

# **DEFENSE LOGISTICS AGENCY (DLA) COLUMBUS**

## **COOPERATIVE TIRE QUALIFICATION PROGRAM (CTQP) COOPERATIVE APPROVED TIRE LIST (CATL)**

### **CATL-1922**

#### **FOR US GOVERNMENT PURCHASE OF:**

**Non-Military: Passenger Car Tires, Pursuit and Emergency  
High Speed Tires, Light Truck Tires, Truck/Bus Tires (New &  
Retread), & Off Road Severe Application Tires (ORSA)**

**Military: Light, Medium and Heavy Tactical Truck and Trailer Tires**

This CATL-1922, revised SEPTEMBER 2023, replaces all previous versions.

COOPERATIVE APPROVED TIRE LIST (CATL)  
OF  
PRODUCTS QUALIFIED UNDER ASTM STANDARD F1922  
AND ADMINISTRATIVE MANUAL CTQP-AM-1922  
FOR  
TIRES, PNEUMATIC, VEHICULAR (HIGHWAY AND SPECIAL APPLICATIONS)  
(NEW AND RETREADED)

The Defense Logistics Agency (DLA) Land and Maritime (L&M) Strategic Acquisition Programs Directorate (SAPD), that manages the Tires Successor Initiative (TSI) requirements contract in support of DLA managed aircraft and ground tires, and the Naval Supply Systems Command Weapon System Support (NAVSUP-WSS) who manages the Navy Tires Performance Based Logistics Successor (TPS) contract in support of Navy managed aircraft tires, will be consolidated into one requirements contract that will be known as the Global Tires Program (GTP). The GTP will provide tire support for the Air Force, Army, Coast Guard, Marines, Navy and Foreign Military Sales (FMS). The Government will pursue an acquisition strategy by establishing Vendor Long Term Contracts (LTCs) or Vendor Indefinite Delivery Purchase Orders (IDPOs), hereby referred to as Vendor LTCs, with Original Equipment Manufacturers (OEMs) and dealers for tires. The acquisition strategy requires the GTP Integrator (SAIC) to utilize the DLA L&M established Vendor LTCs for its supply of tires for supply chain management and to provide responsive global supply support to military customers.

The GTP Integrator (SAIC), the Government and industry counterparts will be working together to support DLA's military customers by providing aircraft and ground tire support. The GTP Integrator (SAIC) and LTC Vendor(s) are required to meet all terms and conditions in their respective contract(s) and shall put forth its best efforts and at all times deal in good faith with one another in executing GTP support. The GTP Integrator (SAIC) is required to utilize the Government established Vendor LTCs for the GTP Integrator's inventory / replenishment of new and repairable tires. The LTC Vendor(s) shall fill and deliver orders to the GTP Integrator (SAIC).

The Cooperative Tire Qualification Program (CTQP) is administered by Ground Vehicle Systems Center with DLA oversight, and is limited in scope to tire groups that include a DOD ground vehicle tire application. The Tank Automotive Research Development and Engineering Center (Ground Vehicle Systems Center) is the Engineering Support Agency (ESA) for DOD ground vehicle tires.

Address: Detroit Arsenal  
US Army AFC-CCDC-SIE-ES-PE/Q-SPECSYS-TIRES  
6501 E. 11 Mile Rd.  
BLDG 200A 2<sup>nd</sup> Floor West MS: 268  
Warren, MI 48397-5000

The DLA Defense Supply Center Columbus (DSCC) has overall management responsibility.

Ground Vehicle Systems Center has technical responsibilities which include test site and test plan approval, review and approval of test results, and notification to DLA of qualifications/changes.

Ground Vehicle Systems Center updates and publishes via the internet CATL 1922 and 1923 lists as directed by DLA

This approved tire list has been updated by Ground Vehicle Systems Center as required by Defense Logistics Agency (DLA). It is prepared for Group 1, passenger car tires, Group 2, light truck tires, Group 3, medium and heavy truck/bus tires, and Special Application tires (see Chapter II.B for explanations of each group). Tires listed in this CATL have been tested and/or approved for procurement by U.S. Federal, State and Local Government agencies. This list is based on the results of Qualification Testing as prescribed in ASTM standard F1922 and accompanying Administrative Manual CTQP-AM-1922, issue in effect at qualification test run. This list is subject to change without

notice and revisions or amendments will be issued as necessary. The inclusion of tires on this list does not release the supplier from compliance with the specification requirements for tires supplied to the government.

