

DEFENSE LOGISTICS AGENCY

Federal Logistics (FED LOG®) Data

The Federal Logistics Information System (FLIS) forms the foundation for all DOD logistics information systems. It is the cataloging database of more than 16 million Items of Supply used by the United States Government (USG), North Atlantic Treaty Organization (NATO), and Partner Nations. The **Federal Logistics (FED LOG®)** data provides the ability to access and download FLIS data for use when Internet connectivity is not available. FED LOG® provides essential information about materiel that includes the NSN, Item Name, Design Control Activity, Manufacturers' and Suppliers' information (CAGE & Part Numbers), Freight Data, Packaging Data, Hazardous Materiel Indicators, Interchangeable and Substitutable data, Acquisition Advice Code (AAC) and Unit Price, Physical and / or Performance Characteristics along with service specific management data.

FED LOG® is available as a free downloadable product using [FedMail](#) and is available in 'Complete' or 'Lite' versions. The lite version is about half the size of the complete version, so it downloads quicker. FED LOG® is published monthly and is a product which is restricted Controlled Unclassified Information (CUI) and available to NATO and NATO Sponsored Countries, Federal and Civilian Agencies, Government contractors and DOW.

FMS FED LOG® users can get access and download via the Document Automation Content Services (DACS).

FED LOG® Queries:

FED LOG® offers two powerful search options to maximize logistics data research capabilities:

- **Interactive Search:** FLIS, Characteristics, CAGE, Army, Marines, Support Equipment, H2, H3, H6, History and SQL Tabs
- **Search Batch:** process multiple NSNs or Part Numbers queries and specify specific Data Elements pull and produce reports in a spreadsheet format

How can FED LOG® help in your logistics research?

Typical Scenario: Customer seeks a NSN for a specific pad lock

Search FED LOG® with known data

- Determine the Approved Item Name (AIN): PAD LOCK or PADLOCK
- Search specific criteria: Key* Alike* 5 LAM*
- Screen search results for requirements

Wild Card: Asterisk (*)

NSN 5340-00-682-1505
Document ID: A-A-59486B
<https://quicksearch.dla.mil/>

See Salient Characteristics 2.9

Acceptable styles see Salient Characteristic 2.8

- Search for an item based on key characteristic attributes (what it looks like, what it is made of, and other descriptive information)
- Obtain management data for procurement, requisition, storage, logistical, and management decision usage
- Determine freight standards
- Cross-reference part numbers and stock numbers
- Create batch searches and run large amounts of data
- Customize data to meet specific requirements
- Identify manufactures and distributors
- Obtain service-unique logistic information, for example
 - Army Master Data File (AMDF)
 - Navy Item Control Number (NICN)
 - Marine Corps Master Header Information File (MHIF)

DEFENSE LOGISTICS AGENCY

360° approach to Life Cycle Logistics Customer Support:

DLA Customer Interaction Center

The DLA Customer Interaction Center (CIC) began servicing customers in 2009. Receiving more than 258K contacts annually, they leverage technology to provide world class customer service geared towards logistics and supply needs. The CIC provides solutions to the Armed Services, Federal Agencies, State and local governments, government contractors, allied foreign military and the general public.

Email: dlacontactcenter@dla.mil Web: <https://www.dla.mil/Customer-Support/>

Training

DLA Logistics Operations Training (J31CT) offers training on most DLA Logistics Operations products and services. Most of our courses offer classroom instruction as well as Web Based Training (WBT), e.g., Webinar via MS Teams, Zoom.Gov, etc. WBT accessible from this web site to your personal computer. Tailored courses can be developed to meet individual service or agency needs.

Federal Logistics Information System (FLIS) Process Management

The FLIS Process Management is responsible for facilitation of the creation, maintenance, dissemination, and viewing of National Stock Number data within the FLIS Portfolio Suite of Systems. The sharing of this data amongst DLA systems (FED LOG®, WebFLIS®, FedMall), DOW Federal Agencies, and International Allies ensures data is available and actionable for military supply chains worldwide.
