1	Was all sampling equipment decontaminated properly prior to use and between sample intervals?	☒	☐	☐	☐
2	Was each decontamination event recorded in the log book?	☑	☐	☐	☐
3	Was IDW (decontamination water) properly handled?	☑	☐	☐	☐

The QC Inspector shall sign this checklist upon completion of all items on the checklist.

QC Inspector Signature [redacted]

SITE SAFETY AND HEALTH PLAN REVIEW RECORD

Project: Former Curtis Bay Ordnance Depot - Depot-wide RI/FS
Site: Former Curtis Bay Depot, Anne Arundel County, Maryland
ERT Project No.: 3756

I have read the Site-Specific Health and Safety Plan for this site and have been briefed on the nature, level, and degree of exposure likely as a result of participation in this project. I meet and agree to conform to all the requirements of this Plan.

Rite in the Rain

2 Curtis Bay — Day 1

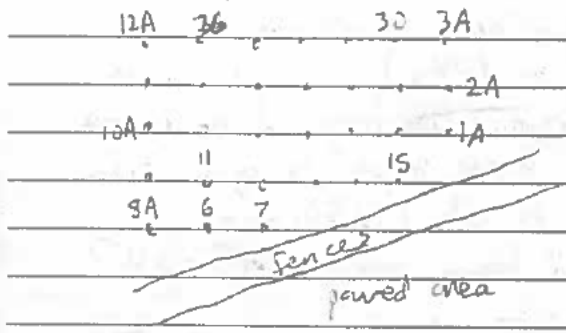
March 11, 2019

- [redacted] left ERT HQ 7:45 am after loading equipment.
- Stuby drove van (mileage 69789) [redacted] truck
  Woodward POV
- Arrived site 8:33. [redacted] already there
- Moved to staging area
- Safety brief / Site orientation
- Prepared equipment
- Stuby / Woodward began util clearance of DU3 ~ 9:45
- Had to do some troubleshooting with Geode GPS.
- Stuby / Woodward resumed util. at DU3
- Other 3 went to SU1 / DU1 to start flagging points ~ 11:05
- Stuby / Woodward moved to DU2 to begin util. markout 11:15
- Stopped around 12:30. Used GPR to find some possible utilities in paved areas. Traced out water line along street (blue)

3

- Found drain that is called "Rubber Mouth Ruby" and painted out line between it and another drain. (Also near DU2)
- Returned to staging ~~area~~ area for lunch.
- 1:00 Stuby / Woodward drove to find control points, found two nails still in place from 2013.
- Setup base on point 1003, but could not verify rover on point 1004. Found nail on the concrete foundation, but GPS rover goes to paint in the grass off ~ 40 ft.
- Stuby had Koron (a) come and make independent measurements of 1004 and 1003 with Geode. 1004 was within reasonable error of ~5 ft. 1003 was ~50 ft off, so that is the problem. Do not use 1003.
- Set up Topcon base on 1004. Went to other foundation and checked rover on 1001 — less than 0.1 ft error.
- Set up 2 new control points at DU2 (DU2-1 and DU2-2)
- Flagged SU7 in DU-1, no offsets
- Took down GPS base, returned to staging area 4:13
- Left van and truck on site

- off site ~4:30



Curtis Bay
March 12, 2019

- Arrived staging area 7:00 am (all staff in POVs)
- Stuby forgot van key at his house, so had to drive back to get it. Returned to site 8:30.
- Stuby joined team near DU3-SU9 ~8:45
- Staked out SU9R with Geode. 4 flags were on train track spur and were offset Stuby photo @ 9:30
- Stuby went to SU11R with Geode. Most of the grid overlaps with K9 building. Offset it to south, across road.
- Stored all points in file SU11R-NEW and exported to TXT file on Mesa (tablet). Photo of grid @ 10:47 (panorama from near NW corner)
- Stuby met briefly with other 3 guys to explain SU11R flags, then drove back to staging area to start SU51R.

