

# DEFENSE LOGISTICS AGENCY

AMERICA'S COMBAT LOGISTICS SUPPORT AGENCY

## Industrial Base Planning Dawn Leason

11/15/17

# Purpose

- Understand that the industrial base mission is regulatory
- Understand the functions of the industrial base office
- Define surge
- Understand the Warstopper Program
- Industrial base points of contact

# Regulatory Requirements

- Defense Production Act of 1950
- Executive Order 12919, 1994 – National Defense Industrial Resources Preparedness
- DoDI 3110.06 – War Reserve Material
- Joint Publication 4-05, Joint Mobilization Planning

# Industrial Base Missions and Functions

## Acquisition Policy & Support

Surge Policy

Fragility & Criticality Policy (Development)

Surge Challenges

NAICS - North American Industry Classification System

DLAI 1214  
DLAD 17.93

## Statutory & Regulatory Management

DPAS – Defense Priorities & Allocation System

CFIUS – Committee for Foreign Investment in the United States

Gov. Furnished Property (within contracts)

Title III

DLAI 1211

## Administrative Program Support

Cong. Report(s) & Audits

Contract Management

Job Series Mgt & Training

OSD & Service Coordination

DLAI 1211

## Warstopper Program Management

Budget

Project Development & Approval

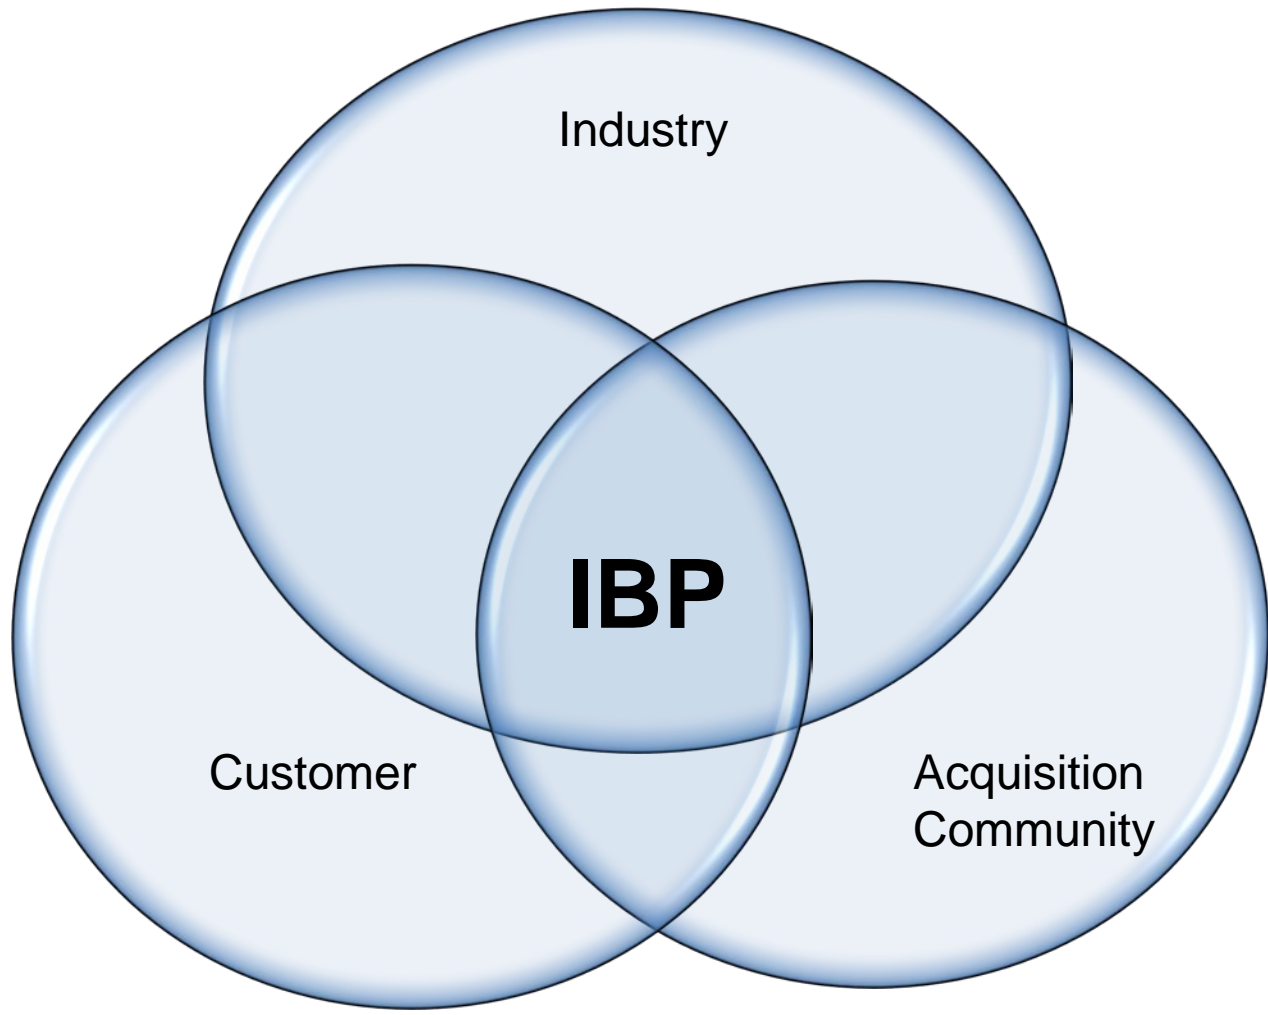

Studies / Risk Analysis Reports / Customer Outreach

Funding Execution

DLAI 1211

# IBP Methodology

# Surge

- Surge Requirements are in excess of peacetime requirements and above the basic contract maximum quantity. This would typically be used during times of war or unforeseen surges in demand as a result of a contingency."

# Warstopper Program

- Congressionally appropriated funds
- Warstopper funds are used to:
  - Study and Assess industrial base risks
  - Make targeted industrial base investments to mitigate risks and/or sustain critical warfighter capabilities.
- Warstopper roles and responsibilities are defined in DLA Instruction 1212

# Warstopper Program

- Criteria for investments or studies include:
  - Mission essential/critical items
    - Items capable of stopping a strategic warfighter capability
  - Critical Safety Items
  - Low peacetime demand but high wartime demand
  - Limited shelf life or long production lead time
  - An identified shortfall in industrial capability to meet the required delivery date for a wartime requirement.
  - Cost effective alternative to War Reserve inventory
  - A validated War Reserve Requirement or forecasted surge in demand during wartime or contingency operations.

# Warstopper Program

- **Government Investment**
  - Partner with manufacturers, distributors and Prime Vendors to gain access to commercial inventory
  - Stage vendor managed raw material for long lead time components
  - Provide lean six-sigma analysis to maximize vendor capacity
  - Provide industrial equipment (not common)
  - Award industrial base maintenance contract to vital domestic industry (not common)

# Points of Contact
