

Hall of Fame Inductees

JUDITH HAWRYLIAK

Is inducted into the Defense Industrial Supply Center Hall of Fame this twentieth day of January 1999 for her extraordinary leadership and support as Director of Commodity Business Operations and for her continuous outstanding mission support throughout her tenure at DISC from 1965 to 1996.

Ms. Hawryliak was DISC's first female GM-15. Her initiatives to reduce buyer workload, maintain contract quality, simplify and reduce acquisition regulations, and push automation to cut acquisition lead time were all major contributions to exceptional customer support. She was responsible for leading edge development of innovative contracting techniques and contract automation tools, particularly the Command-wide effort to convert paper contracts to electronic commerce. Today, over 70 percent of all DISC contract actions employ some form of electronic commerce.