Rite in the Rain

- Due to fence on south side of SU51R, several points were moved.

map of SU51R

Exported file to Mesa: SU51R-NEW.TXT
Photo from near NE corner ~ 12:10
- Stuby took lunch until ~ 12:50
- Walked back to SU55. Although not apparent on air photo, this is covered with asphalt and A-Zone will need to do it.
- Walked to nearby SU57 Apparently it is all phragmites swamp with shallow standing water. Not flagged. Hip-waders or at least tall boots required. Returned to van 1:30.
- Met with team (including Koroncai) to discuss next action, They will sample SU51R. I will go Flag grids SU06 and SU08.

[redacted]

- finished SU06 3pm. Offset entire grid ~120 ft to north to avoid road. SU06-NEW.TXT on Mesa.
- Finished SU08 3:45. All flags placed as planned but train tracks pass through west side of grid so some samples will need to be offset. Photo @ 3:46 from SW corner
- Returned to staging area where team was still working on SU51R
- Assisted with COC's and packing equipment until 5:00 pm

Rite in the Rain

Curtis Bay — Day 3

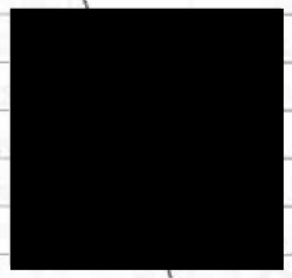
March 13, 2019

- Stuby arrived site 7am in POV
- Safety talk.
- [redacted] went to DU2 - to set up base station on DU2-1. Traing. Verified rover on DU2-2. Error ~0.3 ft.
- Moved to SU10, began flagging.
- Finished 9:15. Shifted entire grid 150 Ft south. File SU10-new.csv.
- Finished SU14 10:25. Deleted 12 points on east side of grid due to ditch, RR tracks, asphalt. Reset them on west side by lining up with other flags. File: SU14-new.csv
  Photos ~10:25 panorama from SW corner
  ~10:26 photo of ditch/RR/asphalt
- Moved to SU12. by 11:00. Planned location is on road, tracks, and phragmites, so we should shift south. Can't shift east because that would be DU2.
- New approx center at:
  1192255 14238909
- Shifted 236' south
- Points all worked out. SU12-new.csv

- Finished SU12 ~11:55. Panoramic photo from NW corner at 11:55. Corner of building 911 is at SE corner.
- [redacted] returned to staging area for lunch.
- Went to SU59 to see if it was impacted by USACE activity in EC25/49. It should be shifted 30 ft south.
- 12:35 dropped off [redacted] with sampling team where they are working at SU58.
- Stuby had conference call with USACE [redacted] 1:00 to 2:00 on Fort Hancock
- 12:20 moved with [redacted] / [redacted] to DU2 to start flagging and painting points so A-Zone has work ready for monday.
- Photo @ 2:58 panorama DU2-SU1 from NW corner of grid
- Stuby back at staging area, locked [redacted] van.
- Left site 3:15.

[redacted]

Rite in the Rain



Curtis Bay — Day 4

March 14, 2019

- Stuby arrived site 7am
- Safety talk when Koroncai arrived
- 7:30 Stuby used RD to mark out water line in DU3 along road. Two photos when complete ~8:25. An electric line is approx. colinear with it which Woodward painted out on Monday.
- 8:45 Spoke with Al Whittington of USACE
- Stuby/Woodward/Cole decided to flag out DU1 SU57.
- Returned from SU57 ~9:45.
- Stuby used RD to mark electric line in red in south part of SU57. Line connects electric light poles there.
- Stuby went to DU2 area to mark out gas line, also found culvert pipe crossing entrance.
- Returned to staging area. Met Watson and Koroncai who had been flagging grids. They went to McDonalds to buy lunch for everyone.