The Cooperative Tire Qualification Program (CTQP) is a voluntary program designed to help ensure tire quality and performance for Government agencies. There is no legal requirement or national government policy mandate for government agencies to use the CTQP or this CATL list when purchasing tires.

The process for tire approval is as follows:

1. Tire manufacturer selects a test tire which meets the requirements for a DLA managed tire National Stock Number (NSN). Inclusion of multiple MODEL/BRAND DESIGNATIONS within a Group will continue.
2. Tire manufacturer prepares and submits a detailed test plan conforming to ASTM F1922 to Ground Vehicle Systems Center for review and approval.
3. Tire manufacturer selects a Ground Vehicle Systems Center approved independent test facility or proposes an independent test facility for Ground Vehicle Systems Center review and approval.
4. Ground Vehicle Systems Center selects the reference tire.
5. Tire manufacturer contacts with the test facility to perform testing and notifies Ground Vehicle Systems Center of the test schedule at least 30 days in advance.
6. Test results are certified by the independent test facility and a copy of the test results/final report are sent directly to Ground Vehicle Systems Center.
7. Ground Vehicle Systems Center reviews test results/report and notifies the tire manufacturer of the approval or disapproval decision within 30 days.
8. If approved, Ground Vehicle Systems Center notifies DLA and SAIC to publish the updated CATL via the internet.

NOTES:

1. Since all tires produced by a particular manufacturer were not offered for testing, the omission of any tire from this CATL does not necessarily mean that the unlisted tire is either unsafe or inferior in quality.
2. CATL updates will now be published online within 10 days of tire approval.
3. All sizes and ply ratings for the tires models/brands shown in this CATL are acceptable with the exceptions of the Group 1, Pursuit and Emergency High Speed and Military Tactical retreads, which are qualified by size, brand designation, and/or vehicle application/mission.
4. With the exception of Pursuit and Emergency High Speed tires, tires tested in the CTQP program and listed as qualified in this CATL were tested for treadlife durability only and qualified at speeds of not more than 65 miles per hour for Passenger Car and Light Truck tires and not more than 55 miles per hour for Truck & Bus tires. CATL treadlife testing and qualification as listed does not certify or verify a specific tires ability to perform at higher rates of speed. For speed capabilities of tires refer to the manufacturers own recommendations and speed ratings as required by Federal Motor Vehicle Safety Standards.

## **CHAPTER I – INTRODUCTION AND STANDARDS**

### **I.A. INTRODUCTION**

1. *On the surface the CTQP program and CATL 1922 appear to be difficult to use. But using the CTQP program and CATL when making tire purchases can be easier if you understand what the CTQP and CATL are, how the CATL is formatted, and what the various codes in the CATL signify.*

2. *These instructions are designed to explain how to use the CTQP program and this CATL list when purchasing tires.*

3. *Because specific agency procurement guidelines dictate the methods in which government agencies procure tires the recommendations provided in this CATL are only suggestions on how you may use the CATL. When purchasing tires your specific procurement guidelines or rules always take precedence.*

### **I.B. WHAT IS THE CTQP PROGRAM AND CATL LIST?**

1. *Before using the CATL and CTQP to make tire purchases, the government buyer should understand what the CATL and CTQP are. The following paragraphs help explain them.*

2. *What exactly is the CTQP program? Technically the letters “CTQP” is an acronym, which stands for “Cooperative Tire Qualification Program.” But in simple terms it’s a program, which was developed to replace the past Federal Tire Program.*

3. *For decades the Government would test and qualify tires for government purchase and tires that passed the tests were added to a list called the Qualified Products List (QPL). This list was used by many government agencies to help them make smart tire purchases. Because of streamlining and Acquisition Reform efforts, the Federal Tire Qualification Program was discontinued in January 1997 and many Federal or Military tire standards were deemed obsolete. However, because tires are usually one of the highest maintenance cost for vehicle fleets (typically only second to fuel), the U.S. Army saw a need and benefit to continue a modified program. As a result the CTQP program was developed. This new program is similar to the past program except that it is administered via contract using commercial standards.*

## **CHAPTER I – INTRODUCTION AND STANDARDS (continued)**

### **I.B. WHAT IS THE CTQP PROGRAM AND CATL LIST?**

4. *What is this CATL list? The letters “CATL” are an acronym that stands for “Cooperative Approved Tire List.” Basically the CATL is nothing more than an approved list of tires and manufacturers that have passed testing and/or technical reviews to certain standards.*

5. *This CATL document is published for Highway type tires, some special application type tires and military tactical retread tires.*

