SECTION B

PR 0018076118
NSN 8970-01-028-9406

ITEM DESCRIPTION:

SPECIFICATION/DESCRIPTION

8970-01-028-9406 Food Packet, Survival, Aircraft, Life Raft, regular, individual, two bars of fruit tablets & two packets of candy-coated chewing gum, packaged in a laminated bag, CID A-A-20331, Type I, style A, class 1. Prime Acquisition Document: Food Packet, Survival, Aircraft Life Raft. Commercial Item Description. A-A-20331, January 2000. USDA.

Date of Pack: Acceptance will be limited to Packet components produced and processed subsequent to date of award. 1/ 1/ Date of Pack only applies to new procurements and does not preclude the incorporation of Government Furnished property residual components from being utilized. Proposed use of residual components however, shall be subject to coordination with DSCP-HROS prior to use.

DEFINITIONS

Critical defect. A critical defect is a defect that judgment and experience indicate would result in hazardous or unsafe conditions for individuals using, maintaining or depending on the item; or a defect that judgment and experience indicate is likely to prevent the performance of the major end-item.

Major defect. A major defect is a defect, other than critical, that is likely to reduce materially the usability of the unit of product for its intended purpose.

Minor defect. A minor defect is a defect that is not likely to reduce materially the usability of the product for its intended purpose, or is a departure from established standards having little bearing on the effective use or operation of the unit.

The procedures contained in the Integrated Pest

CONTINUED ON NEXT PAGE

SECTION B

Management (IPM)

Program requirements for operational rations December 1998, and the "Contractor Sanitation Program . Operational Rations ", December 1998 are required and apply to all assembly and food component operations, except as exempted in Section E of this document (see attached IPMP & sanitation programs)

SECTION C (CONTINUED)

Sanitary requirements: As required by 48 CFR 246.471-1 subsistence, AR 40-657, veterinary/medical food inspection and laboratory service, DLAR 4155.3, inspections of subsistence supplies and services, clause 52.246-9p31, "Sanitary Conditions (Jan 1992) DPSC" contained in the solicitation for this product, and as clarified by the Armed Forces Food Risk Evaluation Committee, 31 Jan 1996, all operational ration food components will originate from sanitarily approved establishments. Acceptable sanitary approval is constituted by listing in the "Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement", published by the U. S. Army Veterinary Command (VETCOM), or an establishment inspected and approved by the U. S. Department of Agriculture (USDA) or the department of commerce (USDC), and possessing a USDA/USDC establishment number. This requirement applies to all GFM and CFM operational ration food components and to all operational ration types. Requests for inspection and directory listing by VETCOM will be routed through DSCP-HRS for coordination and action. Situations involving sole sources of supply, proprietary supply services, and commercial brand name items will be evaluated directly by the Chief, Approved Sources Division, VETCOM.

2001. (there are
no changes at this time).

THE FOLLOWING CHANGE(S) APPLY TO: Commercial Itemo
Description for
Chewing Gum, CID A-A-20175B, May 2003. (there are
no changes at this
time).

PACKAGING/PACKING/LABELING/UNITIZATION/MARKING

Component Packaging

Two tablets of Peppermint gum (flavor a), or two
tablets of Spearmint
gum (flavor b) shall be packaged in a cellophane
wrapper. Alternatively
, two tablets of Cinnamon gum (flavor c) shall be
packaged in a
cellophane wrapper.

Ten fruit tablets (individually wrapped), of
assorted flavors, shall be
wrapped to create a bar (type IV, Style A) of
A-A-20177) weighing not
less than one ounce.

Laminated Bags

Components shall be packaged into a pre-formed
laminated bag. The bag
shall be constructed from heat-sealable barrier
material, one layer of
which shall be a minimum of 0.00035-inch thick
(3.5 x 10⁻⁴) Aluminum
Foil. The bag shall be a flat style pouch having
maximum inside
dimensions of 3 1/2 inches wide by 7 inches long. o
The pouch shall be
made
by heat-sealing three edges with 3/8-inch (-1/8,
+3/16) wide seals. The
side and bottom seals shall have an average seal
strength of not less
than 6 pounds per inch of width and no individual
specimen shall have a
seal strength of less than 5 pounds per inch of
width. A tear notch or
serrations will be provided to facilitate opening
of the pouch. A 1/8
wide lip may be incorporated at the open end of
the pouch to facilitate
opening and filling of the pouch. The exterior
pouch color shall

CONTINUED ON NEXT PAGE

SECTION B

conform to number 20219, 30219, 30227, 30279, 30313, 30324, or 30450 of FED-STD-595, .Colors Used in Government Procurement.. Excess air shall be expelled and the bag closed by heat-sealing. The closure seal shall be free of foldover wrinkles or entrapped matter that reduces the effective closure seal width to less than 1/16 inch. The average seal strength shall be not less than 6 pounds per inch of width and no individual specimen shall have a seal strength of less than 5 pounds per inch of width. Seals shall be free of impression or design on the seal surface that would conceal or impair detection of seal defects. 1/.

