INSTRUCTIONS FOR COMPLETION OF DSCP FORM 5117

1. In the heading of the form, enter ration type.

2. **Part I, Inspection Activity Information**
   Inspector – your name and rank
   Section – your duty section
   Activity – your activity or command
   Date of inspection – self-explanatory
   Branch – the branch/squad you're a member of
   Region – the region/major command you're a member of

3. **Part II, Inspected Unit Information**
   Installation – location of unit
   Storage location of Rations – self-explanatory
   Unit Name – name of unit owning the rations
   Rations Received From – the activity/facility/company/ship from which the rations were received

4. **Part III, Rations Assembler Information**
   Contract Number – list all contract numbers represented (located on case)
   Assembler – located on case

5. **Part IV, Inspection Information**
   Class of Inspection – self-explanatory
   Type of Inspection – self-explanatory
   Type of Inspection Lot – see Section II.C.1
   Lot Size – lot size in Cases/Menus
   Lot Information – list all lot numbers represented, to include DOP and lot quantities

6. **Part V, Inspection Results**
   Condition Code – see Section III.D.
   Special Inspection Required – self-explanatory
   Storage Condition – self-explanatory
   Override Special Inspection – enter "yes" if decision made not to perform special inspection.
   Justification of Override – self-explanatory
   Next Inspection Due – enter the date of the next required inspection
   TTI Status – enter the number that the TTI most closely resembles (see Natick, TTI Comparator Model 80 (available on website- Photo 7A))
   Storage Temperature – enter the temperature range, if known, which the rations were normally stored
   Override Authorized By – self-explanatory

7. **Part VI, Sampling Plan**
    Ration Component (Special Only) - list the nomenclature of items requiring Special Inspection only
    Defect Table – defect examination tables (C, F, G, and J)
    Sampling Table – sampling tables (A, B, D, E, H, and I)
    Sample Size – sample size from sampling tables (A, B, D, E, H, and I)
    Defect Class – defect class (i.e. MAJ A, MAJ B, Minor) from sampling tables (A, B, D, H, E, and I)
    Action Number – action numbers from sampling tables (A, B, D, E, H, and I)
    Total Defects – indicate the total number of defects noted for each defect class
    Defects By Component Classification – indicate the number of defects noted by type of component

8. **Part VII, Nonconformance Summary**
    Assembler Lot No. – lot number(s)
    Affected Menu No. – menu number(s) affected
    Component & Code – component abbreviation (see table M on website) and Julian lot code from package
    Component Processor – component Contractor Abbreviation (see Table L on website)
    Defect Table – Tables C, F, G, or J
    Defect No. – Defect number from examination table (C, F, G, or J)
    Defect Code – Specific Defect Code (Table K)
    Description of Defects/Remarks – short description of defect found
    Defect Tally – total number of defects noted by type of component and defect classification

9. **Part VIII, Narrative Comments** – Use this block for descriptive information concerning inspections results, storage conditions, insect/pest management, and issue/serviceability recommendations to the accountable officer.

10. **Part VIIII, Signature Block** – Self-Explanatory
