

# Environmental Management System

EMS is a management system that integrates environmental concerns and issues into management processes.

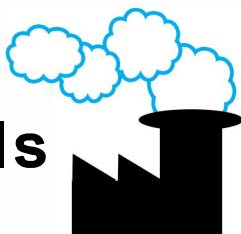

Inform associates of the commitments in the Environmental Policy Statement and help them understand how daily activities affect the environment.

## What are the DSCC commitments?

the use of fossil fuels

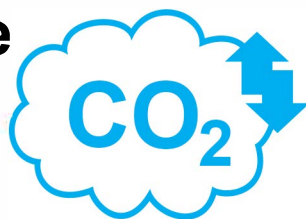

improve the management of water resources

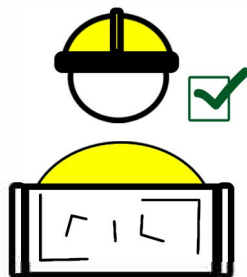

greenhouse gas emissions

associated with DOD operations

Divert solid waste from landfills

Ensure all projects are reviewed by the Environmental Division

per the National Environmental Policy Act

Ensure clean drinking water is available
