SPE300-15-D-B200

Modification Number: P00001

The purpose of this modification is to add new dispensing machines and the establishment of a new category of Non-Carbonated Bag-in-Box Box beverage products. The new category will be Sub-Category 2A of Non-Carbonated BIB. It is more highly concentrated water to product ratio (30:1 vs. 5:1) and called a "Flavor Shot".

The new dispensing machines shall be offered to current and new customers at no charge. Each machine is capable of dispensing four different flavor shots in a single nozzle in addition to eight nozzles of regular BIB product. There is also a nozzle that dispenses non-carbonated plain water.

Current Flavor Shot BIB varieties are cherry, grape, lemon, lime, peach, raspberry, strawberry and vanilla. Other flavors may be added/deleted at a future date. All flavor availability varies by region and bottler.
