MEMORANDUM FOR RECORD

SUBJECT: Expansion to ALFOODACT 2024-026 Boar's Head Provisions Co. Expands Recall for Ready-To-Eat Meat and Poultry Products Due to Possible *Listeria* Contamination

1. **REFERENCE:** DHA-MSR 6025.01/AR 40-660/ DLAR 6025.01/NAVSUPINST 10110.8D/AFI 48-161_IP/MCO 10110.38D, DOD Hazardous Food & Nonprescription Drug Recall System, 6 September 2018.

2. **COMPANY ANNOUNCEMENT:** Boar's Head Provisions Co., Inc., a Jarratt, Va., establishment, is expanding its July 26, 2024, recall of deli meat products that may be adulterated with *Listeria monocytogenes*, the U.S. Department of Agriculture's Food Safety and Inspection Service (FSIS) announced today. The establishment is recalling approximately 7 million additional pounds of ready-to-eat meat and poultry products. Whole genome sequencing results show that a liverwurst sample collected by the Maryland Department of Health tested positive for the outbreak strain of *Listeria monocytogenes*.

The problem was discovered when FSIS was notified that a sample collected by the Maryland Department of Health tested positive for *L. monocytogenes*. The Maryland Department of Health, in collaboration with the Baltimore City Health Department, collected an unopened liverwurst product from a retail store for testing as part of an outbreak investigation of *L. monocytogenes* infections. Further testing is ongoing to determine if the product sample is related to the outbreak. Anyone concerned about illness should contact a healthcare provider.

FSIS is working with the Centers for Disease Control and Prevention (CDC) and state public health partners to investigate the multistate outbreak of *L. monocytogenes* infections linked to meats sliced at delis. As of July 30, 2024, 34 sick people have been identified in 13 states, including 33 hospitalizations and two deaths. Samples were collected from sick people from May 29, 2024, to July 12, 2024. Additional information may be found on the CDC investigation notice, *Listeria* Outbreak Linked to Meats Sliced at Delis. The investigation is ongoing, and FSIS continues to work with the CDC and state partners.

Consumption of food contaminated with *L. monocytogenes* can cause listeriosis, a serious infection that primarily affects people who are pregnant, aged 65 or older, or with weakened immune systems. Less commonly, persons outside these risk groups are affected.

UNCLASSIFIED

Listeriosis can cause fever, muscle aches, headache, stiff neck, confusion, loss of balance and convulsions sometimes preceded by diarrhea or other gastrointestinal symptoms. An invasive infection spreads beyond the gastrointestinal tract. In people who are pregnant, the infection can cause miscarriages, stillbirths, premature delivery or life-threatening infection of the newborn. In addition, serious and sometimes fatal infections can occur in older adults and persons with weakened immune systems. Listeriosis is treated with antibiotics. Persons in the higher-risk categories who experience flu-like symptoms within two months after eating contaminated food should seek medical care and tell the health care provider about eating the contaminated food.

FSIS is concerned that some product may be in consumers' refrigerators and in retail deli cases. Consumers who have purchased these products are urged not to consume them and retailers are urged not to sell these products with the referenced sell by dates. These products should be thrown away or returned to the place of purchase. Consumers who have purchased these products are also urged to clean refrigerators thoroughly to prevent the risk of cross-contamination.

3. **PRODUCTS AFFECTED:** This expansion includes 71 products produced between May 10, 2024, and July 29, 2024, under the Boar's Head and Old Country brand names. These items include meat intended for slicing at retail delis as well as some packaged meat and poultry products sold at retail locations. These products have "sell by" dates ranging from 29-JUL-2024 through 17-OCT-24.

The products shipped to retailers bear establishment number "EST. 12612" or "P-12612" inside the USDA mark of inspection on the product labels.