1/.. When deemed necessary the USDA, testing of the unfilled, preformed pouches for seal strength shall be as specified in ASTM F 88, .Standard

Test Method for Seal Strength of Flexible Barrier Materials..

SECTION D (CONTINUED)

Labeling

Each packet shall be printed or stamped on the bag, in a manner that does not damage the item, with permanent black ink or any other contrasting color that is free of Carcinogenic elements. The information may be located anywhere on the bag (in one complete print), except the closure seal area. The label shall contain the following information:

Food Packet, Survival, Aircraft Life Raft

Date 1/

Contractor.s name & address

1/ Each packet shall have the Date of Pack noted using a four-digit code beginning with the final digit of the current year, followed by the three-digit Julian day code. The Julian day code shall represent the day the product was packaged into the bag.

Instructions. The following instructions shall be printed on a sheet of paper and provided in each packet:

"The food in this Survival Packet will be

CONTINUED ON NEXT PAGE

SECTION B

beneficial even when water supply is limited. When consumed in one day, these foods will maintain survival efficiency. Do not get items wet. Keep unused items in bag."

Packing

Thirty-six packets shall be packed into a Fiberboard shipping container constructed in accordance with Style RCS, Grade V3c of ASTM D 5118, "Standard Practice for Fabrication of Fiberboard Shipping Boxes". Each Fiberboard shipping container shall be securely closed in accordance with ASTM D 1974, "Standard Practice for Methods of Closing, Sealing, and Reinforcing Fiberboard Shipping Containers."

Marking

Shipping containers and unit loads shall be marked in accordance with

DSCP Form 3556 and the following Standard Item Description. The shelf

life data, cited below, shall be used in computing the Inspection/Test date.

Unit Shelf

NSN Name Size Qty. Issue Life

8970-01-028-9406 Food Packet 28 ft3 36 Pz. 84*

Survival 8#

Liferaft

Ration held at or below 800F

SECTION D (CONTINUED)

Unitization

Shipping cases will be palletized and prepared in unit loads in

accordance with Type III, Class G, requirements of DSCP Form 3507

(figure 5).

International Shipments Only:

Wooden Pallets in accordance with 47 CFR, Subpart 47-3, 47.305-1 @ (90).

For Palletized/Containerized loads, the use of metallic strapping and/or edge protectors is prohibited

Finished load dimensions (maximum):

The overall dimensions of Palletized loads shall not exceed 43 inches in

length, 52 inches in width, and 54 inches in

height (including pallet and cap when required).

INSPECTION & ACCEPTANCE

CONTINUED ON NEXT PAGE

SECTION B

The supplies and services furnished under the contract shall be covered by the most favorable commercial warranties the Contractor gives to any customer for such supplies for services and the rights and remedies provided herein are in addition to and do not limit the rights afforded to the Government by the Supply Warranty Clause (52.246-9P35) cited in the Solicitation within the contract for this item.

Examination of shipping containers shall be made to determine compliance with packing and marking requirements. Defects shall be scored in accordance with the table below. The lot size shall be expressed in shipping containers. The sample unit shall be one shipping container, fully packed. The inspection level shall be S-3 and the Acceptable Quality Level (AQL), expressed in Defects per Hundred Units (DHU), shall be 4.0 for major defects and 10.0 for total defects.

Examination of Shipping Containers

Category Defect

Major Minor

101 Marking Omitted, incorrect, illegible, or improper size, location sequence or method of application.

102 Inadequate workmanship. 1/

201 Contents more or less than specified. 2/

1/ Inadequate workmanship is defined as, but not limited to, incomplete closure of container flaps, loose stapling, inadequate stapling,

improper taping, or bulged or distorted container
2/ Notwithstanding the foregoing, the lot shall be rejected if sample data indicates a lot average count less than 95% of specified quantity.

SECTION E (CONTINUED)

Identity Examination

Examination will be performed to determine is thee

CONTINUED ON NEXT PAGE

SECTION B

item conforms to the Product Description cited in Section C of this document and is the shipment described on the shipping document. This examination will be done in conjunction with the examination for count, using the samples drawn for that examination. However, the AQL is not applicable for this examination. The finding of one or more nonconforming containers shall be cause for rejection of the lot. In addition, inspection shall be performed to determine identity and the presence of any internal infestation. This inspection will be an open package inspection. One package from each sample case selected for the count examination, will be opened for examination. The finding of one or more nonconforming containers shall be cause for rejection of the lot. This examination will be done in conjunction with the examination for count, set out above, using the samples drawn for that examination. The AQL, however, is not applicable for this examination. The finding of one or more nonconforming containers shall be cause for rejection of the lot.