- Stuby went to DU1 SU30 and 27
  - photo of SU30 @ 12:42 from adjacent building
  - " SU27 @ 12:46 from near SE corner.
  - Most of SU30 is paved - A-zone required
  - SU29 will need to be offset to west.
- Panorama of SU37 from point on edge of asphalt west of NW corner of grid @1:12
- Pan of SU28 from road south of it. Suggest shifting to west because much of it is on a busy road.
- Pan of SU18 and SU15 from south edge of 18. Surface is covered with asphalt or gravel. Taken 1:26.
- 2:00 Stopped to check on Koroncai/Watson working in SU32+33. Panorama near border ~1:59, facing ~East.
- Panorama of SU50 @2:10, from road
- Panorama of SU48 @2:26, from near SE corner
- Panorama of SU44R @2:31, from near SE corner
- Walked into the revetment with the collapsed roofs.
- Returned to DU3 where Woodward/Cole are flagging grids.

- Transferred stuff from truck to van so truck can be used for Seismic refraction project tomorrow.
- Stuby offsite ~4:05
- Returned to ERT HQ ~4:45
- Get gas at Shell on Rt. 198
  13.353 gal, $32.78

Curtis Bay
March 18, 2019

Day 5

- Stuby arrived site 6:50 in ERT truck
- Set up RTK GPS base on pt 1004. Verified rover on pt 1001.
- ~8:00 drove over to DI SU5 area where team needed flags.
- Returned to staging area to begin flagging grids in DU3.
- Completed SU6 (cold shape next to warehouses) 9:05. Used orange + red stripe at each point
- Completed SU7 by 10:25, using blue + orange stripes. Several small patches of small arms MD and other MD near NE corner of grid. Photo @ 10:28, video before that.
- Went to van for short break. Resumed work 10:45
- Finished SU3R 11:50, using red/white stripes. About 10 points are in phragmites.
- Lunch break
- Port-o-pot (gotigo) had been knocked over over the weekend (by wind?). Called them for service. They should be here today anyway.

- Resumed work 12:40 in SU2
  Finished 1:40. Paint = red/yellow
- Started SU05 in blue/yellow paint
  Finished 2:30. Much of grid is asphalt
- Started SU04 in white/orange
  Finished 3:50.
- Drove to base to take it down
  Returned to staging area 4:12
- Stuby off site 4:20

[redacted]

Curtis Bay
March 22, 2019

Day 9

- Stuby on site 7am
- Safety talk
- Drove to DU2, arrived 7:30
- Set up GPS base at DU2-1, verified rover on DU2-2. Allegra might be close to dead.
- Went to SU04, started flagging (orange)
  Finished 8:40. Several flags offset due to fence, transformer, asphalt, bldgs.
  Nav CSV file: SU04-new
- SU01 02 03 05 already complete by [redacted] probably
- Stuby finished SU10 (yellow flags/paint) by 9:35
- Prepared for SU18.
- Stopped work ~9:50 for conf. call, 10-11 with Tom, Sean, Ryan. Call over ~10:30.
- Started SU18, finished 11:25, red flags
  Deleted point 3320 (still 30 points)
- Started SU17, orange flags, finished 1:45. Many flags offset by road and thick brush/deadfall. SU17-new.CSV
- Finished SU15, pink flags/paint, at 3:10
- Talked to [redacted] about next week's Shedule.

Rita in the Rain

- Stuby used Schonstedt to find rebar control point at witness post.
- Removed GPS base
- Returned to staging area
- Stuby off site 4:15

Curtis Bay
March 26, 2019

Day 11

- Stuby arrived site 7:00
- Safety talk
- [redacted] of USACE arrived site 7:15
- Drove to SU20 of DU1 to show her how we flag out grids. She helped.
- Drove to SU24 to observe [redacted] and [redacted] collect samples.
- Photo 8:42 showing road going through SU24. Several samples offset from road.
- Drove to DU3 where [redacted] and driller from A-Zone are working
- Took several photos of them working in SU8
- Dropped off Julie at her ~~car~~ car 9:30. She left site by 9:45 but plans to come back ~3:30
- Stuby started flagging DU1 SU25 ~9:50 after putting on hip waders.
- Very difficult in thick Phragmites. Dave + [redacted] showed up to help ~11:00. Finished ~12:10. Removed hip waders and [redacted] put them on. They began sampling.

