**SECTION B - SUPPLIES OR SERVICES AND PRICES OR COSTS**

I. The following changes apply to Contract SPE3S1-17-D-Z125:

A. Contract Solicitation, Section E-10.B.2., Page 22 of 105, delete (a) & (b) and insert:

“(a) All corrective actions performed on product due to foreign material and/or processed/ unprocessed container mix-ups must be approved by FTR. FTR approval may be accomplished by means of one the two following methods, the methods being subject to change as determined by the contracting officer to be necessary for determining FTR approval:

METHOD 1:

All corrective actions performed on product due to foreign material and/or processed/ unprocessed container mix-ups shall be submitted by the contractor to the GQAR for review and acceptability determination.

If the GQAR determines that the corrective action plan is acceptable, the contractor shall submit a “foreign material notification” or “unprocessed container notification” to FTR, prior to offering the lot for Government inspection. The notification shall include the corrective action plan, the GQAR's recommendation pertaining to the plan, and supporting documentation. FTR shall issue written authorization for offer of the lot for Government inspection.

If the GQAR determines that the correction actions are not acceptable and GQAR and the contractor cannot agree to an alternate plan for remediation, the contractor shall submit a corrective action/remediation plan and supporting documentation to FTR for resolution.

Standard rework procedures (SRP) for specific foreign material situations may be addressed under the contractor's documented QSP, Section XII - Corrective and Preventive Action Program. (see E-4-G.B.6.). SRPs may be referenced, as applicable, in the corrective action plan that the contractor provides for a specific instance (along with any relevant specific details).

All preventive and corrective actions documented by, proposed by, and conducted by the contractor shall conform to the regulations promulgated by the applicable regulatory agency (FDA, USDA-FSIS, USDC). It shall be the responsibility of the contractor to present to the GQAR and DLA verification of conformance to the applicable agency's regulations.

It is recommended that the GQAR be notified as soon as possible if and when incidents involving the finding by the contractor of foreign material in product and/or product ingredients occur.

METHOD 2:

The contractor shall submit a corrective action plan and supporting documentation to FTR for resolution.

Standard rework procedures (SRP) for specific foreign material situations may be addressed under the contractor's documented QSP, Section XII - Corrective and Preventive Action Program. (see E-4-G.B.6.). SRPs may be referenced, as applicable, in the corrective action plan that the contractor provides for a specific instance (along with any relevant specific details).

All preventive and corrective actions documented by, proposed by, and conducted by the contractor shall conform to the regulations promulgated by the applicable regulatory agency (FDA, USDA-FSIS, USDC). It shall be the responsibility of the contractor to present to DLA verification of conformance to the applicable agency's regulations.

It is recommended that the GQAR be notified as soon as possible if and when incidents involving the finding by the

**SECTION B - SUPPLIES OR SERVICES AND PRICES OR COSTS (CONTINUED)**

contractor of foreign material in product and/or product ingredients occur.

(b) The GQAR shall be notified, and documentation provided, when any finished product intended (or initially intended) to be offered to the Government has been produced using a bulk product or ingredient product lot(s) (or portion thereof) that has, at any time, been identified as containing or having contained foreign material. The documentation shall identify the foreign material and all corrective actions taken to render the bulk/ingredient product serviceable, including, but not limited to segregation and removal of portions of the bulk/ingredient product. The GQAR shall determine if the corrective actions taken render the bulk/ingredient product serviceable. If the GQAR agrees that the corrective actions taken render the bulk/ingredient product serviceable, the contractor shall submit a notification, to include the corrective action plan and supporting documentation, to FTR prior to offering any related finished product lots for Government inspection.

When the GQAR determines that the actions taken do not render the bulk/ingredient product to be serviceable and an alternate plan for remediation cannot be agreed upon by the GQAR and the contractor, the contractor shall submit a corrective action plan and supporting documentation to FTR for resolution.

Standard rework procedures (SRP) for specific foreign material situations may be addressed under the contractor's documented QSP Section XII - Corrective and Preventive Action Program (see E-4-G, B, 6). These SRPs may be referenced, as applicable, in the corrective action plan that the contractor provides for a specific instance (along with any relevant specific details).

All preventive and corrective actions documented by, proposed by, and conducted by the contractor shall conform to the regulations promulgated by the applicable regulatory agency (FDA, USDA-FSIS, USDC). It shall be the responsibility of the contractor to present to the GQAR and to DLA verification of conformance to the applicable agency's regulations.

It is recommended that the GQAR be notified as soon as possible if and when incidents involving the finding by the contractor of foreign material in product and/or product ingredients occur.”