Product Examination

The finished product shall be examined for compliance with the Salient Characteristics specified in A-A-30331, utilizing the double sampling plans indicated in ANSI/ASQC Z1.4. The lot size shall be expressed in packets. The sample unit shall be the contents of one packet. The inspection level shall be S-3 and the Acceptable Quality Level (AQL), expressed in Defects per Hundred Units (DHU), shall be 1.5 for major defects and 4.0 for minor defects. Defects and defect classifications are listed in the table below.

Product Defects 1/ 2/
.....

Category Defect

CONTINUED ON NEXT PAGE

SECTION B

Major Minor

- 101 Not Type, Style, or Class specified.
102 Missing or unserviceable component.
103 Not clean.
104 Instructions missing, incorrect or illegible.-

SECTION E (CONTINUED)

- 105 Gum packet does not contain two tablets.
106 Candy tablets not individually wrapped.
201 Twine not as specified.
202 Gum tablets not packaged in cellophane
203 Gum not flavors allowed.
204 Gum sticky, grainy, flabby or stringy.
205 Gum weighs less than 1.3 grams.
206 Gum coating incomplete, pitted, cracked
or discolored
207 Candy not assorted flavors
208 Overwrapped bar does not contain 10 fruit
tablets
209 Fruit tablet bar weighs less than one ounce
1/ The presence of any foreign material such as,
but not limited to,
dirt insect parts, hair, wood, glass, metal, or
mold, or the presence of
any foreign odors or flavors such as, but not
limited to, burnt,
scorched, sour, or stale shall be cause for
rejection of the lot.
2/ Finished product not equal to or better than the
approved standard in
overall appearance shall be cause for rejection of
the lot.

Filled and sealed Packet Examination

The filled and sealed packets shall be examined
for the defects listed
in the table below. The lot size shall be
expressed in packets. The
sample unit shall be one packet. The inspection
level shall be I and
the Acceptable quality Level (AQL), expressed in
Defects per Hundred
Units (DHU), shall be 0.65 for major defects and
2.5 for minor defects.

SECTION E (CONTINUED)

Filled and Sealed Packet Defects 1/

CONTINUED ON NEXT PAGE

SECTION B

Category Defect

Major Minor

101 Tear, hole, or open seal.

102 Unclean. 2/

103 Bag has foreign odor.

104 Seal width less than 1/16 inch. 3/

105 Presence of delamination. 4/

106 Any impression or design on the heat-seal surfaces which conceals or impairs visual detection of seal defects. 5/

201 Label missing, incorrect or illegible.

202 Presence of delamination. 4/

203 Tear notch or serrations missing.

1/ Any evidence of rodent or insect infestation shall be cause for rejection of the lot.

2/ Outer package shall be free from foreign matter that is unwholesome,

has the potential to cause package damage (for example, glass, metal

filings) or generally detracts from the clean appearance of the package.

The following examples shall not be classified as defects for unclean:

A. Foreign matter which presents no health hazard of potential package damage and which can be readily removed by gently shaking the package or by gently brushing the package with a clean, dry cloth.

B. Localized dried product which affects less than 1/8 of the total surface area of one package surface face, or an aggregate of scattered dried product which affects less than 1/4 of the total surface area of one package face.

SECTION E (CONTINUED)

3/ The effective closure seal is defined as any uncontaminated, fusion bonded, continuous path, minimum 1/16-inch wide, from side seal to side seal that produces a hermetically sealed pouch

4/ Delamination defect Classification:

Major . Delamination of the outer ply in the pouch seal that can be propagated to expose Aluminum foil at the food

CONTINUED ON NEXT PAGE

SECTION B

product edge of the pouch after manual flexing of the delaminated area. To flex, the delaminated area shall be held between the thumb and forefinger of each hand with both thumbs and forefingers touching each other. The delaminated area shall be rapidly flexed 10 times by rotating both hands in alternating clockwise-counterclockwise directions. Care shall be exercised when flexing delaminated areas near the tear notches to avoid tearing the pouch material. After flexing, the separated outer ply shall be grasped between the thumb and forefinger and gently lifted toward the food product edge of the seal or, if the separated area is too small to be held between the thumb and forefinger, a number two stylus shall be inserted into the delaminated area and a gentle lifting force applied against the outer ply. If separation of the outer ply can be made to extend to the product edge of the seal with no discernable resistance to the gentle lifting, the delamination shall be classified as a major defect. Additionally, spot delamination of the outer ply of the body of the pouch that is able to be propagated beyond its initial borders is also a major defect. To determine if the laminated area is a defect, use the following procedure: Mark the outside edges of the delaminated area using a bold permanent-marking pen. Open the pouch and remove the contents. Cut the pouch transversely not closer than 1/4 inch (+/- 1/16 inch) from the delaminated area. The pouch shall be flexed in the area in question using the procedure described above. Any propagation of the delaminated area, as evidenced by the delaminated area exceeding the limits of the outlined borders, shall be classified as a major defect. Minor . Minor delamination of the outer ply pouch,