Rite in the Rain

- Took coolers to [redacted] at SU15/18.
- Went to staging area, ate lunch.
- Went to stake out SU17. It is on a concrete pad so I offset it 200 ft W and 200 ft N Yellow Flags. Finished 1:47
- [redacted] came to SU17 to start 2:15
- Stuby flagged SU16, finished ~3:00
- [redacted] finished sampling SU17 ~3:30
- [redacted] back on site ~3:15
- [redacted] stayed with [redacted] and went to staging area while I visited [redacted] at SU15/18
- Returned to staging area
- Stuby off site 5:05

Curtis Bay — Day 12

March 27, 2019

- Stuby arrived site 7:00
- Set up RTK GPS base on C1, verified rover on C2
- Staked out DU1 SU44R by 8:20
- [redacted] started sampling it right away. offset ~4 flags off of gravel
- Went to SU48. Many points are west of perimeter fence or on asphalt road. offset grid 170 ft east. Finished ~9:15
- Moved back to SU17 area. Altered SU13 file, offset 100 ft W and 300 ft N. Some flags in water were offset to north.
- Photo 10:27 from NE corner of SU13
- Photo 10:34 from NW corner of SU16
- Photo 10:37 from SW corner of SU17 (Flags removed)
- Exported files with revised points:
  - SU44R-new.csv
  - SU13-new.csv
  - SU48-[redacted]offset.csv
  - SU17-offset.csv
- Moved to SU26 after eating lunch. Finished ~12:00. Irregular shape between revetment and road.

Peter deRaim

File: SU26-new.CSV
- Photos: Panorama from SW corner 12:08
  Panorama from top of revetment 12:04
- Moved to SU19, Finished 1:07. Moved 3 flags from bldg foundation to west side. Photo 1:09 from SW corner.
- Conference call on Costa Rica project 2:00 to 2:30
- Staked SU21 by 2:00. Much of it is grass-covered but seems gravelly. Photo: 3:04 from SE corner
- Notified team to stop work (other than cooler packing) after completion of ~~next~~ current grids. [redacted] (A-zone) should finish DU1 SU16 by 3:35. [redacted] just finished SU26.
- Stuby returned to staging area ~3:15. Took down RTK GPS base. Downloaded Allegro with shifted grid points
- Stuby off site 3:40

[redacted]

Curtis Bay
April 1, 2019

Day 15

- Stuby arrived site 7:00
- Safety talk
- Drive to DU2. Set up RTK GPS base on DU2-1, ~~verified rover on DU2-2~~ Could not verify rover on DU2-2. Latency 999 — base + rover not communicating. Restarting rover made it worse, could not diagnose problem using PCCDU on laptop — could not connect. Eventually set up base to use as rover.
- Flagged DU2, SU06 by 9:30. Many points offset up to ~8 ft due to RR tracks.
- Found nearby drain and used GPS to store points.
- Exported file: SU06-new-drains.CSV
- Drove over to Army Reserve Property, tried to meet with Captain [redacted] but no one answered the door/intercom. Will try again later.
- Went back to site and met with [redacted]

Rain

- Returned to Army Reserve, tried again with Captain Wilson, no answer.
- Walked back to SU6/7 area. Mapped perimeter of double areas and revised flags in VSP for both SU's.
- Reflagged both by 3:45
- Tried to enter Captain Wilson's bldg again but no one comes to the door.
- Took down base station tripod
- Returned to staging area 4:05
- Stuby off site 4:15

[redacted]

Curtis Bay — Day 17 (last)
April 3, 2019

- Stuby on site 8:00
- Drone to Army Reserve area (DU4).
- Safety talk
- Stuby used Geode to flag SU02 and then SU01. Many flags offset to east away from fence in SU01. File: SU01-NEW, CSV in Mesa. Finished by ~9:45.
- Stuby off site 10:15