6. *Including this CATL document, there are many other elements, which make up the CTQP Program such as test standards, administrative guidelines and a Cooperative Plant Quality Certification (CPQC) program for retreaders. The CTQP also has separate standards, guidelines and a different CATL available for Low Speed, Off Highway type tires.*

### **I.C. STANDARDS USED**

1. *To become qualified in the CTQP and listed in this CATL-1 922 for highway type tires, manufacturers products must be tested to meet or exceed the following standards:*

- (a) Passenger Car, Light Truck, Truck/Bus and Severe Application Tires: ASTM Standard F1 922, Test Method for Tires Pneumatic, Vehicular, Highway.*
- (b) Pursuit, Emergency & High Speed Tires: ASTM Standard F1 922, Test Method for Tires Pneumatic, Vehicular, Highway which requires tests and certification to ECE Regulation 324 & SAE J1561, Laboratory Speed Test Procedures for Passenger Car Tires.*
- (c) Retreads: The retread process must pass on-vehicle tests using ASTM Standard F1 922 (mentioned above). In addition to testing, individual retread plants/facilities must also be inspected and certified annually, to meet the quality requirements of CTQP-441, Administrator’s Approval and Requirements Manual.*

2. *In 1998, the standards used for the CTQP program were officially approved by the American Society of Testing and Materials (ASTM). A chart showing the names and standards used for the CTQP program is shown on the next page. When referencing the CTQP program in contract solicitations use the names and standards indicated.*

## CHART OF NAMES & STANDARDS

<b>NAMES &amp; STANDARDS</b>	
NAMES USED:	
>	CTQP – Cooperative Tire Qualification Program
>	CATL – Cooperative Approved Tire List
>	CPQC – Cooperative Plant Qualification Certification
STANDARDS FOR HIGHWAY TIRES	
>	ASTM Standard F1922, Test Method – for Tires, Pneumatic, Vehicular, Highway
>	CTQP-AM-1922, Administrator's Approval and Requirements Manual for Tires, Pneumatic, Vehicular, Highway
>	CATL-1922, Cooperative Approved Tire List (CATL) for Tires, Pneumatic, Vehicular Highway
TEST STANDARDS USED FOR MILITARY	
RETREADS:	
>	Latest Version of Society of Automotive Engineers (SAE), Surface Vehicle Recommended Practice, SAE J2014
QUALITY STANDARDS USED FOR ALL RETREADS	
(MILITARY & NONMILITARY):	
>	CTQP-441 for Tires, Pneumatic, Retread and Repaired. This standard is used to inspect and certify retread facilities.
>	Retread products must also pass the applicable road test using one of the test standards mentioned above.

**\*\*Notes:**

**(1) ASTM Standards may be ordered from:**

*American Society of Testing and Materials (ASTM)  
100 Bar Harbor Drive, West Conshohocken, PA 19428-2959  
PHONE: 610-832-9500*

**(2) CATL Publications are available on the web at:**

<https://www.dla.mil/Land-and-Maritime/Business/Selling/Global-Tires-Program/>

## CHAPTER II – CATL FORMAT, CODES & DEFINITIONS

### II.A. FORMAT

1. *The CATL is formatted and sorted by tire group first, manufacturer or brand name owner second (alphabetically), then in sequence by assigned government item numbers and specific tire brand names. Other information listed are the qualified production points, test qualification reference numbers (identifies the specific test), qualification expiration dates, tread class and tire codes. Also in Appendix A you will find a complete list of manufacturers, retreaders or brand name owners addresses, telephone numbers and assigned CATL numbers.*

2. *This section helps explain the various groups, codes and reference numbers. As you are going through the definitions that follow, please refer to page 14 which shows a sample illustration page from a section of the CATL.*

### II.B. TIRE GROUP DEFINITIONS

1. *Because there are a wide variety of tire sizes, and tire size designations, from one manufacturer to another, and tire size designations are constantly changing, most tires in this CATL list do not include the specific tire sizes. Instead, tires in this CATL are listed by group. These tire groups are based on generic vehicle applications. To properly use this CATL list to purchase replacement tires you must first determine what vehicle group your tires will be applied to.*

2. *There are three basic groups of common type tires applications and two groups of special application type tires. These groups are listed below with more detailed explanations that follow:*

#### **(a) Group 1, Passenger Car Tires and Pursuit/Emergency High Speed Tires**

(1) *These tires include common passenger car tires. You can usually (but not always) identify tires of this group by looking for the letter “P” at the beginning of the tire size that is imprinted on the sidewall of the tire. An example of a tire size designation for this type of tire would be P205/75R15. Some common applications for these tires would be sedans and mini-vans.*