CONTINUED ON NEXT PAGE

SECTION B

area is acceptable and shall not be classified as a minor defect unless it extends to within 1/16 inch of the food product edge of the food product edge of the seal. All other outer minor ply delaminations in the pouch seal area or isolated spots of delamination in the body of the, pouch that do not propagate when flexed as described above shall be, classified a minor defects.

SECTION E (CONTINUED)

5/ If doubt exists as to whether or not sealing equipment leaves an impression or design on the closure seal surface that could conceal or impair visual detection of seal defects, samples shall be furnished to the Contracting Officer for a determination as to, acceptability.

Unfilled Preformed Pouch Seal Testing

The seals of the unfilled preformed pouch shall be tested for seal

strength in accordance with ASTM F 88 . . . Seal Strength of Flexible

Barrier Materials.. The lot size shall be expressed in pouches. The

sample size shall be expressed in pouches. The sample size shall be the

number of pouches indicated by inspection level S-1. Three specimens

shall be cut from each of the three sealed sides of each pouch in the

sample. The average seal strength of any side shall be calculated by

averaging the results of the three specimens cut from that side. Any

average seal strength of less than six pounds per inch of width or any

test specimen with a seal strength of less than five pounds per inch of

width shall be cause for rejection of the lot.

Pouch Closure Seal Testing

The closure seals of the pouches shall be tested for seal strength in

accordance with ASTM F 88. The lot size shall be expressed in pouches.

The sample size shall be the number of pouches indicated by inspection

level S-1. For the closure seal on preformed

CONTINUED ON NEXT PAGE

SECTION B

pouches, three adjacent specimens shall be cut from the closure seal of each pouch sample. The average seal strength of any side, end or closure, shall be calculated by averaging the three specimens cut from that side, end or closure.

Any average seal strength of less than six pounds, per inch of width or any test specimen with a seal strength of less than five pounds per inch of width shall be cause for rejection of the lot.,
1/

1/ A certificate of Conformance (CoC) may be accepted as evidence that unfilled packages conform to the requirements specified above.

SECTION E (CONTINUED)

REWORK OF NONCONFORMING LOTS PRE OR POST ACCEPTANCE:

End item lots determined nonconforming may be reworked to correct or screen out the defective units. Rework shall only, be considered

acceptable to the government when the rework procedure has a reasonable probability of correcting the deficiency. Any rework plan, at a minimum

, will be approved by the supervisory government quality assurance

representative at the facility. Exceptions are those instances

involving a lot rejected/retained due to food safety and/or preparation and processing requirements (for example: Critical factors specified in the process schedule, product preparation, processing procedure, incubation processed/unprocessed container mix-ups, foreign materials, residues).

A lot rejected/retained due to food safety or a deviation from product preparation and processing requirements, or a lot rejected/retained due to the presence (actual or potential) of foreign material shall be retained in full and will require coordination with DSCP-HRS prior to initiation of any rework. These regulations are in addition to

CONTINUED ON NEXT PAGE

SECTION B

applicable "Code of Federal Regulations",
USDA-FSIS, and FDA
requirements.

A nonconforming lot, other than a lot retained for
a deviation from food
safety, foreign material, and/or preparation and
processing requirements
, (as stated above) may only be reworked one timer
without any specific
authorization from the contracting officer. If a
contractor
elects to rework a lot a second time, a petition, r
with supporting valid
technical reasons as to why a second rework will
prove more successful
than the first, must be submitted to the
contracting officer for
approval.

An end item lot rejected by the contractor or
government, or on which
warranty action has been taken, must be reworked
and reoffered within 30
days from date of initial rejection.

Rework proposals for lots involving insect or
rodent
infestation/contamination must be evaluated and
approved by
DSCP-HRS (Entomologist).

PACK CODE = U:

MARKING SHALL BE IN ACCORDANCE WITH MIL-STD-129.

