

Modular General Purpose Tent System

The diverse mission of the army requires a weatherproof multipurpose shelter for both military operations and civilian. The Modular General Purpose Tent System (MGPTS) incorporates the latest design and manufacturing technologies to provide a multipurpose weatherproof shelter for any environment. The MGPTS is a pole supported, modular, and more habitable replacement for the current GP small tents. It utilizes tensioned fabric to create a structure which distributes wind, rain and snow loads from the fabric directly to the support system. Because of this design, the MGPTS distributes loads more efficiently with lighter support systems than conventional GP tents. It can serve as a billeting, command and control, unit supply, or field service shelter.
