COMPONENT I. Aggregate Distribution Price

Component I, Aggregate Distribution Price, is obtained by multiplying each distribution price in the Market Basket by its estimated quantity, and totaling the results for all distribution prices, standard and non-standard, for each Tiered Pricing Period.

Substitute the following:

COMPONENT I. Weighted Aggregate Distribution Price

Component IA, Aggregate Distribution Price inclusive of Private Convoy Security (Attachment 2) is obtained by multiplying each distribution price in the Market Basket by its estimated quantity, and totaling the results for all distribution prices, standard and non-standard, for each Tiered Pricing Period.

Component IB, Aggregate Distribution Price exclusive of Private Convoy Security (Attachment 4) is obtained by multiplying each distribution price in the Market Basket by its estimated quantity, and totaling the results for all distribution prices, standard and non-standard, for each Tiered Pricing Period.

Component I, Weighted Aggregate Distribution Price, is obtained by totaling the results of Components IA and IB, and then multiplying the resulting number by 0.50, for evaluation purposes only.

Total Evaluated Price

The Aggregate Distribution Price (Component 1) is more important than Aggregate Product Prices (Component II) since distribution prices are fixed throughout the life of the contract. Therefore, it is considered more important than Product Prices that may be adjusted throughout the life of the contract, in accordance with economic price adjustment provisions. Thus, for evaluation purposes only, the aggregate product price is reduced, or weighted, as stated in discussion of Component II above. The aggregate distribution and weighted aggregate product prices will be added to obtain a total evaluated price. This evaluated price will be used to determine the lowest overall cost to the Government, and will be used for evaluation purposes only, meaning that the evaluated price of an item may not be the same as the price the item would be cataloged after award. Even though aggregate prices will be used as the evaluation components for the Business Proposals, a 75% Market Basket was established, and will be used in the evaluation process to determine if offered prices are reasonable. The information requested on the "Schedule of Items," Attachments 1 and 3, will be evaluated using price analysis techniques. Quotes and/or invoices will be individually evaluated in accordance with the submission requirements.