SPECIAL MARKING CODE:

PALLETIZATION SHALL BE IN ACCORDANCE WITH REV

DATED 0

For all shipments of packaged materiel to the government, which includes either Depot (DLA-Direct) or DVD (Customer-Direct) shipments, both DoD linear and two-dimensional (2D) bar code markings are required on Military Shipping Labels in accordance with MIL-STD-129, Revision P, dated December 15, 2002 (but see DLAD 52.211-9010(D) for exceptions to the requirement for MSL and 2D symbols). See the DLA packaging web site identified in DLAD 52.211-9010(E) for change notices to MIL-STD-129P that apply. 2D bar coding shall be in accordance with ISO/IEC 15438, ISO/IEC 15434 (ANSI MH10.8.3) and DoD 4500.9-R. MSL linear (code 3 of 9 or code 39) bar coding shall be in accordance with ISO/IEC 16388. Shipping label stock quality shall meet MIL-PRF-61002. Bar code print quality shall meet ANSI MH10.8-2000 or ANSI X3.182-1990 (R2000) for applicable 2D and/or linear bar codes. All DVD shipments shall meet additional linear bar coding requirements in DLAD 52.211-9010(C). Except for the Transportation Control Number (TCN), which must always be present on the Military Shipping Label, when the contract/order omits any other data elements as defined in MIL-STD-129P and if the information is not available from the Administrative Contracting Office, then the field is not required as part of the Military Shipping Label and may be left blank. If there are inconsistencies between the schedule and MIL-STD-129P, the schedule takes precedence.

AL2A01 52.212-4 CONTRACT TERMS AND CONDITIONS --
COMMERCIAL ITEMS (FEB 2007) FAR

SECTION D

D11B03 252.211-7006 RADIO FREQUENCY IDENTIFICATION
(FEB 2007) DFARS

(a) Definitions. As used in this clause-
'Advance shipment notice' means an electronic notification used to list the contents of a shipment of goods as well as additional information relating to the shipment, such as order information, product description, physical characteristics, type of packaging, marking, carrier information, and configuration of goods within the transportation equipment.

'Bulk commodities' means the following commodities, when shipped in rail tank cars, tanker trucks, trailers, other bulk wheeled conveyances, or pipelines:

- (1) Sand.
- (2) Gravel.
- (3) Bulk liquids (water, chemicals, or petroleum products).
- (4) Ready-mix concrete or similar construction materials.
- (5) Coal or combustibles such as firewood.
- (6) Agricultural products such as seeds, grains, or animal feed.

'Case' means either a MIL-STD-129 defined exterior container within a palletized unit load or a MIL-STD-129 defined individual shipping container.

'Electronic Product Code: (EPC)' means an identification scheme for universally identifying physical objects via RFID tags and other means. The standardized EPC data consists of an EPC (or EPC identifier) that uniquely identifies an individual object, as well as an optional filter value when judged to be necessary to enable effective and efficient reading of the EPC tags. In addition to this standardized data, certain classes of EPC tags will allow user-defined data. The EPC tag data standards will define the length and position of this data, without defining its content.

'EPCglobal:' means a joint venture between EAN International and the Uniform Code Council to establish and support the EPC network as the global standard for immediate, automatic, and accurate identification of any item in the supply chain of any company, in any industry, anywhere in the world.

'Exterior container' means a MIL-STD-129 defined container, bundle, or assembly that is sufficient by reason of material, design, and construction to protect unit packs and intermediate containers and their contents during shipment and storage. It can be a unit pack or a container with a combination of unit packs or intermediate containers. An exterior container may or may not be used as a shipping container.

'Palletized unit load' means a MIL-STD-129 defined quantity of items, packed or unpacked, arranged on a pallet in a specified manner and secured, strapped, or fastened on the pallet so that the whole palletized load is handled as a single unit. A palletized or skidded load is not considered to be a shipping container. A loaded 463L System pallet is not considered to be a palletized unit load. Refer to the Defense Transportation Regulation, DoD 4500.9-R, Part II, Chapter 203, for marking of 463L System pallets.

'Passive RFID tag' means a tag that reflects energy from the reader/interrogator or that receives and temporarily stores a small amount of energy from the reader/interrogator signal in order to generate the tag response.

- (1) Until February 28, 2007, the acceptable tags are-
 - (i) EPC Class 0 passive RFID tags that meet the EPCglobal Class 0 specification; and
 - (ii) EPC Class 1 passive RFID tags that meet the EPCglobal Class 1 specification. This includes both the Generation 1 and Generation 2 Class 1 specifications.
- (2) Beginning March 1, 2007, the only acceptable tags are EPC Class 1 passive RFID tags that meet the EPCglobal Class 1 Generation 2 specification. Class 0 and Class 1 Generation 1 tags will no longer be accepted after February 28, 2007.

