2. BACKGROUND:

Gills Onions, LLC of Oxnard, CA is expanding its July 18 voluntary recall to include additional products because they may be contaminated with *Listeria monocytogenes*; a list is provided at the end of this release. The expanded product list includes diced, slivered and whole peeled onions and diced onion/celery mix with use-by-dates on or before August 3.

No illnesses have been linked to this recall.

This voluntary recall was initiated when the company was notified by the U.S. Food and Drug Administration that a random sample of diced yellow onions taken at retail tested positive for *Listeria monocytogenes*. As a precautionary measure, Gills Onions is recalling all products processed on the same day and on the same line as the sample that tested positive.

Listeria monocytogenes is an organism that can cause serious and sometimes fatal infections in young children, frail or elderly people, and others with weakened immune systems. Healthy individuals may suffer only short-term symptoms such as high fever, severe headache, stiffness, nausea, abdominal pain and diarrhea. *Listeria* infection can cause miscarriages and stillbirths among pregnant women.
