

Temperature Cycled TTI's

Original	Week 1	Week 2	Week 3	Week 4	Week 5	Week 6
						

This scan shows the darkening of the center Time Temperature Indicator (TTI) ring due to cycled temperature with a daily fluctuation between 130F and 85F, which was logged in MIL-VANS in Iraq during summer of 2006. Duration of test was 6 weeks.