'Radio Frequency Identification (RFID)' means an automatic identification and data capture technology comprising one or more reader/interrogators and one or more radio frequency transponders in which data transfer is achieved by means of suitably modulated inductive or radiating electromagnetic carriers.

'Shipping container' means a MIL-STD-129 defined exterior container that meets carrier regulations and is of sufficient strength, by reason of material, design, and construction, to be shipped safely without further packing (e.g., wooden boxes or crates, fiber and metal drums, and corrugated and solid fiberboard boxes).

(b) (1) Except as provided in paragraph (b) (2) of this clause, the Contractor shall affix passive RFID tags, at the case and palletized unit load packaging levels, for shipments

of items that-

(i) Are in any of the following classes of supply, as defined in DoD 4140.1-R, DoD Supply Chain Materiel Management Regulation, AP1.1.11:

- (A) Subclass of Class I - Packaged operational rations.
- (B) Class II - Clothing, individual equipment, tentage, organizational tool kits, hand tools, and administrative and housekeeping supplies and equipment.
- (C) Class III - Packaged petroleum, lubricants, oils, preservatives, chemicals, and additives.
- (D) Class IV - Construction and barrier materials.
- (E) Class VI - Personal demand items (non-military sales items).

(F) Subclass of Class VIII - Medical materials (excluding pharmaceuticals, biologicals, and reagents - suppliers should limit the mixing of excluded and non-excluded materials).

(G) Class IX - Repair parts and components including kits, assemblies and subassemblies, reparable and consumable items required for maintenance support of all equipment, excluding medical-peculiar repair parts; and

(ii) Are being shipped to any of the following locations:

(A) Defense Distribution Depot, Susquehanna, PA:

DoDAAC W25G1U or SW3124.

(B) Defense Distribution Depot, San Joaquin, CA:

DoDAAC W62G2T or SW3224.

(C) Defense Distribution Depot, Albany, GA:

DoDAAC SW3121.

(D) Defense Distribution Depot, Anniston, AL:

DoDAAC W31G1Z or SW3120.

(E) Defense Distribution Depot, Barstow, CA:

DoDAAC SW3215.

(F) Defense Distribution Depot, Cherry Point, NC:

DoDAAC SW3113.

(G) Defense Distribution Depot, Columbus, OH:

DoDAAC SW0700.

(H) Defense Distribution Depot, Corpus Christi, TX:

DoDAAC W45H08 or SW3222.

(I) Defense Distribution Depot, Hill, UT:

DoDAAC SW3210.

(J) Defense Distribution Depot, Jacksonville, FL:

DoDAAC SW3122.

(K) Defense Distribution Depot, Oklahoma City, OK:

DoDAAC SW3211.

(L) Defense Distribution Depot, Norfolk, VA:

DoDAAC SW3117.

(M) Defense Distribution Depot, Puget Sound, WA:

DoDAAC SW3216.

(N) Defense Distribution Depot, Red River, TX:

DoDAAC W45G19 or SW3227.

(O) Defense Distribution Depot, Richmond, VA:

DoDAAC SW0400.

(P) Defense Distribution Depot, San Diego, CA:

DoDAAC SW3218.

(Q) Defense Distribution Depot, Tobyhanna, PA:

DoDAAC W25G1W or SW3114.

(R) Defense Distribution Depot, Warner Robins, GA:

DoDAAC SW3119.

(S) Air Mobility Command Terminal, Charleston Air Force Base, Charleston, SC:

Air Terminal Identifier Code CHS.

(T) Air Mobility Command Terminal, Naval Air Station, Norfolk, VA:

Air Terminal Identifier Code NGU.

(U) Air Mobility Command Terminal, Travis Air Force Base, Fairfield, CA:

Air Terminal Identifier Code SUU.

(V) A location outside the contiguous United States when the shipment has been assigned Transportation Priority 1.

(2) The following are excluded from the requirements of paragraph (b) (1) of this clause:

(i) Shipments of bulk commodities.

(ii) Shipments to locations other than Defense Distribution Depots when the contract includes the clause at FAR 52.213-1, Past Payment Procedures.

(c) The Contractor shall-

(1) Ensure that the data encoded on each passive RFID tag are unique (i.e., the binary number is never repeated on any and all contracts) and conforms to the requirements in paragraph (d) of this clause;

(2) Use passive tags that are readable; and

(3) Ensure that the passive tag is affixed at the appropriate location on the specific level of packaging, in accordance with MIL-STD-129 (Section 4.9.2) tag placement specifications.

(d) Data syntax and standards. The Contractor shall encode an approved RFID tag using the instructions provided in the EPC: Tag Data Standards in effect at the time of contract award. The EPC: Tag Data Standards are available at <http://www.epcglobalinc.org/standards/>.

