MEMORANDUM FOR RECORD

SUBJECT: MG Foods Recalls Various Turkey Sandwiches Due to Possible *Listeria monocytogenes* Contamination

1. **REFERENCE.** DHA-MSR 6025.01/AR 40-660/ DLAR 6025.01/NAVSUPINST 10110.8D/AFI 48-161\_IP/MCO 10110.38D, DOD Hazardous Food & Nonprescription Drug Recall System, 6 September 2018.

2. **BACKGROUND.** MG Foods of Charlotte, NC (VC# 37-0172) is recalling various Turkey Sandwiches due to a potential contamination of *Listeria monocytogenes*.

*Listeria monocytogenes* is an organism which can cause serious and sometimes fatal infections in young children, frail or elderly people, and others with weakened immune systems. Although healthy individuals may suffer only short-term symptoms such as high fever, severe headache, stiffness, nausea, abdominal pain and diarrhea, a *Listeria monocytogenes* infection can cause miscarriages and stillbirths among pregnant women.

The products were distributed between March 3, 2021 and March 5, 2021 and packaged in clear plastic wedges & paper bags. The products were sold at distributors located at the Charlotte Douglas Airport and via vending machines and micro markets located in business locations in Georgia, North Carolina, South Carolina, and West Virginia. The company reacted swiftly and as of end-of-day March 5, 2021 affected products were removed from sale at all locations.

No illnesses have been reported to date.

On March 2, 2021 during routine environmental testing the company detected the presence of *Listeria* on surface areas where the recalled products were produced. Out of an abundance of caution, MG Foods is recalling the products due to the potential that some product may be contaminated with *Listeria monocytogenes*.

**Note from Consumer Safety Officer:** M G Foods, Inc., VC# 37-0172 has voluntarily requested removal from the Worldwide Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement, effective 10 March 2021.