(2) *This group also includes a section for Pursuit/Emergency, High Speed Tires that are listed by specific tire size, speed rating code and brand name. Pursuit/Emergency, High Speed Tires would be applied to vehicles such as police cars, ambulances and other high speed emergency vehicles. Examples of these type of tire sizes would be P225/60R15(V) {V is the speed rating} or 225/60ZR1 6 {Z is the speed rating}.*

## **CHAPTER II - CATL FORMAT, CODES & DEFINITIONS** **(continued)**

### **II.B. TIRE GROUP DEFINITIONS (continued)**

#### **(a) Group 2, Light Truck Tires**

*This group is your common Light Truck tires. You can usually (but not always) identify tires of this group by looking for the letter “LT” at the beginning of the tire size that is imprinted on the sidewall of the tire.*

*However many older tire designs of bias construction do not include an “LT” designation in the tire size. An example of a radial tire size designation for this type of tire would be LT235/85R16. An example of a bias tire size would be 7.50-16. Common applications for these tires would be Pick-Up Trucks, Sports Utility Vehicles and some Trailers.*

#### **(b) Group 3, Truck & Bus Tires**

*These tires include medium and heavy truck, bus and trailer tires. Unlike Passenger Car and Light Truck tires, these tires do not have a letter designation at the beginning of the tire size. Examples of a tire size designations for these type tires would be 11R22.5 {for radial} and 10.00-20 {for bias}. Some common applications for these type tires would be Buses, Semi-Trucks/Trailers, Delivery Vans, Cargo Trucks, and non-tactical Military Supply Trucks and Troop Carriers.*

#### **(c) Special Application: Off-Road, Severe Application (ORSA) Tires**

*These tires are Special Application, Light Truck tires, which are used in severe off-road conditions. Some vehicle applications for these tires would be Pick-Up Trucks and Sport Utility Vehicles used by the U. S. Border Patrol and U.S. Forestry Service.*

### **II.C. GOVERNMENT ITEM NUMBER DEFINITIONS**

*All tires listed in this CATL have been assigned Government Item numbers. These numbers can be used to help identify a specific tire easier. More importantly, these numbers have codes that provide detailed information and an identity for each tire brand listed. An example, with explanations of each code of an assigned Government Item Number follows on the next page.*

## CHAPTER II - CATL FORMAT, CODES & DEFINITIONS (continued)

### 11.C. GOVERNMENT ITEM NUMBER DEFINITIONS (continued)

#### Example Government Item Number: X3.2.12RA/RB

- *The first position, “X” is the tire style. There are two styles; X which is a new tire or Y which is a retread tire. In this example this would be a new tire.*
- *The second position, “3” is the tire group. This example is a Group 3, Truck and Bus Tire. 1 is Passenger Car; 2 is Light Truck; 3 is Truck/Bus; “ORSA” is Off-Road, Severe Application; and “MIL” is Military Tactical application.*
- *The third position, “2” is the manufacturers assigned CATL number. All manufacturers are assigned CATL numbers and in this example the manufacturer of the tire would be Bridgestone/Firestone (U.S.A.) Incorporated. See the list in Appendix A, which shows all manufacturers assigned CATL numbers.*
- *The fourth position, “12” is a sequence number assigned to the specific tire brand name when it was listed. In this example this tire is the 12<sup>th</sup> Bridgestone/Firestone Inc. tire that was listed for Group 3.*
- *The fifth and six position, “RA/RB” identifies the construction of the tire and whether it is tube or tubeless. In this example the tire is of radial construction and is available as either tube or tubeless. The following explain what these style codes stand for:*
  - > RA = Radial, Tubeless.*
  - > RB = Radial, Tube Type*
  - > BA = Bias, Tubeless.*
  - > BB = Bias, Tube Type*
  - > RA/RB = Radial, Tubeless or Tube Type*
  - > BA/BB = Bias, Tubeless or Tube Type*

## **CHAPTER II - CATL FORMAT, CODES & DEFINITIONS**

### **(continued)**

#### **II.D. CODE DEFINITIONS**

*The CATL shows a column of additional codes assigned to each tire listed. These codes provide more details about the tire construction, usage information and vehicle/axle applications. Explanation of these codes follow:*

##### **CODES**

*AP = All Position (NOTE: Some o/o tires are designated by the manufacturer as All Position. Before placing o/o tire designated "DA" on the steer position, consult the tire manufacturer).*