(1) If the Contractor is an EPCglobal: subscriber and possesses a unique EPC: company prefix, the Contractor may

CONTINUED ON NEXT PAGE

use any of the identity types and encoding instructions described in the most recent EPC: Tag Data Standards document to encode tags.

(2) If the Contractor chooses to employ the DoD Identity Type, the Contractor shall use its previously assigned Commercial and Government Entity (CAGE) Code and shall encode the tags in accordance with the tag identity type details located at http://www.acq.osd.mil/log/rfid/tag_data.htm. If the Contractor uses a third party packaging house to encode its tags, the CAGE code of the third party packaging house is acceptable.

(3) Regardless of the selected encoding scheme, the Contractor is responsible for ensuring that each tag contains a globally unique identifier.

(e) Receiving report. The Contractor shall electronically submit advance shipment notice(s) with the RFID tag identification (specified in paragraph (d) of this clause) in advance of the shipment in accordance with the procedures at http://www.acq.osd.mil/log/rfid/advance_shipment_ntc.htm.

D11C02 52.211-9010 SHIPPING LABEL REQUIREMENTS -
MIL-STD-129P (MAY 2006) DLAD

D11C03 52.211-9010 SHIPPING LABEL REQUIREMENTS -
MIL-STD-129P (MAY 2006) ALT I (AUG 2005)

D47C01 52.247-9012 REQUIREMENTS FOR TREATMENT OF WOOD
PACKAGING MATERIAL (WPM) (FEB 2007) DLAD

(a) THIS CLAUSE ONLY APPLIES WHEN WOOD PACKAGING MATERIAL (WPM) WILL BE USED TO MAKE SHIPMENTS UNDER THIS CONTRACT AND/OR WHEN WPM IS BEING ACQUIRED UNDER THIS CONTRACT.

(b) Definition.

Wood packaging material (WPM) means wood pallets, skids, load boards, pallet collars, wooden boxes, reels, dunnage, crates, frame and cleats. The definition excludes materials that have undergone a manufacturing process, such as corrugated fiberboard, plywood, particleboard, veneer, and oriented strand board (OSD).

(c) All Wood Packaging Material (WPM) used to make shipments under DOD contracts and/or acquired by DOD must meet requirements of International Standards for Phytosanitary Measures (ISPM) 15, 'Guidelines for Regulating Wood Packaging Materials in International Trade.' DOD shipments inside and outside of the United States must meet ISPM 15 whenever WPM is used to ship DOD cargo.

(1) All WPM shall comply with the official quality control program for heat treatment (HT) or kiln dried heat treatment (KD HT) in accordance with American Lumber Standard Committee, Incorporated (ALSC) Wood Packaging Material Program and WPM Enforcement Regulations (see <http://www.alsc.org/>).

(2) All WPM shall include certification/quality markings in accordance with the ALSC standard. Markings shall be placed in an unobstructed area that will be readily visible to inspectors. Pallet markings shall be applied to the stringer or block on diagonally opposite sides of the pallet and be contrasting and clearly visible. All containers shall be marked on a side other than the top or bottom, contrasting and clearly visible. All dunnage used in configuring and/or securing the load shall also comply with ISPM 15 and be marked with an ALSC approved DUNNAGE stamp.

(d) Failure to comply with the requirements of this restriction may result in refusal, destruction, or treatment of materials at the point of entry. The Agency reserves the right to recoup from the Contractor any remediation costs incurred by the Government.

SECTION F

F11A06 52.211-16 VARIATION IN QUANTITY (APR 1984)
FAR

(b) The permissible variation shall be limited to:

.5 % (Percent) Increase 0 % (Percent) Decrease

This increase or decrease shall apply to the quantity at the line item level, or for phased delivery at the sub-clin level, as designated by item number followed by two alphas, i.e. 0001AA. The variation (if any) shall be shipped with the quantity for the line item, or for phased delivery the quantity specified for each sub-clin. Under no circumstances will the contractor ship a variation in quantity against any line item/sub-clin other than as specified in the delivery schedule.

SECTION H

H46E03 52.246-9P31 SANITARY CONDITIONS (JAN 1998)
DSCP

(a) Food Establishments.

(1) establishments furnishing food items under DSCP contracts are subject to approval by the Military Medical Service or another agency acceptable to the Military Medical Service. The government does not intend to make any award for, no accept, any subsistence products manufactured or processed in a plant which is operating under such unsanitary conditions as may lead to product contamination or constitute a health hazard, or which has not been listed in an appropriate

CONTINUED ON NEXT PAGE

government directory as a sanitarily approved establishment when required. Accordingly, the supplier agrees that, except as indicated in paragraphs (2) and (3) below, products furnished as a result of this contract will originate only in establishments listed in the 'Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement', published by the U.S. Army Veterinary Command. Bread and bakery products from an establishment inspected by the American Institute of Baking need not be listed in the 'Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement' if the contractor certifies in writing that the establishment is currently in good standing. If the establishment should lose their good standing with the American Institute of Baking, the contractor must notify the contracting officer and provide a new source of supply.

