MEMORANDUM FOR: Manager "MOSC"

SUBJECT: Non - Potable Drinking Water

Scotia Drinking water has been tested throughout the last ten years and revealed it is unsafe due to high levels of heavy metals and particulate matter. After years of conclusive results, it is not cost effective to continue testing being water supply has not changed.

In accordance with OSHA 29 CFR 1910.141 "Sanitation", states potable water shall be provided in all places of employment. All drinking sources "Sinks" shall be marked "Non- Potable". Water is Unsafe and not to be used for Drinking, Washing, or Cooking.

Please procure an ample supply of bottled water for drinking consumption. If at any time the water supply to your office changes please notify me and we will take appropriate actions to test the water ensuring it is safe for human consumption.
