2. BACKGROUND: Nestlé Prepared Foods, a Springville, Utah establishment, is recalling approximately 92,206 pounds of LEAN CUISINE Baked Chicken meal products that may be contaminated with extraneous materials, specifically pieces of white hard plastic.

The baked chicken meal products were produced and packaged on September 2, 2020.

The products subject to recall bear establishment number “EST. P-9018” inside the USDA mark of inspection. These items were shipped to retailers and distributors nationwide.

The problem was discovered on December 18, 2020, by the firm, after receiving five consumer complaints involving hard white plastic found in the product. The firm believes the mashed potatoes used in the production of the baked chicken meals products had pieces of a plastic conveyor belt that broke during production.

FSIS has received no reports of injury or illness from consumption of these products. Anyone concerned about an injury or illness should contact a healthcare provider.

FSIS is concerned that some product may be frozen and in consumers’ freezers. Consumers who have purchased these products are urged not to consume them. These products should be thrown away or returned to the place of purchase.
