20.DESCRIPTION:
The MGPTS Type III incorporates a patented internal arch for support and clear, unobstructed interior space. This proprietary arch system creates a structure which distributes wind, rain and snow loads away from the fabric and directly to the arch (or support system), making a stronger, more durable fielded structure. Designed for use in various climate and weather conditions ranging from sweltering heat to severe cold. Passed all of the rigorous testing parameters for wind, rain and snow loads at Aberdeen Proving Ground. The Medium is 18'x36' and modular in design. All components are interchangeable between sizes and the the MGPTS Type I.TEMPER vestibule adapter is attached and can compelx to any MILSPEC tent. No parts longer than 96" when configured for transport - fits easily into an ISO container, TRICON container or standard pallet.