*DA = Drive Axle only (NOTE: When this code is used in the Light Truck tire area, keep in mind that if you are placing these tires on a 4X4, "DA " does not mean that they can be placed on all axle positions).*

*LP = Low Profile*

*EHS = Emergency High Speed*

*EMT = Extended Mobility Tire*

*PS = Polyester/Steel construction (Body Cord/Belt Cord)*

*PSA = Polyester/Steel/Arimid construction*

*PSN = Polyester/Steel/Nylon construction (Body Cord/Belt Cord/Breakers)*

*N = Nylon construction (Body Cord)*

*RSN = Rayon construction (Body Cord)*

*ND = Non Directional Tread (usually military design)*

*NRFSR = Not Recommended for Secondary Roads*

*SR = Speed Rating (see next page for speed code definitions)*

*SS = Steel/Steel construction (Body Cord/Belt Cord)*

*STC = Snow Traction Capability*

*TO = Trailers Only position*

## CHAPTER II - CATL FORMAT, CODES & DEFINITIONS (continued)

### II.E. SPEED CATEGORY CODES

*In addition to the normal tire codes, Pursuit and Emergency, High Speed Tires also have a Speed Category Code Assigned to them which tells the speed rating of the tires. Explanation of these codes follow:*

<b><u>SPEED SYMBOL</u></b>	<b><u>SPEED CATEGORY</u></b>
<b><i>S</i></b>	<b><i>112 MPH (180 KM/H)</i></b>
<b><i>T</i></b>	<b><i>118 MPH (190 KM/H)</i></b>
<b><i>U</i></b>	<b><i>124 MPH (200 KM/H)</i></b>
<b><i>H</i></b>	<b><i>130 MPH (210 KM/H)</i></b>
<b><i>V</i></b>	<b><i>149 MPH (240 KM/H)</i></b>
<b><i>W</i></b>	<b><i>168 MPH (270 KM/H)</i></b>
<b><i>Y</i></b>	<b><i>186 MPH (300 KM/H)</i></b>
<b><i>Z</i></b>	<b><i>See note below.</i></b>

#### **NOTES:**

- > *Speed category codes are assigned to a tire and denotes the maximum speed for which the use of the tire is rated (all EHS or PEHS coded tires are speed rated).***
- > *Open ended speed category “Z”: For tires having a maximum speed capability above 149 MPH, a “Z” may appear in the size designation. For tires having a maximum speed capability above 186 MPH, a “ZR” must appear in the size designation. Consult the tire manufacturer for maximum speed capability of the particular tire when there is no service description.***

### II.F. TREAD “CLASS” DEFINITIONS

*The CATL also shows a column of tread class codes assigned to each tire listed. These tread class codes provide details about the tread design and how the tire should be used based on its tread design. Explanations of these tread class codes are on the next page. For more detailed tread class descriptions please refer to ASTM Standard F1 922 and Administrator Manual CTQP-AM 1922.*

## **\*CHAPTER II - CATL FORMAT, CODES & DEFINITIONS (continued)**

### **II.F. TREAD “CLASS” DEFINITIONS (continued)**

#### **CLASS**

<i>R/T =</i>	<i>RIB TREAD</i>
<i>A/S =</i>	<i>ALL SEASON (applies to Passenger Car and Light Truck tires only)</i>
<i>S/T =</i>	<i>SNOW TREAD (see note below)</i>
<i>A/T =</i>	<i>ALL TERRAIN</i>
<i>O/O =</i>	<i>ON/OFF ROAD</i>
<i>D/A =</i>	<i>DRIVE AXLE HIGHWAY TRACTION TREAD</i>
<i>T/O =</i>	<i>TRAILERS ONLY</i>
<i>S/O =</i>	<i>STEER ONLY</i>
<i>A/T/S =</i>	<i>ALL TERRAIN SEVERE APPLICATION</i>
<i>O/O/S =</i>	<i>ON/OFF ROAD SEVERE APPLICATION</i>
<i>M/S =</i>	<i>MUD AND SNOW (applies to Passenger Car and Light Truck tires only)</i>

*NOTE: To help describe the tire tread better, some tires may be identified further with a “(rib)” or “(lug)” designation next to the tread code.*