(2) Establishments furnishing the products listed below and appearing in the publications indicated need not be listed in the 'Directory of Sanitarily Approved Food Establishments'.

(i) Meat and meat products and poultry and poultry products from establishments which are currently listed in the 'Meat and Poultry Inspection Directory', published by the Meat and Poultry Inspection Program AMS, USDA. The item, to be acceptable, shall, on delivery, bear on the product, its wrappers or shipping container, as applicable, the official inspection legend or label of the agency.

(ii) Meat and meat products for direct delivery to military installations within the same state may be supplied when the items are processed under state inspection in establishments certified by the USDA as being equal to federal meat inspection requirements.

(iii) Poultry, poultry products, and shell eggs from establishments listed in the 'List of Plants Operating under USDA Poultry and Egg Grading Programs' published by Poultry Programs, Grading Branch, AMS, USDA. Egg products (liquid, dehydrated) from establishments listed in the 'Meat and Poultry Directory' published by the Food Safety Inspection Service. All products, to be acceptable, shall, on delivery, bear on the product; its wrappers or shipping container, as applicable, the official inspection legend or label of the agency.

(iv) Fish and fishery products from establishments listed in the 'Approved List--Sanitary Inspected Fish Establishments', published by the U.S. Department of Commerce, National Oceanic and Atmospheric Administration, National Marine Fisheries Service.

(v) Milk and milk products from plants having a pasteurization plant compliance rating of 90 or more, as certified by a state milk sanitation rating officer and listed in 'Sanitation Compliance and Enforcement Ratings of Interstate Milk Shippers', published by the U.S. Public Health Service. These may serve as sources of pasteurized milk and milk products as defined in paragraph N, Section I, Part II of the 'Grade 'A' Pasteurized Milk Ordinance, 1978 Recommendations of the U.S. Public Health Service', Public Health Service Publication No. 229.

(vi) 'Dairy Plants Surveyed and Approved for USDA Grading Service', published by Dairy Division, Grading Branch, AMS, USDA.

(vii) Oysters, clams and mussels from plants listed in the 'Interstate Certified Shellfish Shippers Lists', published by the U.S. Public Health Service.

(3) Establishments furnishing the following products are exempt from appearing in the 'Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement', or other publication, but will remain subject to inspection and approval by the Military Medical Service or by another inspection agency acceptable to the Military Medical Service:

(i) Fruits, vegetables and juices thereof.

(ii) Special dietary foods and food specialty preparations (except animal products, unless such animal products are produced in establishments covered by paragraphs (2)(i), (2)(iii), or (2)(iv) above).

(iii) Food oils and fats (except animal products, unless such animal products are produced in establishments covered by paragraph (2)(i), (2)(iii), or (2)(iv) above).

(iv) foreign establishments whose prepackaged finished items are imported by distributors or brokers into the United States as brand name items and then sold to armed forces procurement

agencies for commissary store resale.

(4) Subsistence items other than those exempt from listing in the U.S. Army Veterinary Command 'Directory of Sanitarily Approved Food Establishments for Armed Forces Procurement', bearing labels reading 'Distributed By', etc., are not acceptable unless the source of manufacturing/processing is indicated on the label or on accompanying shipment documentation.

(5) When the Military Medical Service or other inspection agency acceptable to the Military Medical Service determines that the sanitary conditions of the establishment or its products have or may lead to product contamination, the contracting officer will suspend the work until such conditions are remedied to the satisfaction of the appropriate inspection agency. Suspension of the work shall not extend the life of the contract, nor shall it be considered sufficient cause for the contractor to request an extension of any delivery date. In the event the contractor fails to correct such objectionable conditions within the time specified by the contracting officer, the government shall have the right to terminate the contract in accordance with the 'Default' clause of the contract.

(b) Delivery Conveyances.

The supplies delivered under this contract shall be transported in delivery conveyances maintained to prevent contamination of the supplies, and if applicable, equipped to maintain any prescribed temperature. (Semiperishable supplies shall be delivered in a non-refrigerated conveyance.) The delivery conveyances shall be subject to inspection by the government at all reasonable times and places. When the sanitary conditions of the delivery conveyance have led, or may lead to product contamination, or they constitute a health hazard, or the delivery conveyance is not equipped to maintain prescribed temperatures, supplies tendered for acceptance may be rejected without further inspection.
