Note 2/ Use the seal width dimensions described for conventional heat seals in paragraph 3.1.4.1 as the seal width dimensions required for Horizontal, Form-Fill-Seal pouches.

Note 3/ Applicable to heat seals other than closure seals: Any heat seal width less than 1/16 inch at any location along its continuous path shall be recorded as a Critical category defect. Continuous path includes the location between the tear notch and the food product edge of the heat seal.

Note 4/ Applicable to heat seals other than closure seals: Any heat seal width less than 1/8 inch but greater than or equal to 1/16 inch at any location along its continuous path shall be recorded as a Major B category defect. Except for Horizontal, Form-Fill-Seal pouches, Continuous path includes the location between the tear notch and the food product edge of the heat seal.