***NOTE: Some newer tires are designed for use in severe snow conditions and are marked on at least one sidewall with the letters "M" and "S" (e.g., MS, M/S, M&S, M+S, etc.) plus have a pictograph of a mountain with a snowflake. If you need more information on tires designed for severe snow conditions contact the CTQP Administrator (at (810) 677-5745) or refer to Rubber Manufacturers Association, Tire Information Service Bulletin, Volume 37, Number 2, February 1999 and titled "RMA Definition for Passenger and Light Truck Tires for Use in Severe Snow Conditions." An example of the mountain/snowflake is shown below.***

Severe winter traction icon

## CHAPTER III - USING THE CATL WHEN PURCHASING TIRES

*Your specific procurement guidelines will dictate the specific contract language you use when purchasing tires. However the following is a step-by-step example of how you may use the CATL when purchasing tires.*

**STEP 1, IDENTIFY WHAT YOU NEED:** *Identify the tire group you need to buy by looking at your vehicle applications and the tires you currently have. Provide a good description of the type and size for the tires you want to purchase in your contract solicitations. It's also recommended that you identify vehicle application info in your contracts when possible, as most manufacturers will match an appropriate tire for the application. When using the CATL to make purchases, make sure you identify the tire group, codes and tread classes. For example if you were purchasing replacement tires for a fleet of 1997 Ford Explorer Vehicles, that were originally equipped with radial, LT235/85R16 tire size, Load Range D, All Season, Rib type tread you could use the following description:*

**EXAMPLE:** Radial, LT235/85R16, Load Range D, for application on 1997, All Wheel Drive, Ford Explorer. Tires should be Group 2, Light Truck tires, All Season, Rib Tread class, and All Position as defined by the latest version of CATL 1922.

**STEP 2, REQUIRE CATL QUALIFICATION:** *Require in your contract solicitation that the prospective tire manufacturer or supplier be CATL qualified and that the tire brand be listed in the CATL or that the manufacturer/supplier provide proof of CATL qualification with a Qualification Certification Form (these forms are issued to all manufacturers upon successful completion of qualification testing). Example language you could use is as follows:*

**EXAMPLE:** Prospective contractors and their tire brands submitted under this solicitation must be qualified and listed in CATL 1922, or provide a Qualification Certification Form signed by the CATL program Administrator.

**STEP 3, PUT IT ALL TOGETHER:** *A complete example of contract language for purchasing new tires could be as follows:*

**EXAMPLE:** Tires are to be radial, LT235/85R16, Load Range D, for application on 1997 All Wheel Drive Ford Explorer. Tires should be Group 2, Light Truck tires, All Season, Rib Tread class, and All Position as defined by CATL 1922. The prospective contractor(s) and their tire brand(s) submitted under this solicitation must be qualified and listed in CATL 1922, or provide a Qualification Certification Form signed by the CATL program Administrator.

## CHAPTER III - USING THE CATL WHEN PURCHASING TIRES (continued)

**STEP 4, FOR RETREADS:** *For the obvious environmental and cost advantages, it's suggested that retreads be used to the maximum extent possible. Retread processes are also tested and listed in the CATL. However because quality may vary from one retread facility or franchise to another, each retread facility is also required to be inspected and certified annually to certain quality control standards (CTQP-441). Therefore the retreaders' process should not only be listed in the CATL but also the specific retread plant/facility should be able to provide a Cooperative Plant Quality Certification (CPQC).*

*A complete example of contract language for purchasing retread services could be as follows:*

**EXAMPLE:** Retread services for radial, LT235/85R16, Load Range D, for application on 1997 All Wheel Drive Ford Explorer. Tires will be retreaded for Group 2, Light Truck tires, All Season, Rib Tread class, and All Position as defined by the latest version of CATL 1922. The prospective retread contractor process brand name(s) must be qualified and listed in CATL 1922, or the retreader may supply a Qualification Certification Form signed by the CATL program Administrator. Prospective retread contractors must also provide a current copy of a Cooperative Plant Quality Certification (CPQC) which certifies compliance with CTQP-441 for any and all retread facilities or plants, which will provide retread services under this contract.

**STEP 5, VERIFY QUALIFICATIONS AND AWARD THE CONTRACT:** *Verify the contractor(s) and tire(s) qualifications by checking what is proposed to the CATL list. For retreaders make sure they also supply a copy of CPQC facility certification. If everything is in order award the contract.*

# **CHAPTER IV CATL-1922 LISTING OF APPROVED TIRE BRANDS**

Refer to Appendix A for a complete list of manufacturers, retreaders and brand name owners addresses, telephone numbers and manufacturers assigned CATL numbers.

## **GROUP 1, PASSENGER CAR: NEW TIRES**
